

# VEGETABLE SEEDS

It is our desire to offer our customers only the finest strains available. In maintaining these standards, we contract with only the most reliable and experienced breeders and growers to supply us with high quality seed.

By maintaining these high standards, we pledge to serve you to the best of our ability. The varieties we are listing are available for bedding plant production only, not for commercial production purposes.

"Heirlooms" . . . They are the antiques of the seed world. These treasures are always non-hybrids and are "open pollinated" with a long history of selection. Many are the base in which the F-1 Hybrid of today were established. They are prized for their flavor, hardiness, color, yield, and disease resistance. "Old Fashioned" varieties are very popular today after being passed from generation to generation and reflect back to an individuals heritage. They are what our relatives grew a hundred or more years ago.

## ARTICHOKE

650 sds/oz 14 days

For the best germination, soak seeds in warm water for 4-6 days before sowing. Attractive, ornamental perennial with edible flower buds. Needs winter protection from severe freezing conditions. Herbalists believe artichokes are useful in treating indigestion, liver protective properties and cholesterol reducer.

## GREEN GLOBE - 7511

650 S. Large edible flower heads. Ferny tittle-like foliage is also useful in the landscape. Under ideal conditions they can be harvested the second year. Steam them and they are great for dipping in butter or sauces.

- (A103) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$14.55; 1 oz.-\$27.35; 4 oz.-\$89.65

## ASPARAGUS

1,500 sds/oz

For the best germination, soak seeds in warm water for 4-6 days before sowing. 1 oz. will produce 250 roots. About 1 oz. for 100 ft. row, when planting, space rows 18 x 24 in. About 2-3 lbs. per acre when direct seeding.

## MARY WASHINGTON - 7513

1,500 S. Developed by Dr. J. B. Norton, U.S. Department of Agriculture, for resistance to asparagus rust and considered the most desirable of the Asparagus family.

- (A104) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$21.40

## BEANS

100 sds/oz

Plant beans in rows 2 ft. apart. 1 lb. will plant a 50 ft. row. Space 4 x 18 in. when direct seeding, about 75 lbs per acre.

## BEAUTIFUL

Crop failure. As a substitute, we suggest Tendergreen.

## FAVA, JUMBO

Crop failure. As a substitute, we suggest Tendergreen.

## KENTUCKY WONDER - 7518

75 S. (Old Homestead). Heirloom. 58 days. Green pole bean. 8 inch thick, oval beans.

- (B071) 2 oz.-\$5.65; 4 oz.-\$9.55; 8 oz.-\$17.35; 1 LB.-\$32.95

## BEANS (continued)

## TENDERGREEN - 7520

70 S. 53 days. Bush habit, stringless. 6 in. pods are rich green and outstanding in tenderness and rich flavor. Ideal for canning or freezing. Disease resistant.

- (B070) 2 oz.-\$5.65; 4 oz.-\$9.55; 8 oz.-\$17.35; 1 LB.-\$32.95

## WAX INDY GOLD - 7521

90 S. 58 days. Uniform yellow pods are 5-6 in. long by 3/8 in. diameter. Tolerant to Common Bean Mosaic races 1 and NY15.

- (B071) 2 oz.-\$5.65; 4 oz.-\$9.55; 8 oz.-\$17.35; 1 LB.-\$32.95

## BEETS

1,200 sds/oz 75° 15 days

For the best germination, cover seeds lightly after sowing. Space rows 18-24 in. apart. 4 ozs. for a 175 ft. row. Beets are delicious, tops are excellent when cooked for greens. Beets are known to promote a diuretic washing action via the liver and kidneys. High in iron content that serves as a strong agent for flushing away fatty deposits and impurities.

## CHIOGGIA - 7541

3,000 S. Heirloom. 55 days. Very sweet and flavorful. This unique Italian specialty is very popular with its smooth skin and pink striped interior.

- (B061) 1/2 oz.-\$5.35; 1 oz.-\$8.85; 2 oz.-\$19.70; 4 oz.-\$28.85

## DETROIT DARK RED - 7523

2,000 S. Heirloom. 55 days. Short top, globe shape. The most popular garden variety.

- (B047) 1 oz.-\$6.90; 4 oz.-\$24.90; 1 LB.-\$89.45

## GOLDEN WONDER

Sorry, no longer available.

## BITTER MELON

150 sds/oz 70°-75° 15 days

For the best germination, we suggest that before sowing, soak seed in warm water for 4-5 days, changing the water daily. Cover seeds lightly and maintain 75° soil temperature.

## BALSAM PEAR - 7522

140 S. Widely grown in tropical countries. Known as the Indian type. Harvest young fruits like cucumbers. Heavily warted 6-8 in. fruit. High tolerance to heat and adverse conditions.

- (B046) 1/8 oz.-\$6.35; 1/4 oz.-\$9.70; 1/2 oz.-\$16.40; 1 oz.-\$29.85; 4 oz.-\$107.40

## BROCCOFLOWER

Green Cauliflower

7,000 sds/oz 70° 10 days

For the best germination, cover seeds lightly after sowing. Use the same culture as Cauliflower, they are heavy feeders.

## BROCCOVERDE - 7535

9,000 S. 68 days. A cross between cauliflower and broccoli. Lime-green 1 lb. heads are semi-domed. Excellent flavor and quality with good heat tolerance.

- (B2) 1/64 oz.-\$5.35; 1/32 oz.-\$8.85; 1/16 oz.-\$12.40; 1/8 oz.-\$20.85; 1/4 oz.-\$39.35

## BROCCOLI

6,000 sds/oz 70° 10 days

For the best germination, cover seeds lightly after sowing. Plants can be ready for sales about 4-5 weeks after seeding. Space plants 36 x 24 in. outdoors. About 1/4 oz. for a 100 ft. row or 2 lbs. per acre when direct seeding. Broccoli is very high in Vitamins A and C. Being a member of the Brassica (Broccoli and Cabbage) family, it is an excellent source of antioxidants that medical research suggests may prevent cancer.

## EARLY DIVIDEND - 7514

5,000 S. (F-1 Hybrid). 45 days. Very early variety bears medium sized heads, then quickly produces 3-4 in. secondary heads.

- (GG) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$13.50; 2,500 sds-\$31.70; 5,000 sds-\$58.65

## GREEN SPROUTING - 7529

7,000 S. Heirloom. Early, valuable all-season.

- (B049) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 2 oz.-\$18.85; 4 oz.-\$26.90

## PACKMAN - 7525

7,000 S. (F-1 Hybrid). 50 days. Very early and large headed variety with good side shoot development.

- (B073) 250 sds-\$6.90; 500 sds-\$11.40; 1,000 sds-\$15.95; 2,000 sds-\$28.70

## PREMIUM CROP - 7528

4,500 S. (F-1 Hybrid). (All America Winner - 1975). 58 days. Very early, large heads that are firm with small beads. Vigorous grower, very uniform.

- (VB) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$12.40; 2,000 sds-\$21.85

**BRUSSEL SPROUTS**

7,000 sds/oz 70° 10 days

Same culture as Broccoli. Sow in March and again in mid-June for fall crop. For the best germination, cover seeds lightly after sowing. Space 36 x 18 in. outdoors, about 1-1/2 lbs per acre when direct seeding.

**BUBBLES - 7532**

4,000 S. (F-1 Hybrid). 82 days. A very high quality variety that is highly productive. Sprouts are dark green, uniform, and flavorful. Disease resistant. Outstanding variety.

- (B051) 1/32 oz.-\$5.35; 1/16 oz.-\$8.85; 1/8 oz.-\$12.40; 1/4 oz.-\$20.40; 1/2 oz.-\$38.80

**DUTCH TREAT - 7526**

5,000 S. (F-1 Hybrid). 110 days. High yielding, very uniform with nice upright plants. Outstanding flavor with a hint sweetness.

- (B014) 1/32 oz.-\$5.35; 1/16 oz.-\$8.85; 1/8 oz.-\$12.40; 1/4 oz.-\$20.15; 1/2 oz.-\$38.55

**JADE CROSS - 7533**

5,500 S. (F-1 Hybrid). (All America Winner - 1959). 85 days. Is early, has excellent color and is very productive. An outstanding variety.

- (VB) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$12.40; 2,000 sds-\$21.85

**LONG ISLAND - 7534**

20 in. - 8,000 S. 90 days. The most popular, they yield amazing amounts of sweet, medium-sized heads. Sweeter after temperatures fall below freezing. Good keeper.

- (B053) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$18.55

**Cabbage.**

Also see listing of Cabbage, Flowering under Annuals.

**CABBAGE**

7,000 sds/oz 70° 7-10 days

For the best germination, cover seeds lightly after sowing. Sow in March. Grow cool after transplanting. Space plants 18 in. apart in rows 3 ft. apart. Never plant cabbage in the same location 2 years in a row. About 1/4 oz. for a 100 ft. row or 2 lbs. per acre when direct seeding. Cabbage is high in Vitamin C and Potassium. Being a member of the Brassica (Broccoli and Cabbage) family, it is an excellent source of antioxidants that medical research suggests may prevent cancer. To keep the smell of Cabbage out of your kitchen when cooking or boiling Cabbage, add several stalks of Celery to the pot.

**COPENHAGEN MARKET - 7633**

7,000 S. Heirloom. 67 days. Good for early market, home garden or kraut.

**DANISH BALLHEAD - 7634**

7,000 S. Heirloom. 105 days. Large, solid round heads. Best late variety.

- Each of the above: (31A1) 1,000 sds-\$5.35; 2,000 sds-\$6.73; 5,000 sds-\$13.21; 10,000 sds-\$22.21; 25,000 sds-\$46.78

**CABBAGE (continued)**

**DYNAMO - 7606**

5,000 S. (F-1 Hybrid). (All America Winner - 1997). 70 days. A blue-green headed variety with a small core; 4 in., 2 1/2 lb. heads. Plants hold well and resist cracking. Disease resistant.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**EARLY FLAT DUTCH - 7636**

8,000 S. 75 days. Firm, nearly round heads, a very good keeper, 7-10 lb. heads.

**EARLY JERSEY WAKEFIELD - 7635**

5,000 S. Heirloom. 62 days. Solid, pointed or conical heads. Very early and uniform strain.

- Each of the above: (31A1) 1,000 sds-\$5.35; 2,000 sds-\$6.73; 5,000 sds-\$13.21; 10,000 sds-\$22.21; 25,000 sds-\$46.78

**GOLDEN ACRE RESISTANT - 7623**

7,000 S. Heirloom. 65 days. Round head, short stem, uniform and firm. 3 lb heads.

**LATÉ FLAT DUTCH - 7641**

7,500 S. Heirloom. 100 days. A dependable variety with very large 10-12 lb. flat heads. A good keeper.

**MAMMOTH ROCK RED - 7642**

8,000 S. 100 days. Best inbred red variety.

- Each of the above: (31A1) 1,000 sds-\$5.35; 2,000 sds-\$6.73; 5,000 sds-\$13.21; 10,000 sds-\$22.21; 25,000 sds-\$46.78

**RUBY PERFECTION - 7621**

5,000 S. (F-1 Hybrid). 80 days. Solid 6-8 in., 2-3 lb., deep red heads are slow to burst.

**SAVOY KING - 7613**

3,500 S. (F-1 Hybrid). (All America Winner - 1965). 85 days. Very vigorous high yielding heads weighing between 5-6 lbs. Deep green color. Heat and disease resistant.

- Each of the above: (29C2) 250 sds-\$6.55; 500 sds-\$10.54; 1,000 sds-\$18.52; 2,000 sds-\$33.92; 5,000 sds-\$79.00

**STONEHEAD - 7617**

8,000 S. (F-1 Hybrid). (All America Winner - 1969). 50 days. Yellow resistant. About 6 in. very solid heads with a short core makes storage and spacing ideal. Slow to bolt.

- Each of the above: (29C2) 250 sds-\$6.55; 500 sds-\$10.54; 1,000 sds-\$18.52; 2,000 sds-\$33.92; 5,000 sds-\$79.00

**SWELLHEAD - 7619**

6,500 S. (F-1 Hybrid). 95 days. An excellent late hybrid. Very solid, 6 lb. heads form early, but keep growing. Excellent holding ability, long standing and yellow resistant.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**CABBAGE (CHINESE CABBAGE)**

**BLUES - 7624**

\* (F-1 Hybrid). 57 days. Extra early and slow to bolt making it an exceptional variety for areas where bolting is a problem. In those areas, spring to early summer harvest is recommended.

**PAK CHOI (JOI-CHOI) - 7607**

11,000 S. 47 days. Deliciously spicy, pure white celery-like stalks are topped by green leaves. Each plant will have 10-14 stalks 8-10 in. long. Excellent raw or cooked.

- Each of the above: (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

**CARDOON**

3,000 sds/oz

Plant seeds early in greenhouse; transplant into rows 36 x 12 in. 1 oz. for 100 ft. row. Soak seed 5-7 days before sowing.

**TENDERHEART - 7539**

750 S. (Large Smooth, Green Globe). Heirloom. Clump forming tender perennial with pinnatifid (Spiny) silver gray leaves that develop up to 20 in. long. Purple 2-3 in. flower heads will develop throughout the summer growing season.

- (C106) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$34.90

**CARROT**

18,000 sds/oz

1 oz. will plant 100 ft. row. 3-1/2 to 4 lbs. per acre. Sow as early as the ground can be worked, sow direct in rows 12-18 in. apart. Make successive plantings until August 1st. About 2-3 lbs. per acre when direct seeding. Carrot fly can be a nuisance insect. If a problem every year; grow Herb, Sage nearby to repel the insects. The brighter the orange color, the higher the level of Beta Carotene and vitamins. Breeders began developing orange carrots about 400 years ago - before that time, they were purple and considered undesirable! A study at Harvard Medical School found that Beta Carotene found in carrots, pumpkin, squash and red peppers can reduce the risk of stroke by 68%. Also known to reduce the risk of smoking related cancers, lowering the blood pressure and preventing constipation.

**CAROPAK - 7548**

35,000 S. 74 days. (Baby). This strain is commonly grown as "Baby Carrots" by the commercial growers - over 875 billion have been grown the past 3 years! Very tasty and flavorful. Harvest when young; 3-4 in. or full maturity at 7-9 in. Very high in vitamins and as a cancer fighting antioxidant.

- (C109) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$18.15

**DANVER'S HALF LONG - 7542**

19,000 S. Heirloom. 75 days. Tapering to a blunt point.

- (C108) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 2 oz.-\$21.60; 4 oz.-\$34.90

(continued on next page)

**CARROTS** (continued)

**HEALTHMASTER - 7540**

18,000 S. (F-1 Hybrid). This hybrid contains 33% more Vitamin A than other varieties on the market. Fully mature, the crown is about 3 in. in diameter with a 10 in. length and weighing about 1-1/2 lbs. each. Outstanding texture and flavor raw or cooked.

- (C107) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.45; 1 oz.-\$21.90

**NANTES SCARLET - 7550**

\* 65-74 days. Cylindrical, half long, 7 x 1.25 in. bright red-orange flesh, fine grained and nearly coreless. Fine flavor, sweet and brittle. Colors up early for baby carrots, for bunching, freezing or storage. Excellent juicer.

- (C009) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$12.55; 10,000 sds-\$22.35

**NUTRI-RED**

Crop failure. As a substitute, we suggest Healthmaster.

**SWEETNESS**

Crop failure. As a substitute, we suggest Torro.

**THUMBELINA - 7543**

28,000 S. (All America Winner - 1992). 75 days. A round sweet-gourmet carrot that is ideal for container growing. Grown under normal conditions it will grow to the size of a golf ball. Spaced to 30 plants per foot, it will harvest to the size of a small radish.

- (C175) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$18.15

**TORRO - 7549**

70 days. (F-1 Hybrid). An early Nantes type with great flavor and texture. Slow to bolt, with nice uniform roots. Tops are medium sized and strong, making harvest easy.

- (C009) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$12.55; 10,000 sds-\$22.35

**Cauliflower.**

Also see listing of Brocoverde under Vegetables.

**CAULIFLOWER**

7,000 sds/oz 70° 10 days

For the best germination, cover seeds lightly after sowing. Sow February-March. Culture is the same as for cabbage. Handle in plant bands or peat pots. Space 18-24 in. Begin using cauliflower as the heads fill out, otherwise the quality will diminish. They love fertilizer and are heavy feeders. About 1/4 oz. for 100 ft. row or 1-1/2 lbs. per acre when direct seeded.

**EARLY SNOWBALL - 7555**

6,000 S. (Burpeeana Super Snowball A.). Heirloom. 55 days. Large, 2 lb. pure white solid heads.

- (C111) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1 oz.-\$22.90; 4 oz.-\$83.90

**PURPLE HEAD - 7557**

6,000 S. Large, Broccoli-like flavored purple heads turn green when cooked. Excellent fresh, for freezing, or eaten raw with a dip.

- (RC) 1/64 oz.-\$5.35; 1/32 oz.-\$8.85; 1/16 oz.-\$13.80; 1/8 oz.-\$25.85

**CAULIFLOWER** (continued)

**SELF-BLANCHING - 7558**

8,000 S. 65 days. Pure white 3 1/2 - 4 lb. well shaped heads with a fine texture.

- (C137) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$18.90

**SNOW CROWN - 7551**

5,000 S. (F-1 Hybrid). (All America Winner - 1975). 50 days. Early and vigorous growing snowball type. Head is well rounded, very smooth pure white, weighing about 2 lbs. and of excellent quality. Ideal for fresh or frozen market use.

- (VE) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$12.40; 1,000 sds-\$18.55

**CELERY**

10,000 sds/oz 60°-65° 14-21 days

1 oz. will produce about 7,000 plants or a 150 ft. row. Sow February-March. Space rows 6 x 28 in. Days indicated are from date of planting. Soak seeds 3-5 days before sowing. After sowing, cover seeds lightly with media, needs darkness to germinate. Very high in Vitamin A which reduces arthritis pain and helps flush fat from the body.

**CELERIAC - 7564**

60,000 S. (German Root Celery). Heirloom. 100 days. A white fleshed knobby root that grows to the size of a softball. Excellent flavor, between Celery and Parsley. Used for flavoring in salads, soups, dressings, etc.

- (29C2) 250 sds-\$6.55; 500 sds-\$10.54; 1,000 sds-\$18.52; 2,000 sds-\$33.92; 5,000 sds-\$79.00

**GIANT PASCAL - 7561**

64,000 S. Heirloom. 105 days. Standard green pascal type celery. Very productive.

- (VD) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$44.65

**GOLDEN SELF-BLANCHING - 7563**

80,000 S. Heirloom. 90 days. Stocky, solid, thick stalks blanch easily. Vigorous growing with upright medium green foliage. The roots are round smooth and have good inner quality with high yields.

- Each of the above: (C215) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$43.45

**CHERVIL**

25,000 sds/oz 60° 10 days

1/2 oz. for a 100 ft. row. Germinates slowly and grows slowly until plants are 2 in. tall. Thin to about 5 in. apart.

**DOUBLE CURLED - 7568**

14,000 S. Heirloom. Gourmet type parsley with anise flavor. Great in salads.

- (C114) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$19.20; 10,000 sds-\$34.70

**Chicory.**

Also see listing of Radicchio under Vegetables.

**CHICORY**

25,000 sds/oz

1/2 oz. for a 100 ft. row. Plant as early as possible. Thin plants to 6 in. apart. About 1 lb. per acre if direct seeded.

**WITLOOF OR FRENCH ENDIVE - 7571**

20,000 S. (Frisee). Heirloom. 45 days. Easy to grow, makes an appetizing salad. Medium sized heads are extra frilly, deep hearted, self blanching with compact growth habit.

- (29B2) 250 sds-\$5.35; 500 sds-\$7.95; 1,000 sds-\$13.51; 2,000 sds-\$24.23; 5,000 sds-\$55.63

**COLLARDS**

7,000 sds/oz 70° 10-14 days

1/2 oz. for a 100 ft. row. Rows should be spaced 18 x 24 in..

**GEORGIA - 7649**

24-36 in. - 6,250 S. 70 days. Non-heading, juicy blue-green wavy leaves will stand light freezing which improves the cabbage-like flavor.

- (C116) 1 oz.-\$5.35; 2 oz.-\$8.85; 4 oz.-\$15.60

**CORN, SWEET**

125 sds/oz

Miniature Corn - for small, 3-4 in. ears used as an appetizer or in Chinese cooking - plant the seed close (4-6 in. apart) and harvest when the "silks" start to emerge. The earliest written record of corn (maize) is found in Popol Juh, the sacred book of the Quiche Indians of Guatemala and Mexico dating back to the 8th century! The first Europeans to see corn growing were the crew members of Columbus' ships exploring Cuba in 1492.

**BODACIOUS - 7687**

200 S. 75 days. Large, 8 in. ears have 18 rows of exceptionally tender yellow kernels. This is a sugar enhanced variety with exceptional sweet flavor. Outstanding variety with stress tolerance.

**IOCHIEF - 7686**

150-200 S. (All America Winner - 1951). 82 days. Drought resistant 10 in. ears with 14-18 rows of kernels. An excellent variety.

**SENECA DAWN (BICOLOR) - 7688**

200 S. (Honey-N-Pearl). 69 days. 8-8 1/2 in. ears have 14-16 rows of tender creamy yellow and white kernels with good husky coverage. Truly one of the best tasting varieties available.

**SILVER QUEEN - 7689**

170 S. 90 days. Uniform 8 in. ears with 14-16 rows of snow white kernels. Very sweet and tender. Disease resistant.

**OH-SO-SWEET - 7685**

150-200 S. 80 days. The large, 8 in. cylindrical ears have 18 rows of tender, golden yellow kernels. Very sweet, high sugar content. Easy silk removal with good husk covering. Disease resistant.

- Each of the above: (C209) 2 oz.-\$9.85; 4 oz.-\$17.70; 8 oz.-\$33.40; 1 LB.-\$59.40

**CRESS**

3,000 sds/oz

**TRUE WATER**

Sorry, no longer available.

**CUCUMBER, BURPLESS**

1,000 sds/oz 75° 5-7 days

1 oz. for 50 hills or a 150 ft. row. Sow seed in hills, thin out to 3-4 plants per hill. Space hills 1 ft. apart in rows 3 ft. apart. About 3-5 lbs. per acre when direct seeding. Plant radishes between the rows to deter the cucumber beetle. Fruits should be picked before they begin to turn yellow to avoid hollow centers. For straight fruit, grow on a trellis or fence.

**BURPLESS BUSH - 7664**

900 S. 55 days. Compact, bush habit. 10 in. dark green, firm fruit. Sweet, bitterfree fruits for those who want a compact plant without the after taste. Disease resistant.

- (C229) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$15.45; 4 oz.-\$57.60

**BURPLESS NO. 26 - 7654**

1,000 S. (F-1 Hybrid). 60 days. Tasty Green. A new variety for those who shun cucumbers as being bitter and indigestible. They should be picked and eaten like celery when they are young; no peeling since the skin is soft and tender. Stake for best results. 9 in. long and 1-1/2 in. in diameter. Suited for greenhouse culture.

- (RF) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$16.40; 500 sds-\$25.50

**ORIENT EXPRESS - 7666**

1,100 S. (F-1 Hybrid). 58 Days. Early Burpless hybrid with dark green skin. Flavor is best when harvested young; 12 in. and 1 1/2 in. in diameter. Disease resistant.

- (C13) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$12.40; 500 sds-\$20.40

**SUMMER TOP - 7680**

\* (F-1 Hybrid). This is a Japanese burpless variety that produces an abundance of uniform glossy, deep green fruit, 8 1/2 to 9 in. in length, with a diameter between 1 and 1 1/4 in. Highly resistant to both powdery mildew and downy mildew.

- (07F2) 1/32 oz.-\$5.35; 1/16 oz.-\$7.91; 1/8 oz.-\$13.43; 1/4 oz.-\$24.09; 1/2 oz.-\$44.63

**SWEET SLICE - 7655**

1,000 S. (F-1 Hybrid). 62 days. Amazingly sweet, bitterfree and burpless, this is the variety for people who cannot eat ordinary cucumbers. No need to peel the dark green skin of these beautiful 10-12 in. fruits. Ideal for the home gardener or commercial grower. Disease resistant.

- (C176) 50 sds-\$5.65; 100 sds-\$9.80; 250 sds-\$18.10; 500 sds-\$34.70

**SWEET SUCCESS - 7658**

760 S. (F-1 Hybrid). (All America Winner - 1983). 60 days. Early maturing, bitterfree and burpless type. It is not necessary to peel the medium dark green skin from the 12-14 in. fruits. The interior is crisp and white - ideal for summer salads. Disease resistant.

- (C6) 25 sds-\$6.40; 50 sds-\$11.30; 100 sds-\$21.10; 250 sds-\$51.25; 500 sds-\$99.85

**CUCUMBER, PICKLING****HOMEMADE PICKLES - 7670**

1,000 S. 55 days. Bush type. This variety was developed for the home gardener and home pickling use. A heavy producer of solid, crisp pickles. Can be harvested when 2 in. long or full maturity at 5 in. A very high yielding variety. Over an eight week period, ten plants yielded about 450 fruits or an average of 45+ fruits per plant.

- (RI) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$39.60

**PICKLING - 7675**

6 in. - 1,000 S. Heirloom. 58 days. Good medium dark green fruit 6 1/2 x 2 1/2 in. in diameter. Highly productive vigorous vine. Excellent black spined variety for home or commercial pickling. Disease resistant.

- (VI) 1/2 oz.-\$5.45; 1 oz.-\$8.85; 4 oz.-\$29.60; 1 LB.-\$108.70

**PIONEER - 7673**

1,000 S. (F-1 Hybrid). 48 days. A gynoecious, black spine, medium green pickling cucumber. Will produce an excellent quality of high yielding, uniform fruit. This variety is disease resistant and very popular in northern areas.

- (C212) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$12.40; 2,000 sds-\$21.70

**CUCUMBER, SLICING****ARMENIAN - 7663**

900-950 S. Heirloom. 60 days. Long, pale green ribbed fruits with crisp, sweet flesh. Very thin skin does not require peeling.

- (C213) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$39.60

**BURPEE HYBRID II - 7653**

1000 S. (F-1 Hybrid). 55 days. An excellent improved variety for the home garden, market grower, shipper and greenhouse culture. Fruits are dark green with white spines, 8 in. or more long and 2-1/4 in. across. A high yielding, disease resistant variety.

- (V050) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$15.30; 500 sds-\$27.40

**COOL BREEZE**

Crop failure. As a substitute, we suggest Diva.

**DIVA - 7676**

1,000 S. (F-1 Hybrid). (All America Winner - 2002). This variety can set fruit without pollination. Plants naturally produce only female flowers which increase their overall yield of large, sweet and genetically non-bitter 6-8 in. fruits. Disease resistant.

- (V050) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$15.30; 500 sds-\$27.40

**EMPARADOR - 7679**

48 in. - 850 S. (F-1 Hybrid). 55 days. Thin, smooth skin and crunchy texture. The 6 in. fruits are medium to dark green and glossy, with a slight rib and nearly spineless. Sweet in flavor, makes it great for salads and sandwiches, no need to peel.

- (P191) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$17.35; 500 sds-\$32.85; 1,000 sds-\$63.60

**CUCUMBER, SLICING (continued)****FANFARE - 7651**

1,000 S. (F-1 Hybrid). (All America Winner - 1994). 60 days. Early maturing fruits are dark green 8-9 in. long by 2-1/4 in. across. Compact plants producing top quality yields.

- (C16) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$12.40; 500 sds-\$20.40

**LEMON APPLE - 7674**

1,000 S. Heirloom. 60 days. Vigorous and productive variety that produces fruits about the size and color of a lemon. Flesh is crispy white, sweet, and burpless. Use the tops for salads or pickling. Fruits are ripe when first starting to turn yellow, but can be used green or ripe.

- (C214) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$39.60

**LONG SLICER (GOURMET) - 7657**

1,000 S. days. An excellent gourmet slicing variety. Extra long, 20 in. fruits are slender with white spines. Thick firm flesh has a special flavor.

- (TO) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$15.60; 1,000 sds-\$29.80

**MARKETMORE 76 - 7677**

1,000 S. 66 days. Dark green fruits are 8 in. long and 2 1/2 inch in diameter.

- (C231) 1/2 oz.-\$5.45; 1 oz.-\$9.40; 4 oz.-\$34.30; 1 LB.-\$124.70

**POT LUCK - 7652**

870 S. (F-1 Hybrid). 50 days. An excellent variety where space is important. Vines will spread only 18 in., producing fruits that are 6-1/2 in. to 7 in. long, straight and medium green in color. White spined and disease resistant.

**SALAD BUSH - 7650**

800-850 S. (F-1 Hybrid). (All America Winner - 1988). 57 days. Very compact growing plants, great for pots, tubs and limited space gardens (including hanging baskets and patio containers). Very productive 6-7 in. straight, dark green slicing cucumbers. Multiple disease resistant. A very heavy producing variety. Five plants will produce about ninety beautiful fruits.

- Each of the above: (C7) 25 sds-\$5.35; 50 sds-\$8.85; 100 sds-\$14.90; 250 sds-\$35.25; 500 sds-\$68.70

**SLICEMASTER - 7662**

1,000 S. (F-1 Hybrid). 55 days. Very early. Long, slim dark green slicer that is disease resistant. A high yielder of almost perfect 8 in. fruits.

- (VI) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$14.90; 1,000 sds-\$27.35

**STRAIGHT 8 - 7678**

950 S. (All America Winner - 1935). Heirloom. 58 days. Early, dark green skinned, 8 in. fruits. Disease resistant.

- (C231) 1/2 oz.-\$5.45; 1 oz.-\$9.40; 4 oz.-\$34.30; 1 LB.-\$124.70

(continued on next page)

**DILL**

*Anethum graveolens*

10,000 sds/oz 60°-65° 15 days

For the best germination, cover seeds lightly after sowing. Darkness will help germination. About 1/2 oz. for a 100 ft. row. A favorite seasoning with many uses. For over 3,000 years Dill has been used as a digestive aid. It helps relax the muscles of the digestive tract and act as an antifoaming agent in preventing the formation of intestinal gas bubbles and in controlling diarrhea.

**BOUQUET - 7885**

30 in. - 14,000 S. Early flowering selection with large seed umbels and mid to dark green foliage. Flowers are edible. Matures in 40-55 days.

- (AU) 1,000 sds-\$5.35; 5,000 sds-\$14.70; 10,000 sds-\$24.80; 25,000 sds-\$48.35

**DUKAT - 7668**

26 in. - 21,000 S. A European strain known for its compact, dwarf habit. Large, attractive flower heads are very desirable for their odoriferous flavor in cooking and pickling. Use leaves for soups, the stalks and seeds are best suited for pickling.

- (D077) 5,000 sds-\$5.35; 10,000 sds-\$8.85; 25,000 sds-\$12.36; 50,000 sds-\$22.25

**FERNLEAF - 7698**

18 in. - 18,500 S. (All America Winner - 1992). Outstanding dill flavor. Dark green, finely cut foliage.

- (D076) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$17.40; 10,000 sds-\$28.70

**HERCULES - 7886**

30 in. - 22,000 S. Tall, extremely uniform and productive plant with high leaf yield. Matures in 40-55 days.

- (31A1) 1,000 sds-\$5.35; 2,000 sds-\$6.73; 5,000 sds-\$13.21; 10,000 sds-\$22.21; 25,000 sds-\$46.78

**LONG ISLAND MAMMOTH - 7699**

30 in. - 14,000 S. A favorite seasoning with many uses. For over 3,000 years Dill has been used as a digestive aid. It helps relax the muscles of the digestive tract and act as an antifoaming agent in preventing the formation of intestinal gas bubbles and in controlling diarrhea. This herb variety is more compact growing than the standard garden variety. Annual.

- (D077) 5,000 sds-\$5.35; 10,000 sds-\$8.85; 25,000 sds-\$12.36; 50,000 sds-\$22.25

**VIERLING - 7671**

36-48 in. - 19,000 S. Mostly grown as a florsit product. Strong stems with feathery foliage and lacey, golden yellow blooms. Multi-branched plants produce an abundance of stems, easy to grow annual. For fresh or dried use.

- (D104) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$21.40; 10,000 sds-\$38.50; 25,000 sds-\$85.60

**EGGPLANT**

6,000 sds/oz 80° 14 days

Sow February-March for plant sales. Space 18 x 24 in. Requires warm house and bottom heat for the best germination. About 1/4 oz. for a 100 ft. row or 2 lbs. per acre when direct seeding. For the best taste and flavor, pick before interior seeds are fully mature.

**APPLE GREEN - 7887**

6,000 S. 62-70 days. Plants produces an good yield of oval fruits that are 5 in. in diameter with pale green skin and white flesh. Extremely mild tasting and non-acid. No need to peel!

- (E7) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$12.40; 1,000 sds-\$14.25; 2,000 sds-\$25.85

**BLACK BEAUTY - 7716**

7,000 S. Heirloom. 80 days. Excellent market type. Dark purple fruits, broad egg-shaped.

- (E030) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$39.90; 1 LB.-\$149.80

**BLACK BELL II - 7711**

4,500 S. (F-1 Hybrid). 68 days. Improved for 2009! Widely adapted variety with good production results. Superior round-oval shape and deep glossy purple color. Disease resistant.

- (25F3) 25 sds-\$5.98; 50 sds-\$9.15; 100 sds-\$14.68; 250 sds-\$32.06; 500 sds-\$58.88

**CLOUD NINE (WHITE) - 7490**

6,000 S. (F-1 Hybrid). 75 days. Pure white 7 in. fruits are 3 in. in diameter and sweet with bitter free flavor. Disease resistant.

- (E8) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$12.85; 1,000 sds-\$23.70; 5,000 sds-\$109.40

**DUSKY - 7713**

8,000 S. (F-1 Hybrid). 60 days. A very early, dark purple 8 x 3-1/2 in. variety, well suited for northern regions where seasons are short and full maturity is important. Disease resistant.

- (28B2) 100 sds-\$5.35; 200 sds-\$6.45; 500 sds-\$12.77; 1,000 sds-\$22.81; 2,000 sds-\$42.15

**FAIRY TALE - 7648**

8,000 S. (F-1 Hybrid) (All America Winner - 2005). 50 days. A petite plant with decorative, miniature fruits that are white with violet/purple stripes. The small 1-2 oz. fruits are 4-5 in. in length and sweet and non-bitter, with a tender skin and few seeds.

- (E001) 25 sds-\$5.35; 50 sds-\$8.85; 100 sds-\$15.40; 250 sds-\$28.75; 500 sds-\$52.30

**GREEN GODDESS - 7865**

5,000 S. (F-1 Hybrid). 63 days. High yielding variety (70+ fruits per plant)! The elongated 9 in. x 1 3/4 in. green fruits are mildly flavored. Disease resistant.

- (E053) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$13.30; 1,000 sds-\$23.60

**EGGPLANT (continued)**

**GRÉTEL - 7683**

36-42 in. - 8,000 S. (F-1 Hybrid). (All America Winner-2007). This petite plant with its beautiful, mini white fruit can be grown in beds or large containers. Produces many little elongated-teardrop shaped fruits. Harvest fruit when small for the most tender skin, the fewest seeds and sweetest flavor. The fruits are glossy white, have a green calyx and will set in clusters. Excellent sliced for grilling or sauteed.

**HÄNSEL - 7684**

25-36 in. - 7,800 S. (F-1 Hybrid). (All America Winner-2007). 55 days. The stunning, glossy, dark-purple fruits are borne in finger-like clusters and display a contrasting, bright-green calyx color. Great for smaller gardens. An abundance of fruit is produced so be prepared to bake, broil, stew, or grill these tender non-bitter fruits.

- Each of the above: (B017) 50 sds-\$6.70; 100 sds-\$12.40; 250 sds-\$24.80; 500 sds-\$45.85; 1,000 sds-\$87.60

**LAVENDER TOUCH - 7696**

6,000 S. (F-1 Hybrid). 60 days. A mild, sweet variety that is beautiful and productive. 6-7 oz. fruits are cylindrical-shaped and white with a lavender blush. High yielding, excellent flavor with no bitterness.

- (E027) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$12.85; 1,000 sds-\$23.70; 5,000 sds-\$109.40

**LITTLE FINGERS - 7647**

6,000 S. 65 days. Certified organic. Unique, small fruited variety producing 5-8 in. slim, deep purple fruit. Determinate habit holds fruit above ground.

**TÜRKISH ORANGE - 7888**

10,000 S. 65-85 days. A unique, brilliant 3 in. orange fruit, sweet and fragrant when freshly cut. Best eaten once fruits are tennis ball-sized or when slightly orange with green striping. Great when stuffed.

- Each of the above: (E7) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$12.40; 1,000 sds-\$14.25; 2,000 sds-\$25.85

**TWINKLE - 7693**

24 in. - 6,000 S. (F-1 Hybrid). 50-55 days. Fruit has fantastic flavor, firmness and texture. The variegated oval-round fruits are lovely combination of plum and white with a light green calyx.

- (E3) 50 sds-\$5.90; 100 sds-\$9.95; 250 sds-\$22.85; 500 sds-\$43.70; 1,000 sds-\$84.85

**TYCOON - MILLIONAIRE - 7715**

5,000 S. (F-1 Hybrid). Ichiban Improved. 59 days. A definite improvement over Ichiban with a smaller seed cavity. Shiny, medium purple fruit is shaped long (8-10 in.) and very slim (1-1/4 in.), similar to a cucumber. Adaptable for slicing, frying and baking. Heavy producer.

- (E054) 1/32 oz.-\$5.35; 1/16 oz.-\$8.85; 1/8 oz.-\$12.40; 1/4 oz.-\$15.45; 1 oz.-\$56.40

**WHITE - 7707**

8,000 S. 70 days. White 6 in. fruits that are 2-1/2 in. in diameter.

- (E052) 1/64 oz.-\$5.35; 1/32 oz.-\$8.85; 1/16 oz.-\$12.40; 1/8 oz.-\$15.90; 1/4 oz.-\$26.70

**EGGPLANT (continued)**

**VITTORIA - 7709**

4,000 S. (F-1 Hybrid). An Italian type variety producing 9 x 2-1/2 in. cylindrical fruit throughout the season on 36 in. plants.

- (E12) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$13.95; 1,000 sds-\$25.40

**ENDIVE**

**Escarole**

20,000 sds/oz 65° 14 days

1 oz. for a 100 ft. row. 2 lbs. will plant an acre with rows 18-24 in. apart. About 4 lbs. per acre when direct seeding. Tie outer leaves if you want to blanch the centers.

**BATAVIAN BIANCA SALAD - 7800**

⌘ 19,500 S. Heirloom. 40 days. The baby leaves are finely cut and fringed. Leaves are light green with a pink accent. Good growth habit under adverse weather conditions, easy blanching. Zones: 4-7

- (E044) 1/16 oz.-\$5.35; 1/8 oz.-\$8.85; 1/4 oz.-\$12.40; 1/2 oz.-\$13.85; 1 oz.-\$22.70

**BATAVIAN FULL HEART - 7890**

⌘ 14,000 S. 90 days. Large thick dark green leaves, compact head, easy blanching. Zones: 4-7

- (E009) 1/2 oz.-\$5.35; 1 oz.-\$8.85; 4 oz.-\$29.60

**KALE**

**DWARF GREEN CURLED - 7722**

8,000 S. Finely curled bluish green leaves.

- (VN) 500 sds-\$5.35; 1,000 sds-\$8.85; 2,000 sds-\$12.80; 5,000 sds-\$29.40

**RED BOR - 8199**

8,000 S. 55 days. Highly decorative with lots of crinkled purple-red leaves. Redness and curling are enhanced by cold weather.

- (G001) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$15.35; 500 sds-\$28.40

**RED RUSSIAN - 8200**

24-30 in. - 8,500 S. 45-60 days. Attractive, green-red frilly leaves that are tender, sweet and highly nutritious. Tall growth habit.

- (VN) 500 sds-\$5.35; 1,000 sds-\$8.85; 2,000 sds-\$12.80; 5,000 sds-\$29.40

**KOHLRABI**

6,000 sds/oz 70° 7 days

For the best germination, cover seeds lightly after sowing. Darkness will help germination. 1/2 oz. will plant a 100 ft. row; 3-5 lbs. an acre in 18 in. rows, when direct seeding. For the best flavor, harvest when plants are young.

**EARLY PURPLE VIENNA - 7733**

10,000 S. 55-69 days. Purple skinned bulbs with greenish white flesh. Small tops. Slightly larger and later than Early White Vienna.

**EARLY WHITE VIENNA - 7732**

8,000 S. Heirloom. 55 days. Mild creamy white flesh; when cooked has a more delicate flavor than turnips. Edible bulb grows above the ground and should be eaten when young (2-2 1/2 in. across).

- Each of the above: (RL) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$36.70

**KOHLRABI (continued)**

**GRAND DUKE - 7731**

7,000 S. (F-1 Hybrid). (All America Winner - 1979). 50-55 days. Vigorous, semi-globe in shape.

**WINNER - 7560**

5,300 S. (F-1 Hybrid). Produces large bulbs. Very flavorful.

- Each of the above: (K019) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$12.40; 1,000 sds-\$15.90

**LEEK**

10,000 sds/oz

1 oz. will plant a 100 ft. row; 2-3 lbs. an acre in rows 18 in. apart. About 3-4 lbs. per acre when direct seeding.

**BROAD SCOTCH - 7796**

7,000 S. London Flag. Heirloom. Thick, straight necks. A close relative within the Allium family, popular since ancient cultivation. A welcome addition to sauces, gravy and soups.

- (L057) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$37.60

**LETTUCE**

15,000 sds/oz 70° 7-12 days

1/2 oz. for a 100 ft. row; 3 lbs. will plant an acre with rows 6-12 in. apart. Plants are readily transplanted in plant bands. Lettuce is high in iron and magnesium. Will add tone to the liver and spleen.

**ALANIS - 7891**

\* 23,000 S. 65-70 days. This will be a new favorite for butterhead lovers everywhere. Larger head size, great flavor and texture. Exterior leaves are bright green while the interior leaves are very light green. The heavy heads are bolt tolerant and downy mildew resistant. Get out the dressing and the croutons.

- (P155) 100 sds-\$5.95; 200 sds-\$9.80; 500 sds-\$23.80; 1,000 sds-\$42.85

**BABY STAR - 7884**

4-5 in. - 24,500 S. 65 days. Romaine type. Miniature romaine type with crisp texture and dark, shiny green leaves. Holds against early bolting.

- (C104) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$12.40; 5,000 sds-\$49.60

**BIBB FORCING - 7822**

29,500 S. Heirloom. 60 days. Bibb type. Fine flavor, dark green leaves, firm and tender. Good for forcing.

- (L059) 1/2 oz.-\$5.35; 1 oz.-\$8.85; 4 oz.-\$28.60

**BLACK SEEDED SIMPSON - 7811**

25,000 S. Heirloom. An excellent variety that stands heat well.

- (RU) 1/2 oz.-\$5.35; 1 oz.-\$8.85; 4 oz.-\$27.90; 1 LB.-\$99.65

**BUTTERCRUNCH - 7825**

25,000 S. (All America Winner - 1963). 60 days. Bibb type. Quite compact, heavy butterhead; crisp, but juicy. Should replace regular Bibb. Very tender.

- (L059) 1/2 oz.-\$5.35; 1 oz.-\$8.85; 4 oz.-\$28.60

**LETTUCE (continued)**

**DEER TONGUE - 7808**

27,000 S. Heirloom. 35 days. Bibb type. Highly desirable for its baby Bibb type leaf. Tongue-shaped outer leaves, hence the heirloom name.

- (L064) 1/16 oz.-\$5.90; 1/8 oz.-\$9.85; 1/4 oz.-\$16.65; 1/2 oz.-\$29.35; 1 oz.-\$54.70

**FREEDOM**

\* Sorry, no longer available.

**GREAT LAKES - 7816**

26,000 S. (All America Winner - 1944). Heirloom. 82 days. Head/iceburg type. Large heads with crisp, well-folded and fine-flavored leaves. Very well adapted to hot and adverse conditions.

- (L078) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.90; 4 oz.-\$42.85

**MESCLUN MIXTURE - 7807**

26,000 S. (Bon Vivant Blend). 25 days. Contains only Lettuce varieties: Oak Leaf, Paris Island, Prizehead, Red Sails, Salad Bowl, and Simpson Elite. Mesclun is a French term for a mixture of tender, young red and green lettuce leaf varieties. Shake each package before sowing, to provide a balanced blend, begin harvesting in 3 weeks by trimming off the tops of the young plants.

- (L058) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$14.15; 4 oz.-\$52.65

**OAK LEAF - 7813**

31,000 S. Heirloom. 45 days. Leaf type. Early variety, tender and long standing. Deep green leaves. Heat resistant.

- (RM) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$14.90; 4 oz.-\$54.35

**PARIS ISLAND COS - 7826**

42,000 S. Heirloom. 70 days. Romaine type. Tall, compact, dark-green plant. Slightly curly leaves with creamy-white hearts. Good bolt resistance, crisp, sweet flavor and high disease resistance.

- (L078) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.90; 4 oz.-\$42.85

**PRIZEHEAD - 7814**

25,000 S. Heirloom. 55 days. Leaf type. Despite the name, it is a non-heading, leaf lettuce. The leaves are upright, deeply curled, broad, and light green with a shading of red.

- (RM) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$14.90; 4 oz.-\$54.35

**RED SAILS - 7810**

21,000 S. (All America Winner - 1985). 45 days. Leaf type. Loose-leaf type with an open head forming a full center. Crinkled leaves are a bronze-red color containing nutritional vitamins A and D.

- (L080) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$14.90; 4 oz.-\$54.35

**ROMAINE RED - 7902**

\* 34,000 S. Heirloom. 70 days. Romaine type. Often used in Caesar salads, this attractive lettuce has long, crunchy, spoon-shaped leaves with red fringes and a large vein. The tender inner leaves have a yellowish rib and surround a sweet, crispy, creamy heart.

- (31A1) 1,000 sds-\$5.35; 2,000 sds-\$6.73; 5,000 sds-\$13.21; 10,000 sds-\$22.21; 25,000 sds-\$46.78

(continued on next page)

**LETTUCE** (continued)

**ROUGE DE HIVER - 7903**

\* 35,700 S. Heirloom. 55-65 days. Romaine type. Extremely beautiful European heirloom, large flat broad leaves are sweet with a buttery texture. Commonly used as a baby leaf variety, but also makes a stunning full size head. Color varies from green to bronze to deep red. Quick growing, very heat resistant (if kept watered) and will also grow well into the cooler months. Disease resistant.

- (34A2) 5,000 sds-\$5.35; 10,000 sds-\$6.58; 25,000 sds-\$13.06; 50,000 sds-\$23.38; 100,000 sds-\$43.28

**SALAD BOWL (GREEN) - 7815**

34,000 S. (All America Winner - 1952). 50 days. Leaf type. Large, bright green leaves. Early variety, tolerant of summer heat without becoming bitter.

**SALAD BOWL RED - 7901**

\* 50 days. Leaf type. Large upright, long deep lobed bronze leaves with bronze-red inner blanched leaves. Good keeper and decorative. Slow to bolt for long harvest.

- Each of the above: (L081) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$34.85

**SILVIA - 7904**

\* 35,700 S. 25-45 days. Romaine type. Beautiful dark red burgundy cos with large flat broad leaves. Sweet taste and buttery texture. Quick growing for baby leaf, very heat resistant (if kept watered) and also grows well into the cooler months.

- (34A2) 5,000 sds-\$5.35; 10,000 sds-\$6.58; 25,000 sds-\$13.06; 50,000 sds-\$23.38; 100,000 sds-\$43.28

**SIMPSON ELITE - 7809**

33,000 S. 45 days. Leaf type. An improved Black Seeded Simpson type. Fast to grow, slow to bolt. Large, loose heads with light green leaves that have crumpled, frilled leaves. Holds its flavor without bitterness.

- (L082) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$14.90; 4 oz.-\$54.35

**MELON**

800 sds/oz 80° 10 days

**HONEY DEW - 7841**

850-900 S. 90 days. Very sweet green flesh. Fruits are 8 in. long and 6 in. across with smooth ivory skin.

- (M039) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$31.90

**SUGAR NUT - 7879**

700 S. (Canary Melon). 80 days. Very sweet. White nutty flavor growing to 2 lbs. External rind is a bright yellow often called a breakfast melon with its sweet flavorful interior.

- (vs) 1/64 oz.-\$5.35; 1/32 oz.-\$8.85; 1/16 oz.-\$12.40; 1/8 oz.-\$13.90; 1/4 oz.-\$25.80

**MUSKMELON, CANTALOUPE**

800 sds/oz 80° 10 days

1 oz. of seed will plant 50 hills; 3 lbs. per acre. Rows should be about 2 ft. apart with hills 4 ft. apart in the row. About 1/2 oz for 100 ft. row. Plant Radishes between the rows to repel Cucumber beetles. For the sweetest melons - about 2 weeks before the melons should ripen, start withholding water. This is called "water stress" and the frantic vines will pour sugar into the fruits to sustain them. A melon is ripe when the first leaf on the stem turns pale and begins to brown.

**BURPEE HYBRID - 7831**

1,000 S. (F-1 Hybrid). 82 days. The heavily netted fruits are distinctly ribbed, round to slightly oval, averaging 7 in. long, 6 in. across and weigh 4 to 4 1/2 lbs.. Flesh is deep orange, thick, firm, juicy and one of the most delicious flavor. Vines are vigorous growing and produce good early yields of large fruited melons.

**CLASSIC - 7832**

800 S. (F-1 Hybrid). (Formerly called Jewel). 80 days. An early medium sized fruit that has good firmness. Excellent flavor with deep salmon colored flesh. Good producer that is tolerant of fusarium wilt and powdery mildew. About 4-5 lbs. each.

**ECLIPSE - 7893**

\* 1,000 S. (F-1 Hybrid). 85 days. Matures early and fruit weighs in at 5-7 lbs., oval shaped and approximately 6 by 8 in. The rind has a medium net and light sutures. The flesh is dark orange, firm, sweet and smooth in texture. Great for summer breakfasts, snacks and deserts. The plant is hardy-resistant to fusarium wilt and powdery mildew.

**FASTBREAK - 7830**

1000 S. (F-1 Hybrid). 65 days. Excellent flavor and sweetness with these 3-4 lbs. ribbed, well netted fruits. Disease resistant and high yielding. Orange flesh, coarse netting.

- Each of the above: (C119) 25 sds-\$5.35; 50 sds-\$8.85; 100 sds-\$14.90; 250 sds-\$35.25; 500 sds-\$68.70

**HALE'S BEST JUMBO - 7833**

1,000 S. 85 days. Thick, salmon flesh. Oval shaped fruit, heavy netting. 3 1/2 to 5 lbs. each.

- (M038) 1/2 oz.-\$5.35; 1 oz.-\$8.85; 4 oz.-\$30.65; 1 LB.-\$124.70

**MUSTARD**

15,000 sds/oz 70° 10 days

1 oz. will plant a 200 ft. row. Space plants 6 in. apart in rows 12 in. apart. About 4 lbs. per acre.

**EARLY MIZUNA - 8212**

\* 60 days. Very prolific branching habit and cold tolerance. It vigorously produces as many as two hundred stems with serrated leaves. Mild and tasty when young, it adds a nice flavor to salads and becomes only mildly mustardy when mature making it ideal for braising or steaming. Can be harvested over a fairly long period. Slow to bolt.

- (11A1) 1/2 oz.-\$5.35; 1 oz.-\$8.04; 2 oz.-\$13.45; 4 oz.-\$22.65; 8 oz.-\$38.62

**GIANT RED - 8210**

14-18 in. - 17,000 S. 70-80 days. An attractive, flavorful and oversized mustard. Leaves are maroon in color with light green midribs and narrow stems. Slow to bolt and extremely winter hardy. Widely used as a fall ornamental variety.

- (VN) 500 sds-\$5.35; 1,000 sds-\$8.85; 2,000 sds-\$12.80; 5,000 sds-\$29.40

**GREEN WAVE (TENDERGREEN) - 7863**

12,500 S. (All America Winner - 1957). Heirloom. 42 days. Longest standing, dark green curled mustard. When mature, will stand a long time before going to seed.

- (M040) 1/2 oz.-\$5.85; 1 oz.-\$9.70; 4 oz.-\$36.35; 1 LB.-\$129.40

**Okra.**

Also see listing under Annuals.

**OKRA**

400 sds/oz 65°-70° 7-10 days

For the best germination, soak seed 5 days before sowing. 1 oz. of seed per 50 ft. row. Pick the pods when they are young and not too large. About 8 lbs. per acre. The pods will offer excellent flavor in soups, stews and other relishes. It can also be used alone as a vegetable.

**CAJUN DELIGHT - 7867**

500 S. (F -1 Hybrid). (All America Winner - 1997). 50 days. Early maturity and heavy yields distinguish this superior variety. Very tender pods a great flavor.

- (0009) 1/8 oz.-\$6.90; 1/4 oz.-\$11.85; 1/2 oz.-\$21.70; 1 oz.-\$41.45; 4 oz.-\$144.65

VEGETABLES

**ONION**

8,000 sds/oz 65°-70° 10 days

For selling onion plants in flats, seed 7-10 seeds per in. of row and 1 1/2 to 2 in. apart in row about 6 weeks before offering the plants for sale. Short day length varieties like Bermuda and Sweet Spanish have been particularly good sellers. An oz. will plant a 100 ft. row; 3-4 lbs. an acre in rows 18 in. apart. If plants start to stretch, they can be cut back for dense growth. Darkness will help germination. Many customers have inquired about the health advantages on Quercetin. Quercetin is the onion chemical that fights the formation of blood clots and may protect you from elevated levels of cholesterol. It is found in the yellow and red onions, but almost none in white onions and only in some forms of garlic. To stop the itching and stinging of a bee or mosquito bite, rub the area with an onion. Eating raw onions will help flush fat from the body and lower cholesterol. Herbalists used raw onions to treat dysentery and other hot climate diseases. George Washington ate a hot, roasted onion before he went to bed whenever he had a cold. Be kind to your eyes - place raw onions in the freezer for 30 minutes before cutting and this will eliminate tearing.

**CANDY - 7882**

7,000 S. (F-1 Hybrid). 100 days. A day neutral variety producing early maturing jumbo onions, golden-straw colored, with a sweet, mild flavor.

- (0010) 1/8 oz.-\$6.35; 1/4 oz.-\$11.20; 1/2 oz.-\$20.90; 1 oz.-\$39.90; 4 oz.-\$149.70

**EVERGREEN LONG WHITE BUNCHING - 7873**

9,500 S. Heirloom. 100 days. Long, silvery white stalks. Does not form bulbs under moist conditions.

- (1002) 1/4 oz.-\$5.35; 1/2 oz.-\$6.97; 1 oz.-\$11.62; 2 oz.-\$20.58; 4 oz.-\$37.86

**RED BURGUNDY - 7878**

8,000 S. 95 days. Red Hamburger. Smooth, glossy skin, purplish-red in color. Flesh is white with pink shading near the skin. Good keeper. Short day.

- (0019) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$39.60; 1 LB.-\$148.35

**SUPER STAR - 7870**

6,000 S. (F-1 Hybrid). (All America Winner - 2001). 100 days. This variety is a day-length neutral white onion, which means it can be grown as a spring crop anywhere in North America. Plant in the garden early for sweet 1 lb. white skinned, onions. Has good storage life.

- (0021) 1/8 oz.-\$6.40; 1/4 oz.-\$11.30; 1/2 oz.-\$20.90; 1 oz.-\$40.30; 4 oz.-\$148.70

**SWEET SPANISH, UTAH STRAIN - 7874**

9,000 S. (Yellow Sweet Spanish). 115 days. Yellow skin, 5 in. across globe-shaped, quite mild, sweet flesh. Long day, good keeper.

- (0019) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$39.60; 1 LB.-\$148.35

**ONION (continued)**

**TEXAS GRANO 1015 - 7881**

9,000 S. 168 days. Large, sweet flavored globe shaped variety with light yellow flesh. High yielding and a good keeper. Good keeper. Short day.

- (0016) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$16.65; 4 oz.-\$59.90

**VIDALIA - 7880**

8,000 S. 80 days. Very sweet with light yellow flesh and oblate in shape. High yielding variety with consistently uniform production. Short day.

- (0017) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$13.55; 1 oz.-\$25.35; 4 oz.-\$94.70

**WALLA WALLA SWEET - 7883**

6,500 S. Heirloom. 110 days. Very sweet and juicy variety. Popular with home gardeners everywhere.

- (0014) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$16.65; 4 oz.-\$59.90

**WHITE SWEET SPANISH - 7875**

7,000 S. 110 days. White skin, 5 in. across globe shaped. Quite mild, sweet white flesh. Good keeper. Bunching type.

- (0020) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$37.40

**PARSLEY**

10,000 sds/oz 75°-80° 5-10 days  
1/4 oz. for a 100 ft. row. Seed 9-10 weeks before offering plants for sale. Transplant pots 15-21 days after seeding. For the best germination if you are direct seeding, freeze seed 3-5 days and soak in warm water 3-5 days before sowing. Cover seed lightly; darkness will help germination. About 3 lbs. per acre when direct seeding. Ideal as a garnish or in soups or salads. Fresh Parsley is a breath aid and natural diuretic. Add to tea, it will relieve the pain from rheumatism. Early herbalists believed this herb to aid kidney problems, high blood pressure, fluid accumulation, and a substitute for quinine to treat malaria. It is very high in Vitamins A and C.

**DWARF CURLED**

**Green River - 7897**

15,000 S. 70 days. 12 in. Medium green, double curled type with outstanding early, uniform branching habit.

- (P103) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$34.90

**EXTRA CURLED DWARF OR**

**Moss Curled - 7899**

14,000 S. Heirloom. 70 days. 12-15 in. Finely curled, compact, dark green; very productive.

- (P104) 1,000 sds-\$5.35; 5,000 sds-\$8.85; 10,000 sds-\$12.40; 25,000 sds-\$18.90

**HAMBURG ROOTED - 7895**

19,000 S. (Arat). 90 days. Root 8-10 in. long, parsnip-like, used for flavoring. Leaves plain, deeply cut, hollow stem.

- (P101) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$12.40; 10,000 sds-\$19.80

**PARSLEY (continued)**

**PLAIN (SINGLE OR ITALIAN) - 7896**

12 in. - 13,000 S. Heirloom. 72 days. Plain, deep cut, dark green leaves with a rich strong flavor.

- (P104) 1,000 sds-\$5.35; 5,000 sds-\$8.85; 10,000 sds-\$12.40; 25,000 sds-\$18.90

**PARSNIP**

**HOLLOW CROWN**

LONG SMOOTH  
Sorry, no longer available.

**PEAS**

About 1,000 S. per lb.; 2 lbs. for a 100 ft. row. Plant in rows 20 in. apart. About 100 lbs. per acre when direct seeding.

**LITTLE MARVEL - 7922**

100-150 S. 64 days. The most satisfactory pea in the average home garden. Very productive, hardy, luscious and sugary.

- (P107) 1 oz.-\$6.40; 2 oz.-\$9.85; 4 oz.-\$17.95; 8 oz.-\$33.70; 1 LB.-\$59.40

**MR. BIG**

Crop failure. As a substitute, we suggest Oregon Sugar Pod II.

**OREGON SUGAR POD II - 7852**

24-30 in. - 110 S. Very productive Snow Pea with 3-4 in. long, 1/2 in. wide edible pods that are sweet and crispy. The shorter vines can be grown without support. Seed treated with Captan.

- (B010) 1 oz.-\$6.40; 2 oz.-\$9.85; 4 oz.-\$17.95; 8 oz.-\$33.70; 1 LB.-\$59.40

**SUGAR SNAP - 7923**

100-150 S. (All America Winner - 1979). 70 days. The entire pod can be eaten when fully mature. The pod flesh is thick and tender and filled with very sweet, delicious peas.

- (P202) 1 oz.-\$6.40; 4 oz.-\$17.95; 1 LB.-\$64.60

**Personal service is the foundation of our business.**

**All Seed orders are shipped the same day received.... most within 4 hours !**

**PEPPER, HOT**

4,000 sds/oz 75° 10-15 days

For quick germination, soak 3-4 days in water before sowing. Sow 6-7 weeks before outdoor planting. Transplant 10-15 days after seeding; germinate seed warm. Space 16 x 24 in. About 1/4 oz. for a 100 ft. row or 3 lbs. per acre if direct seeding. Tobacco users should not come in contact with seedlings to prevent Tobacco Virus. Hot peppers and the capsicum oil in hot peppers can not be neutralized by water. Wash hands or rinse mouth in vinegar to alleviate discomfort in an emergency. Bread, bananas, pasta, or potatoes will alleviate any burning sensation. Never touch your face or eyes after handling hot peppers. (Warm growing temperatures develop the hottest peppers). Hot peppers are rated by their Scoville level. (The higher the number, the hotter the Pepper). The rating we list is for normal, moderate conditions. Peppers grown under stress, high temperatures and high humidity will be 10-15 times hotter after drying. Hot or Chili Peppers will help relieve respiratory problems, prevent blood clots, help lower cholesterol, will speed up metabolism and lower the risk of heart related problems.

**ANAHEIM - 7945**

3,000 S. 77 days. Very pungent chili type. Long, tapered dark green fruits 7 in. long by 1 1/2 in. wide turning red when ripe. Popular in Chili-rielenos. 3,000 Scovilles.  
 • (30B1) 500 sds-\$7.15; 1,000 sds-\$11.92; 2,000 sds-\$20.82; 5,000 sds-\$44.43; 10,000 sds-\$77.22

**BIG BOMB - 7982**

\* 24-30 in. - 2,500 S. (F-1 Hybrid). 62-67 days. Truly the favorite among pickling cherry peppers. Produces enormous loads of thick-walled 2 x 2 in. green to brilliant-red, medium pungency fruits. The plant habit is more vigorous and making it better able to withstand a wide variety of growing conditions.  
 • (1005) 25 sds-\$6.35; 50 sds-\$11.45; 100 sds-\$18.95; 200 sds-\$34.90; 500 sds-\$75.80

**BULGARIAN CARROT - 7547**

18 in. - 70-80 days. Fruits are 3 1/2 in. long carrot shaped. Ripens from green to fluorescent orange with a fruity favor that finishes hot. Perfect for roasting, pickles, and salsas.  
 • (P27) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$13.30; 1,000 sds-\$23.60

**CARIBBEAN RED - 7947**

7,500 S. (F-1 Hybrid). 100 days. VERY HOT, about twice the heat of Habanero! Fruits are 1 1/2 x 1 in. and mature to a bright red. Excellent in salsas, chutneys, marinades and sauces. 450,000 Scovilles.  
 • (29B2) 250 sds-\$5.35; 500 sds-\$7.95; 1,000 sds-\$13.51; 2,000 sds-\$24.23; 5,000 sds-\$55.63

**CAYENNE (LONG SLIM RED) - 7952**

4,500 S. Heirloom. 70 days. For pickles, canning or drying. Long skin, 6 x 1/2 in. green fruits turning red when mature. 5,000 Scovilles.  
 • (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**PEPPER (continued)**

**CHICHIMECA - 7985**

28-32 in. - (F-1 Hybrid). 60-63 days. Produces large 4 x 1.75 in. fruits in an early, concentrated set. Grows very well in cooler growing conditions. Excellent in salsa, salads, vegetable dishes and making hot pickles. This giant Jalapeno will impress the neighbors. Disease resistant. 5,000-6,000 Scovilles.  
 • (25E2) 25 sds-\$6.47; 50 sds-\$10.39; 100 sds-\$18.23; 250 sds-\$41.19; 500 sds-\$77.63

**CHILE DE ARBOL - 7905**

\* 7,250 S. 80 days. Narrow, curved chiles that start out green and mature to bright red. Very hot and resembles a little Cayenne pepper. Be careful during preparation, these are the ones that are dried after turning red and used in many holiday wreaths. 15,000-30,000 Scovilles.  
 • (P179) 250 sds-\$5.35; 500 sds-\$8.95; 1,000 sds-\$16.25; 2,000 sds-\$29.80; 5,000 sds-\$62.60

**CONCHOS - 7939**

4,000 S. 70 days. Jalapeno type. 1 oz. fruits are larger and earlier than Jalapeno. Good producer. 2,000 Scovilles.  
 • (P232) 50 sds-\$6.90; 100 sds-\$12.25; 200 sds-\$22.85; 500 sds-\$49.70; 1,000 sds-\$89.60

**FRESNO CHILE - 7908**

\* 4,500 S. 75-80 days. Produces good yields of 3 in. long by 1 1/4 in. wide hot peppers. Fruits turn from green to red when mature. Excellent for roasting, pickling, or for making salsa. Tobacco Mosaic resistant. 5,000-10,000 Scovilles.  
 • (P179) 250 sds-\$5.35; 500 sds-\$8.95; 1,000 sds-\$16.25; 2,000 sds-\$29.80; 5,000 sds-\$62.60

**HABANERO - 7984**

7,000 S. 90-100 days. Extremely pungent fruit is excellent for sauce production and blending. The wrinkled fruit taper to a point and measure 2 in. by 1 in. The thin flesh is light green to orange-pink at full maturity. 200,000-350,000 Scovilles.  
 • (29B2) 250 sds-\$5.35; 500 sds-\$7.95; 1,000 sds-\$13.51; 2,000 sds-\$24.23; 5,000 sds-\$55.63

**HOLY MOLE - 7993**

\* 24-36 in. - 2,500 S. (F-1 Hybrid). (All America Winner-2007). 85 days. The fruits measure 7-9 in. in length and 1 1/2 in. in width, and mature from green to a dark chocolate brown color. This pepper has a distinct taste, but not an overly spicy one. Can be sliced and placed on top of pizza or included in an enchilada casserole or mixed with your favorite Chipotle chicken dish. Mature brown peppers can be dried and ground for later use. 700 Scovilles.  
 • (P32) 50 sds-\$5.90; 100 sds-\$9.95; 250 sds-\$22.85; 500 sds-\$43.70

**HUNGARIAN YELLOW WAX HOT - 7956**

4,500 S. (Hungarian Hot Banana). Heirloom. Tapering 6 in. x 1 1/2 in. long fruit is yellow, turning red when mature. 4,000 Scovilles.  
 • (30B1) 500 sds-\$7.15; 1,000 sds-\$11.92; 2,000 sds-\$20.82; 5,000 sds-\$44.43; 10,000 sds-\$77.22

**PEPPER (continued)**

**INFERNO - 7944**

4,500 S. (F-1 Hybrid). 60 days. A heavy yielding, moderately hot banana pepper. Large 1 1/2 in. x 8 in. fruits are ultra smooth with medium thick flesh and outstanding flavor. The fruits will mature from yellow to red. 12,000 Scovilles.  
 • (P2) 50 sds-\$6.85; 100 sds-\$11.30; 250 sds-\$25.45; 500 sds-\$45.20; 1,000 sds-\$81.35

**IXTAPA - 7917**

\* 24 in. - 3,500 S. (F-1 Hybrid). 75-80 days. Jumbo size, disease resistance and productivity, a nearly perfect Jalapeno. Large fruit of 3-4 x 1 1/2 in. mature from green to red, taper to a point and are thick walled. Great in salsa, cut into rings for nachos and stuffed for a sizzling appetizer. Not for the faint at heart, be sure to serve with a cold drink. 5,000 Scovilles.  
 • (P230) 50 sds-\$6.85; 100 sds-\$12.95; 250 sds-\$28.85; 500 sds-\$54.70

**JALAPA - 7960**

4,000 S. (F-1 Hybrid). 65 days. An improved Jalapeno with compact, vigorous growth. A heavy producer of 2 1/2 x 1 in. hot tapered green fruit turning red at maturity. 4,000 Scovilles.  
 • (P4) 50 sds-\$5.90; 100 sds-\$9.85; 250 sds-\$21.90; 500 sds-\$41.85; 1,000 sds-\$79.65

**JALAPENO - 7961**

3,000 S. 72 days. Dark green tapered fruit 3 x 1 in., turning red. Good for picking or fresh market. 3,500 Scovilles.  
 • (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**KUNG PAO - 7913**

4,000 S. 85 days. The 30 in. tall plants are covered with 4-5 inch green and red peppers that are only 3/8 inch wide. Very popular with stir-fry and Asian cooking. A hot pepper that can be eaten by some in seasoned dishes. 10,000 Scovilles.  
 • (P5) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$13.60; 500 sds-\$25.40; 1,000 sds-\$48.90

**LARGE RED CHERRY HOT - 7964**

5,000 S. Heirloom. 75 days. Fruits are nearly round, 1 to 1 1/4 in. in diameter. Very productive. 2,000 Scovilles.  
 • (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**MUCHO NACHO - 7958**

3,000 S. (F-1 Hybrid). 68 days. A larger version of Jalapeno that develops to 4 in. long. Fatter, thicker, and hotter than the standard Jalapeno. Dark green, turning to red when ripe. Disease resistant. The red fruits are often smoked over mesquite wood. Once dried and smoked, they are called "Chips o' the Chiles".  
 • (P230) 50 sds-\$6.85; 100 sds-\$12.95; 250 sds-\$28.85; 500 sds-\$54.70

**PEPPER (continued)**

**PORTUGAL - 7906**

\* 1,000 S. 64 days. This vigorous, upright plant supports a large number of 6-7 in. long, thin, wrinkled fruits that are dark green and ripen to a brilliant, glossy red. 5,000 Scovilles.

- (P4) 50 sds-\$5.90; 100 sds-\$9.85; 250 sds-\$21.90; 500 sds-\$41.85; 1,000 sds-\$79.65

**SAHUARO - 7983**

\* 30 in. - 3,100 S. (F-1 Hybrid). 68 days. An impressive yield and big fruit size of up to 9 in. A thick wall makes it perfect for roasting and slicing. 500 Scovilles.

- (P233) 50 sds-\$6.90; 100 sds-\$13.25; 250 sds-\$26.50; 500 sds-\$49.85; 1,000 sds-\$89.70

**SCOTCHBONNET ORANGE - 7907**

\* 75-100 days. Flaming-hot orange variety extremely hotter than habanero! Great for adding heat to salsas, sauces, chili and any Mexican or Caribbean dish. Pickle it if you dare, but not for the faint of heart. Rounded 2 in. fruit ripens from green to orange. 200,000- 350,000 Scovilles.

- (P4) 50 sds-\$5.90; 100 sds-\$9.85; 250 sds-\$21.90; 500 sds-\$41.85; 1,000 sds-\$79.65

**SERRANO CHILI HOT - 7977**

6,000 S. (Red Chili Hot). Heirloom. 75 days. Very pungent fruit, 2 1/4 in. long and 1/2 in. in diameter. Slim, club shaped green peppers with medium thin walls maturing to a bright red color on 30 in. tall plants. 30,000 Scovilles.

- (N) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$12.40; 10,000 sds-\$18.25

**SUPER CHILI - 7937**

5,000 S. (F-1 Hybrid). (All America Winner - 1988). 75 days. A hybrid producing 2 1/2 in. x 1 1/2 in. cone shaped, elongated green fruit, turning red at full maturity. Semi-compact habit, well branched, heavy producer of very hot fruits. 80,000 Scovilles.

- (P35) 50 sds-\$5.90; 100 sds-\$10.75; 250 sds-\$21.50; 500 sds-\$39.70; 1,000 sds-\$75.60

**TABASCO G - 7915**

6,500 S. 76 days. A high yielding, very hot and pungent flavored 2 in. long peppers that develop from green to yellow when fully mature. 50,000 Scovilles.

- (P179) 250 sds-\$5.35; 500 sds-\$8.95; 1,000 sds-\$16.25; 2,000 sds-\$29.80; 5,000 sds-\$62.60

**THAI HOT - 7988**

6,500 S. 70 days. Very hot. Small, slim dark green peppers that are about 1 in. long. When mature, they will ripen to a bright red and are very hot. A heavy producer of fruits. 35,000 Scovilles.

- (28B1) 100 sds-\$5.98; 200 sds-\$9.67; 500 sds-\$20.18; 1,000 sds-\$34.78; 2,000 sds-\$60.11

**PEPPER, MILD**

*Please refer to cultural information at the beginning of the Pepper section.*

**GARDEN SALSA - 7934**

3,500 S. (F-1 Hybrid). 73 days. Beautifully shaped fruits are 8 in. long by 1 inch in diameter. Skin is smooth with medium thick walls and tapers to a point. Green fruit will turn red at full maturity. Ideal for making homemade salsa, not quite as hot as Jalapeno with a pungency rating of medium.

- (P16) 50 sds-\$6.90; 100 sds-\$12.25; 250 sds-\$22.85; 500 sds-\$49.70; 1,000 sds-\$89.60

**JALAPENO TAM MILD - 7909**

\* 4,700 S. 67-73 days. The gringo pepper, very tasty mild Jalapeno type, with the same delicious flavor, but a lot less heat. Freezes and cans well, good for pickling, prolific producer, excellent yields and can be eaten raw, roasted or pickled.

- (N) 1,000 sds-\$5.35; 2,000 sds-\$8.85; 5,000 sds-\$12.40; 10,000 sds-\$18.25

**JOE E PARKER - 7910**

\* 3,500 S. 65-80 days. Produces heavy yields of 7 in. long by 1 1/2 in. wide fruits which turns from green to red when mature. A Southwest favorite for stuffing (chile rellenos), grilling and roasting. The flesh is thick and crisp with a delicious mild heat and richly satisfying chile flavor. 1,500-3,000 Scovilles.

- (30B2) 500 sds-\$5.35; 1,000 sds-\$7.76; 2,000 sds-\$13.15; 5,000 sds-\$28.93; 10,000 sds-\$53.98

**MARIACHI - 7978**

3,000 S. (F-1 Hybrid). (All America Winner - 2006). 65 days. Improved cone-shaped, 3-4 in. fruit ideally suited for gardens and patio gardens. A palatable pepper that is not too hot to eat raw. 500-600 Scovilles.

- (B008) 25 sds-\$5.75; 50 sds-\$9.50; 100 sds-\$18.65; 250 sds-\$29.90; 500 sds-\$54.55

**POBLANO - 7974**

3,500 S. 75 days. Slightly hot, with a sweet flavor. Dark green 6 in. x 3 in. fruits mature to a chocolate-green color. Thick walled fruits are ideal for fresh use, stuffing, roasted and used in rellenos or dried as an ancho. 3,000 Scovilles.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**PEPPER, SWEET**

*Please refer to cultural information at the beginning of the Pepper section.*

**BARON - 7995**

\* (F-1 Hybrid). 70-72 days. An early-main season bell with excellent red quality that works well for fresh market or processing. The smooth, blocky, thick-walled fruits are medium large and mature from green to red. Resistant to Tobamo Po.

- (25D3) 25 sds-\$5.35; 50 sds-\$6.95; 100 sds-\$10.78; 250 sds-\$22.81; 500 sds-\$41.38

**PEPPER (continued)**

**BELL BOY - 7933**

3,500 S. (F-1 Hybrid). (All America Winner - 1967). 70 days. 4 1/2 x 3 1/2 inch. Fruits are uniformly thick walled, 4 lobed deep glossy green. An early, heavy yielding variety that is disease and virus resistant.

- (P7) 50 sds-\$5.65; 100 sds-\$9.35; 250 sds-\$20.90; 500 sds-\$37.40

**BELL CAPTAIN - 7969**

4,000 S. (F-1 Hybrid). 70 days. The large, well-shaped 4 lobed; 4 1/2 x 3 3/4 in. green peppers mature to a bright red. Disease resistant.

- (P28) 50 sds-\$6.45; 100 sds-\$10.65; 250 sds-\$23.95; 500 sds-\$42.60

**BETTER BELLE - 7927**

4,000 S. (F-1 Hybrid). 65 days. Very blocky, thick walled 4 1/2 in. x 3 1/2 in. four-lobed green fruits turning red when ripe. Heavy producer, disease resistant.

- (P22) 50 sds-\$6.85; 100 sds-\$11.30; 250 sds-\$25.45; 500 sds-\$45.20

**BIG BERTHA - 7942**

3,000 S. (F-1 Hybrid). 70 days. The largest pepper on the market. Fruits are deep green with thick flesh. It is not unusual for fruits to reach 8 to 10 in. long and 4 in. across. Great for salads and stuffing.

- (P17) 50 sds-\$6.90; 100 sds-\$12.25; 250 sds-\$22.85; 500 sds-\$49.70; 1,000 sds-\$89.60

**BIG RED - 7918**

\* 4,000 S. 75 days. Produces high yields of large, 3-4 lobed, very sweet fruits. Fruits turn from green to red when mature. Excellent for salads and stuffing.

- (29B2) 250 sds-\$5.35; 500 sds-\$7.95; 1,000 sds-\$13.51; 2,000 sds-\$24.23; 5,000 sds-\$55.63

**BLUSHING BEAUTY - 7926**

3,000 S. (F-1 Hybrid). (All America Winner - 2000). 70 days. The blocky 4 in. x 4 in. four lobed peppers are sweet and thick walled. Fruits change from very light yellow or ivory to blush red and bright red when fully ripe. Disease resistant.

- (P3) 50 sds-\$6.90; 100 sds-\$13.25; 250 sds-\$26.50; 500 sds-\$49.85; 1,000 sds-\$94.75

**BOUNTY - 7936**

4,000 S. (F-1 Hybrid). 65-70 days. A hybrid version of a Sweet Banana type. Very early, fruit are typically 9-10 in. long and 2 in. wide. Yellow to bright red.

- (P23) 50 sds-\$6.85; 100 sds-\$11.30; 250 sds-\$25.45; 500 sds-\$45.20

**CALIFORNIA WONDER 300 - 7916**

4,000 S. 73-75 days. Similar to Early California Wonder, slightly larger and more uniform fruit, 4-3/4 in x 4 in. Fruit is are mostly 4-lobed, from green to red. Tomato Mosaic resistance.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

(continued on next page)

**PEPPER (continued)**

**CARMEN - 7989**

4,000 S. (F-1 Hybrid). (All America Winner - 2006). 75 days. Tapered 6 in. fruit is noticeably sweet in comparison to other in its class. Early, horn-style fruits turn red at maturity.

- (25D3) 25 sds-\$5.35; 50 sds-\$6.95; 100 sds-\$10.78; 250 sds-\$22.81; 500 sds-\$41.38

**CHOCOLATE BEAUTY - 7949**

4,000 S. (F-1 Hybrid). 70 days. Dark green skin ripens to a dark brown. Sweet, non-pungent fruits are 4 in. x 3 1/2 in. across. An interesting novelty to add color to your salads and cooking. Disease resistant.

- (P24) 50 sds-\$6.85; 100 sds-\$11.30; 250 sds-\$25.45; 500 sds-\$45.20

**CUBANELLE - 7953**

4,500 S. Heirloom. 68 days. Larger, smoother frying type. Improvement over Italianelle. Fruit 6 in. x 2 in. and is tapered, pointed and somewhat roughened with a bright yellow-green color and a delicious pungent flavor.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**FAT 'N SASSY - 7948**

3,500 S. (F-1 Hybrid). 65 days. A heavy yielding 4 1/2 x 4 1/2 in. mostly 4-lobed fruits. Bright green fruits maturing to red.

- (P25) 50 sds-\$6.85; 100 sds-\$11.30; 250 sds-\$25.45; 500 sds-\$45.20

**FLEXUM - 7994**

\* 24 in. - 3,000 S. (F-1 Hybrid). 65 days. Unique, as the fruit sit upright on a compact plant. Matures from ivory to red over the course of the growing season. The very sweet fruit measures 2-3 in. across the shoulder and 6-7 in. in length.

- (C133) 25 sds-\$8.80; 50 sds-\$13.95; 100 sds-\$24.90; 250 sds-\$47.65; 500 sds-\$87.35

**FRIARELLO (MELROSE) - 7981**

5,000 S. Melrose-type pepper. Ideally suited as a frying pepper with long fruits and thin skin.

- (P179) 250 sds-\$5.35; 500 sds-\$8.95; 1,000 sds-\$16.25; 2,000 sds-\$29.80; 5,000 sds-\$62.60

**GIANT MARCONI - 7912**

30 in. - 5,000 S. (F-1 Hybrid). (All America Winner - 2001). 72 days. Bred in Italy, an early, heavy yielding variety that produces 6-8 in. green fruits that mature to a bright red. About 3 in. wide at the top, 3 lobed. A thin skinned variety that can be used in salads, roasted on the grill, or pan fried with tomatoes and egg plant. A heavy yielding hybrid of the Melrose type with all America honors. Disease resistant.

- (P234) 50 sds-\$5.90; 100 sds-\$9.75; 250 sds-\$21.95; 500 sds-\$38.70; 1,000 sds-\$69.45

**PEPPER (continued)**

**GOLDEN CALIFORNIA WONDER - 7954**

4,000 S. Heirloom. 70 days. Same as California Wonder except peppers are bright gold, changing to orange-red when mature.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**GOLDEN SUMMER - 7928**

4,000 S. (F-1 Hybrid). 67 days. Early, 4 lobed 4 in. x 3 in. blocky fruits ripen from lime-green to a bright golden yellow. Disease resistant.

- (P18) 50 sds-\$6.90; 100 sds-\$12.25; 250 sds-\$22.85; 500 sds-\$49.70; 1,000 sds-\$89.60

**GYPSY - 7943**

4,000 S. (F-1 Hybrid). (All America Winner - 1981). 60 days. Very early, heavy producer. Fruits 5 x 3 in. long and are mostly 3-lobed with a pendant wedge shape. In the early stages, fruits are a yellowish-green color turning to orange-red when ripe. Compact growing variety that is disease and virus resistant. This variety is the leader in early, high yields. On an average, each plant will produce 35-38 fruits.

- (P8) 50 sds-\$6.85; 100 sds-\$11.30; 250 sds-\$25.45; 500 sds-\$45.20

**HUNGARIAN SWEET BANANA - 7955**

4,000 S. (All America Winner - 1941). (Sweet Banana). Heirloom. 68 days. Tapering 6 in. x 1 1/2 in. long fruit is yellow, turning red when mature.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**IVORY - 7963**

4,000 S. 65 days. A rich, creamy white blocky variety that matures to a bright yellow. Nice 3-4 in. lobed fruits are 4 1/2 x 3 1/2 in.

- (B008) 25 sds-\$5.75; 50 sds-\$9.50; 100 sds-\$18.65; 250 sds-\$29.90; 500 sds-\$54.55

**KEYSTONE RESISTANT GIANT - 7962**

4,000 S. 80 days. Produces large 4 1/2 in. x 4 in., heavy fruit of blocky shape. Thick flesh with deep green color that turns red when mature.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**LADY BELL - 7920**

4,500 S. (F-1 Hybrid). 71 days. Rich green, 3-4 lobed 4 x 3 1/2 in. green peppers maturing to a bright red. Disease resistant.

- (P34) 50 sds-\$8.55; 100 sds-\$15.45; 250 sds-\$32.80; 500 sds-\$59.60; 1,000 sds-\$99.65

**LILAC - 7965**

4,500 S. 65 days. Unique lavender colored fruits mature to a bright crimson. Nice 3-4 lobed fruits are 4 1/2 x 3 1/2 in. 1/4 oz. is about 1,000 Seeds.

- (I005) 25 sds-\$6.35; 50 sds-\$11.45; 100 sds-\$18.95; 200 sds-\$34.90; 500 sds-\$75.80

**PEPPER (continued)**

**MINI BELLE SERIES**

24 in. - 3,000 S. 65 days. Plants will produce an abundance of 1 1/4 x 1 1/4 in. miniature fruits. They are sweet, gorgeous and delicious! Fits nicely into small garden space or patio planters, making it just right for the home gardener. Excellent for gourmet dishes, stuffing and salads. Disease resistant.

**Chocolate - 7990**

Green to chocolate-brown.

**NORTH STAR - 7932**

4,000 S. (F-1 Hybrid). 70 days. Early, 3-4 lobed 4 in. x 4 in. uniform fruits. Plants will set fruit under the most adverse conditions. Glossy green fruits will ripen to a bright red. Disease resistant.

- (P19) 50 sds-\$5.65; 100 sds-\$9.35; 250 sds-\$20.90; 500 sds-\$37.40

**PEPPERONCINI - 7972**

5,000 S. (Italian Peppercini). 65 days. For picking, canning, or salads. Tapered green fruit is 4 in. long and 3/4 in. wide. Very useful in the early stages, but will turn bright red when mature.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**PIMENTO ELITE - 7925**

3,000 S. (F-1 Hybrid). 72 days. A heavy producer of sweet, oval to heart-shaped fruit 3 in. x 3 1/2 in. with thick fleshy walls. Green, turning red when ripe. Disease resistant.

- (P20) 50 sds-\$5.65; 100 sds-\$9.35; 250 sds-\$20.90; 500 sds-\$37.40

**PIMENTO PERFECTION - 7976**

4,000 S. Heirloom. 73 days. Standard sweet variety for home and market. Heart-shaped, smooth fruit 3 1/2 x 2 1/2 in.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**PRITAVIT - 7979**

\* 28 in. - 2,250 S. (F-1 Hybrid). 75-80 days. Fruits have a deep ribbing and flattened shape. Mature full red fruit can average 2.5 by 4 in. The crisp flesh becomes deliciously sweet as it matures from green to an intense red color. Known as a Topepo type, common in Italy and other parts of Europe.

- (C133) 25 sds-\$8.80; 50 sds-\$13.95; 100 sds-\$24.90; 250 sds-\$47.65; 500 sds-\$87.35

**PURPLE BEAUTY - 7975**

4,000 S. 70 days. A truly PURPLE pepper. The 4 in. x 3 1/2 in. blocky fruits have thick flesh and is highly productive. An interesting novelty to add color to your salads and cooking.

- (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

**PEPPER (continued)****RED BEAUTY - 7931**

4,000 S. (F-1 Hybrid). 68 days. An early, high yielding, 4 x 3 1/2 in. thick walled, 4-lobed variety. Matures from a green-bell quickly to a bright red. Disease resistant.

- (P21) 50 sds-\$5.65; 100 sds-\$9.35;  
250 sds-\$20.90; 500 sds-\$37.40

**ROUMANIAN SWEET - 7967**

4,000 S. Heirloom. 50 days. Smooth, pale yellow fruits are 4 in. long, tapering to 2 in. at the tip, maturing to a bright red when ripe. Although called sweet, this variety does have a slight bite and is considered mild/hot by some. Ideal for frying.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51;  
2,000 sds-\$12.46; 5,000 sds-\$25.57;  
10,000 sds-\$43.79

**SPANISH SPICE - 7940**

4,500 S. (F-1 Hybrid). 65 days. Non-pungent variety - not hot or sweet, but spicy. Dark green fruits are about 7 in. long by 1 3/4 in. across and thin walled for quick frying and grilling. Dark green fruits turn red when mature.

- (P6) 50 sds-\$6.90; 100 sds-\$12.25;  
250 sds-\$22.85; 500 sds-\$49.70;  
1,000 sds-\$89.60

**SUPER HEAVYWEIGHT - 7971**

26-28 in. - 7,000 S. (F-1 Hybrid). 75 days. Unusually large size measuring 5 in. x 6 in. long. Beautiful, thick walled fruit is 4-lobed and ripens from jade green to a bright yellow gold. Very flavorful. Disease resistant.

- (P26) 50 sds-\$6.85; 100 sds-\$11.30;  
250 sds-\$25.45; 500 sds-\$45.20

**SWEET CHERRY - 7986**

4,000 S. 75 days. Smooth skin and thick-meat. Sweet flesh, shaped like cherries but of good size. Nice for salads, canning or pickling; can be used in the green stage or in the ripe stage which is red.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51;  
2,000 sds-\$12.46; 5,000 sds-\$25.57;  
10,000 sds-\$43.79

**VALENCIA (ORANGE) - 7919**

3,000 S. 70 days. 4 1/2 in. x 3 1/2 in. blazing orange fruits. An early, heavy yielding variety. Disease resistant.

- (G5) 50 sds-\$7.35; 100 sds-\$12.90;  
250 sds-\$23.25; 500 sds-\$41.10

**YOLO WONDER - 7987**

3,500 S. 70 days. 4 lobed, thick walled variety. Dark green 4 in x 4 in. fruit maturing to bright red. An excellent variety. Disease resistant.

- (30B1) 500 sds-\$7.15; 1,000 sds-\$11.92;  
2,000 sds-\$20.82; 5,000 sds-\$44.43;  
10,000 sds-\$77.22

**PUMPKIN**

110 sds/oz 75° 7 days  
1 oz. for about 15 hills; 3-5 lbs. per acre.

**BIG MAX - 8000**

\* 100 S. 110-120 days. Largest pumpkin for faces or novelty its the choice of professional contestants. Nearly round, 17-18 inches in diameter the fruits weigh an average of 100 lbs. Slightly rough, red-orange skin, bright yellowish 3-4 in. thick flesh. To achieve maximum size, grow one pumpkin per vine, water and fertilize regularly. Excellent for canning or pies.

- (28B2) 100 sds-\$5.35; 200 sds-\$6.45;  
500 sds-\$12.77; 1,000 sds-\$22.81;  
2,000 sds-\$42.15

**BIG MOON**

Sorry, no longer available.

**BUMPKIN - 8003**

\* 300 S. (F-1 Hybrid). 85 days. A cutsie for small ornamental markets, but also has excellent edible qualities. Fruits are 2-3 in. and weigh about 1/4 lb. with dark orange color and strong dark green handles. Semi bush habit.

- (25A1) 25 sds-\$5.35; 50 sds-\$6.46;  
100 sds-\$10.47; 250 sds-\$21.08;  
500 sds-\$35.83

**CONNECTICUT FIELD - 8013**

210 S. Heirloom. 110 days. Large Yellow. Orange-yellow flesh. Flat on ends, smooth, hard rind. Each will weigh 18 lbs. and more.

- (P240) 1/2 oz.-\$5.35; 1 oz.-\$8.85;  
4 oz.-\$29.70; 1 LB.-\$108.40

**FIRST PRIZE - 8002**

\* 90 S. (F-1 Hybrid). 120 days. The size of this pumpkin will range from 50 lbs. to a whopping 150 lbs. with color superior to Atlantic types. This will be a great addition for those who want the biggest and best.

- (25D2) 25 sds-\$5.66; 50 sds-\$8.86;  
100 sds-\$15.28; 250 sds-\$34.06;  
500 sds-\$63.88

**HOOLIGAN - 8001**

\* 500 S. (F-1 Hybrid). 95 days. Bicolored jack be little hybrid with orange and white mottled colors. Fruit weighs a 1/4 lb. Slice off the top, scoop out the seeds, replace the top and microwave for 4 minutes to enjoy its delicious flavor.

- (26A1) 50 sds-\$5.35; 100 sds-\$8.29;  
250 sds-\$16.93; 500 sds-\$28.92;  
1,000 sds-\$49.72

**HOWDEN - 8010**

190 S. 115 days. A beautiful, heavy yielding pumpkin with uniform deep-round shape and a rich orange color. Fruits weigh 20-30 lbs. each.

- (P238) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85;  
1 oz.-\$12.40; 4 oz.-\$31.95

**JACK O LANTERN - 8020**

\* 185 S. 75-115 days. All around great pumpkin for carving. Oblong fruits weigh 10-18 lbs. Smooth medium-orange skin with shallow ribs. Sweet fine grained pale orange flesh makes this also good for cooking.

- (28A1) 100 sds-\$5.35; 200 sds-\$6.91;  
500 sds-\$13.65; 1,000 sds-\$23.00;  
2,000 sds-\$39.25

**PUMPKIN (continued)****JARRAHDAL - 8009**

150 S. 100 days. Medium to large, avg. 6-10 lbs. Drum-shaped fruit with heavy, rounded ribs and slate-gray skin. Medium-sweet, thick orange flesh. Long storage and very decorative for fall displays and food use.

**LUMINA - 8007**

100 S. 95 days. Large and white. Excellent for both carving and painting. Fruits average 12-16 lbs. and shapes can vary from near globular to deeply oblate. Blue patches may appear on fruit under some growing conditions. Bright orange flesh. Stores well.

- Each of the above: (P239) 50 sds-\$6.45;  
100 sds-\$11.40; 250 sds-\$21.30;  
500 sds-\$36.85

**MINI TREAT - 8004**

280 S. 70 days. Compact plant is perfect for smaller gardens or close planting in larger spaces. Fruit is set around the crown of the plant instead of spreading out on the vines. The little fruits all weigh about 1 lb. A true jack-o-lantern shape and dark orange color, with a sturdy green handle. Seeds are hull-less, good for roasting. Great for carving, but is also beautiful piled into a basket or hollowed out and used as a fall soup or desert bowl.

- (P026) 50 sds-\$5.85; 100 sds-\$10.20;  
250 sds-\$18.90; 500 sds-\$34.65

**MINI WHITE (BABY BOO) - 8016**

400 S. 95 days. Miniature variety, grows like Tiny or Jack Be Little. Immature fruits retain the best pure white color and best results are obtained when planted 2-4 weeks later than normal planting dates. A real novelty.

- (08D2) 1/16 oz.-\$5.35; 1/8 oz.-\$7.43;  
1/4 oz.-\$12.51; 1/2 oz.-\$22.31;  
1 oz.-\$41.19

**MONTANA JACK - 8022**

\* 150 S. 90 days. A really nice medium pumpkin, bred to mature quickly in northern climates. 8-15 lbs., medium orange with numerous tiny bursts of yellow all over. Sturdy green stem makes is great for carving.

- (26A1) 50 sds-\$5.35; 100 sds-\$8.29;  
250 sds-\$16.93; 500 sds-\$28.92;  
1,000 sds-\$49.72

**ORANGE SMOOTHIE - 8005**

180 S. (F-1 Hybrid). (All America Winner - 2002). 90 days. Fruits weigh 5-8 lbs., great orange color with almost perfect shape and only slight ribbing. Semi determinate, compact habit. Disease resistant.

- (P018) 50 sds-\$5.85; 100 sds-\$10.20;  
250 sds-\$18.90; 500 sds-\$34.65

**SMALL SUGAR PIE - 8014**

240 S. Heirloom. 100 days. Rich orange flesh. Rounded, slightly ribbed, about 7 in. in diameter.

- (P241) 1/2 oz.-\$5.35; 1 oz.-\$8.85;  
4 oz.-\$28.55; 1 LB.-\$99.80

(continued on next page)

**PUMPKIN** (continued)

**SNACK JACK - 8018**

200 S. (F-1 Hybrid). 95 days. A high yielding variety that is jam-packed full of edible, hull-less seeds. Fruits are 2-2 1/2 lbs. each, beautiful orange skin with light ribbing and compact, semi-bush habit. Outstanding novelty producing naked seeds for roasting and snacking.

- (P006) 50 sds-\$6.45; 100 sds-\$11.40; 250 sds-\$21.30; 500 sds-\$40.60

**SORCERER - 8008**

850 S. 95 days. (All America Winner). A high-yielding medium sized beauty. Deep orange, very round weighing between 15-25 lbs. and anchored by a large, firmly rooted handle. Ribbing is heavy.

- (25D2) 25 sds-\$5.66; 50 sds-\$8.86; 100 sds-\$15.28; 250 sds-\$34.06; 500 sds-\$63.88

**SPIRIT - 8012**

200 S. (F-1 Hybrid). (All America Winner - 1977). 90 days. Early, well shaped 12 lb. pumpkins. Semi-bush habit with only a 5 ft. spread. An excellent carving pumpkin that keeps well.

- (P239) 50 sds-\$6.45; 100 sds-\$11.40; 250 sds-\$21.30; 500 sds-\$36.85

**SPOOKIE - 8017**

\* 222 S. 90-110 days. A cross between Sugar Pie and Jack O Lantern these fruits are 6-10 lbs. and have a smooth, hard, red-orange skin color. Excellent quality, fine textured, sweet, thick, yellow-orange flesh that is great for pies. Also good for painting or carving.

- (26A1) 50 sds-\$5.35; 100 sds-\$8.29; 250 sds-\$16.93; 500 sds-\$28.92; 1,000 sds-\$49.72

**TINY - 8015**

420 S. 90 days. This variety is truly an edible pumpkin and is about 2 in. high and 3 in across, which can easily fit into the palm of your hand. Each vine will produce about 6-8 fruits.

- (P114) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$13.45; 1 oz.-\$24.80; 4 oz.-\$96.75

**RADICCHIO**

24,000 sds/oz 70° 7-10 days

**RED (RED CHICORY) - 8019**

17,000 S. 90 days. This is the Chioggia type; 8 oz., rounded heads, burgundy red color with white veins. A very healthy vegetable, aids digestion and is a tonic for the liver and blood. Use in salads, boil, grill or sauteed.

- (R009) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$38.40

**RADISH**

2,000 sds/oz 70° 7-10 days

1 oz. for a 100 ft. row. Plant rows 12 in. apart and space 2 in. apart in the rows. About 10-15 lbs. per acre. Will help repel insects and bean beetles from the garden. Very high in Iron and Magnesium and will help flush fat and impurities from the body.

**CHERRY BELLE - 8021**

3,000 S. (All America Winner - 1949). 23 days. Excellent variety for bunching or packaging, widely grown for greenhouse and frame forcing or outdoor use.

- (VO) 1/2 oz.-\$5.35; 1 oz.-\$8.85; 4 oz.-\$29.85; 1 LB.-\$109.70

**EARLY SCARLET GLOBE (MED. TOP)**

Crop failure. As a substitute, we suggest Cherry Belle.

**RHUBARB**

1150 sds/oz 65°-70° 21 days

CAUTION: LEAVES ARE TOXIC, DO NOT USE OR INGEST.

**VICTORIA - 8026**

18-24 in. - 2,000 S. Stalks are crimson-red with inner green shading.

- (R021) 1/4 oz.-\$5.60; 1/2 oz.-\$8.85; 1 oz.-\$14.80; 4 oz.-\$49.65; 1 LB.-\$168.40

**SPINACH**

70° 10 days

Sow early or late as it does not do well when day length is long. 1 oz. for a 75 ft. row. Ideal for canning or freezing.

**BLOOMSDALE LONG STANDING - 8082**

2,000 S. (Savoy). 48 days. A heavy yielder of glossy, dark green crinkled leaves.

- (S092) 1 oz.-\$5.35; 4 oz.-\$11.25; 1 LB.-\$37.60

**CORRENTA**

4,000 S. (F-1 Hybrid). 45 days. A smooth leaved variety with thick, very dark green leaves. High nutritional value. Heat tolerant and disease resistant.

Crop failure. As a substitute, we suggest Bloomsdale Long Standing.

**TATSOI - 8211**

\* Compact, with low growth and glossy, dark green leaves. Makes attractive borders, mass plantings provide rich color and texture. Harvest entire plant or a few leaves at a time. Mustard-flavored leaves are packed with nutrients. When quickly braised with garlic in oil, it softens into a tapestry of sweet leaves and tender stems that are hard to beat. Great baby item in salads, stir-fry or as a garnish. Once you've discovered its charms, your garden will never be without it.

- (S148) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$13.65; 4 oz.-\$49.80; 1 LB.-\$176.40

**SQUASH**

120-200 sds/oz 75° 7 days

Plant radishes and potatoes between the rows to deter insects and beetles. 1 oz. for 25 hills, 4 ft. apart in the row. 3-4 lbs. per acre. About 1 oz. for 100 ft. row.

**BUTTERCUP - 8062**

150-200 S. 90 days. Winter squash. Fruit 4 1/2 x 6 1/2 in. thin skin, dark green with narrow gray stripes or mottlings, orange flesh. The smoothest, best flavored squash yet produced, 3-4 lbs. each.

**BUTTERNUT - 8063**

300-350 S. (Waltham). 95 days. Winter squash. Spreads like butter without any sign of stringiness when baked. Skin is dull yellow. Good keeper.

- Each of the above: (S175) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$13.15; 4 oz.-\$47.90; 1 LB.-\$169.40

**CANESI - 8043**

(F-1 Hybrid). 80 days. An early-maturing large butternut type that produces fruits of excellent quality. Fruits are large with wide necks, weighing about 6 lbs. and measure about 10-12 in. in length. The seed cavity is small so you get more flesh per fruit. The interior is bright yellow and has a firm texture and sweet flavor. The exterior is smooth and tan.

- (S2) 100 sds-\$7.35; 200 sds-\$12.15; 500 sds-\$29.40; 1,000 sds-\$52.95

**CORNELL'S BUSH DELICATA - 8076**

360 S. (All America Winner - 2002). (Sweet Potato Squash). The fruits are a typical delicate shape; cylindrical, about 8 in. long by 4 in. diameter and have green striping over a white background. Very flavorful, sweet and smooth with a nutty flavor and compact bush spreading habit, only about 3 feet. 70 days.

- (VP) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$13.15; 1 oz.-\$24.55; 4 oz.-\$84.65

**DELICATA - 8085**

480 S. (Sweet Potato Squash). 100 days. An oblong shaped cream colored winter variety 7-9 in. long and 3 in. in diameter with dark green stripes and flecking. Very sweet orange flesh on short vines producing 5-7 fruits weighing 1 1/2 - 2 lbs. each. Outstanding flavor with good storage capabilities.

- (S176) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$33.90; 1 LB.-\$118.70

**EARLY BUTTERNUT - 8051**

300 S. (F-1 Hybrid). (All America Winner - 1979). 85 days. Winter Squash. A smooth fruited winter variety with semi-bush habit and moderate vine spreading. Very productive, heavy yielding, with excellent flavor.

- (S160) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$14.15; 1 oz.-\$26.55; 4 oz.-\$97.40

VEGETABLES

**TODAY... with over 78 years of experience, our greatest asset is still Quality and Service**

**SQUASH (continued)**

**HUBBARD - 8067**

120 S. Heirloom. 110 days. (Blue Hubbard, New England Hubbard). An improved strain producing larger fruits. This high yielding strain produces hard, blue-green squash for good storage.

- (S161) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$35.65

**PAGODA GOLD - 8049**

500 S. (F-1 Hybrid). 42 days. Summer golden scallop Squash. High yielding, early maturity, meaty flavorful fruits that are best when harvested 5 inches across or less. Outstanding baked, boiled, or fried. Semi bush habit. Disease resistant.

- (S12) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$13.15; 1 oz.-\$24.55

**PAPAYA PEAR (PAPAYA GOLD) - 8052**

200 S. (F-1 Hybrid). (All America Winner - 2003). 40 days. The first summer squash with the shape similar to a tropical papaya fruit. The semi-bush plant with bright yellow 6 oz. fruits are 3 in. x 2-3 in. wide. Summer squash.

- (S189) 1/8 oz.-\$5.45; 1/4 oz.-\$9.80; 1/2 oz.-\$17.65; 1 oz.-\$33.55

**PETER PAN - 8050**

250-300 S. (F-1 Hybrid). (All America Winner - 1982). 50 days. A very early, heavy producing bush scallop squash with a pale green tint to the fruit. Flesh is very tender.

- (25C2) 25 sds-\$5.35; 50 sds-\$7.34; 100 sds-\$12.33; 200 sds-\$26.94; 500 sds-\$50.13

**PROLIFIC STRAIGHTNECK - 8066**

300 S. (All America Winner - 1938). Heirloom. 55 days. Summer squash. Bush habit. Fruit 14 x 3 in., straight, lemon-yellow, slightly rough.

- (VR) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$13.15; 4 oz.-\$47.90; 8 oz.-\$89.70

**SPAGHETTI - 8042**

180 S. 95 days. Medium sized oblong fruits can be stored for many months in a cool dry place.

- (S164) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$35.65

**SWEET DUMPLING - 8092**

450 S. 100 days. Small, 4-5 in. diameter, round shaped fruits. Skin is ivory with dark green stripes. Very sweet, orange flesh. Each plant will produce 8-10 fruits.

- (W002) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$13.90; 4 oz.-\$46.70

**SWEET MAMA - 8096**

240 S. (F-1 Hybrid). (All America Winner - 1979). 85 days. Big yield of Buttercup-type fruits with dark green skin, 2-3 lbs. each. Flavorful, thick yellow flesh. Semi-vining habit.

- (S027) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$13.20; 1 oz.-\$23.10; 2 oz.-\$43.85

**TABLE ACE - 8047**

300 S. (F-1 Hybrid). 70 days. Winter squash. An improved acorn type with semi-bush habit. Fruits are 4-6 in., dark green, flesh is bright orange, thick and textured.

- (S165) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$22.55; 4 oz.-\$79.65

**SQUASH (continued)**

**TABLE QUEEN (OR ACORN) - 8064**

300 S. (All America Winner - 1939). Heirloom. 80 days. Winter squash. Fruit 5 x 4 in., thick, deeply ribbed, dark green skin and thick orange flesh that cooks dry and sweet. Good keeper.

- (S177) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$43.60; 1 LB.-\$149.80

**TIVOLI - 8048**

24 in. - 210 S. (F-1 Hybrid). (All America Winner - 1991). 100 days. A spaghetti squash variety with dwarf, bush habit. 24 in. tall plants will provide 3-4 lb. of light yellow, oblong fruits.

- (VU) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$21.80; 4 oz.-\$79.55

**YELLOW CROOKNECK - 8090**

350 S. (F-1 Hybrid). 43 days. Glossy, butter-yellow 5-6 in. fully crookneck fruits with upright, open bush habit. Outstanding variety.

- (S181) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$21.80; 4 oz.-\$79.55

**SQUASH, ZUCCHINI**

**ARISTOCRAT - 8041**

150 S. (F-1 Hybrid). (All America Winner - 1973). 50 days. Baby Zucchini. Dark green, smooth skin, 7 in. High yielder.

- (S165) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$22.55; 4 oz.-\$79.65

**BLACK BEAUTY - 8068**

200 S. (All America Winner - 1957). Heirloom. 60 days. Bush type plant with fruits that are long and straight. Fruits should be harvested when 7-9 in. long while young and tender. Not being an F-1 Hybrid, do not compare productivity with other hybrids listed.

- (S178) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$43.45; 1 LB.-\$159.40

**COCOZELLE - 8089**

230 S. (Italian Zucchini). Heirloom. 45 days. A bush type plant with long, cylindrical 12-15 in. dark green fruits with light green stripes, maturing to yellow. Very firm, greenish-white flesh.

- (S179) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$35.65

**CUCUZZI - 8095**

150-200 S. (Italian Zucchini). Heirloom. 100 days. Trailing (or vine) habit producing fruits 5 inches in diameter and 40-48 inches long when fully mature. Fruits have a light grey-green skin with white flesh. Popular Italian squash, a favorite in soups, stews and Italian cooking.

- (S180) 1/4 oz.-\$6.95; 1/2 oz.-\$12.15; 1 oz.-\$22.55; 4 oz.-\$84.50

**EIGHT BALL - 8086**

220 S. (F-1 Hybrid). (All America Winner - 1999). 35 days. Speckled, shiny dark green round baseball-sized zucchini fruit. Uniform in habit, vigorous growing, bush-type plants.

- (S165) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$22.55; 4 oz.-\$79.65

**SQUASH (continued)**

**GOLD RUSH - 8054**

250 S. (F-1 Hybrid). (All America Winner - 1980). 52 days. Deep golden color on zucchini type fruit contrasting with the rich green stem. Fruits are 8 in. long, smooth and very uniform. A heavy producer of superior quality fruit with excellent flavor.

- (S171) 1/8 oz.-\$5.85; 1/4 oz.-\$9.90; 1/2 oz.-\$17.95; 1 oz.-\$34.70; 4 oz.-\$129.70

**GOLDBAR - 8087**

400 S. (F-1 Hybrid). 43 days. Golden yellow, 6 in. long straightneck zucchini fruits on compact, semi-bush type plants.

- (S24) 1/8 oz.-\$5.85; 1/4 oz.-\$9.90; 1/2 oz.-\$17.90; 1 oz.-\$34.70; 4 oz.-\$129.70

**ITALIANO LARGO - 8098**

180 S. (F-1 Hybrid). 59 days. A summer squash often referred to as Romanesco or Striata. Fruits are long and normally harvested when 12-16 in. length, but are somewhat thicker on the blossom end. The skin is thin with alternating light and dark green stripes. A delicacy in Europe with its great flavor.

- (S032) 1/4 oz.-\$6.95; 1/2 oz.-\$12.15; 1 oz.-\$22.55; 2 oz.-\$42.75

**SCALLOPINI - 8055**

350 S. (F-1 Hybrid). (All America Winner - 1977). 50 days. This summer variety has been cross bred from a zucchini and a scallop squash. Compact, bush plants with early bright green fruit that is tender and sweet. The fruit can be eaten raw, in salads, fried or boiled.

- (S165) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$22.55; 4 oz.-\$79.65

**SUNGREEN - 8053**

160 S. (F-1 Hybrid). 54 days. Small, compact bush type with high yields of straight, dark green glossy fruits. This variety exhibits intermediate resistance to viral diseases.

- (C033) 1/8 oz.-\$5.35; 1/4 oz.-\$8.85; 1/2 oz.-\$12.40; 1 oz.-\$22.55; 4 oz.-\$79.65

**Strawberry.**

Also see listing under Annuals and Perennials.

**STRAWBERRY**

60,000 sds/oz 60°-62° 20 days

Strawberries are healthy for you, they will lower the risk of cancer; producing Lycopene, a cancer fighting anti-oxidant. Also will help flush fat from body cells. Sow seed about 6-10 weeks prior to sale. After sowing, cover seeds lightly with media. Maintain good moisture and 65° soil temperature. (Poor germination will result above 72°). Normal germination period is 14-25 days.

**BERRI BASKET (PELLETED) - 8093PE**

20,000 S. (F-1 Hybrid). Early, everbearing variety with compact, bushy plants creating bushy hanging baskets. Easy to grow, attractive creamy-white flowers above the deep green, shiny leaves. Will produce large, deep red full flavored berries until frost. (Use 3 plants per 10 in. basket).

- (S19) 25 sds-\$14.65; 50 sds-\$24.70; 100 sds-\$43.70; 250 sds-\$79.45; 500 sds-\$131.35

(continued on next page)

**STRAWBERRY (continued)**

**BERRIES GALORE (PELLETED) - 8094PE**  
 26,000 S. (F-1 Hybrid). A runner-producing, ever-bearing variety that will yield large, tasty fruits until frost. Large, early blooms with deep green shiny leaves. Ideal for sales in tubs, baskets, beds, planters and window boxes.  
 • (S108) 25 sds-\$14.65; 50 sds-\$24.70; 100 sds-\$43.70; 250 sds-\$79.45; 500 sds-\$131.35

**FRESCA - 8099**  
 57,500 S. 60 days. A very early, everbearing variety that produces medium sized fruit of outstanding quality and flavor.  
 • (S095) 100 sds-\$10.20; 200 sds-\$18.35; 500 sds-\$38.25; 1,000 sds-\$69.70

**SWISS CHARD**  
 8,000 sds/oz 75° 8 days  
 1 oz. for a 50 ft. row.

**BRIGHT LIGHTS - 8075**  
 20 in. - 1,000 S. (All America Winner - 1998). Maturity is 28 days for baby salad leaves or 55 days for mature bunching sized leaves. An attractive multicolored swiss chard with various colored stems including gold, pink, red, and white. Outstanding in a salad or for bunching.  
 • (S090) 100 sds-\$5.60; 200 sds-\$10.20; 500 sds-\$19.85; 1,000 sds-\$34.65

**GOLDEN SUNRISE - 8221**  
 1,500 S. 75 days. Deep golden stalks, midribs and veins. Shiny leaves are rich medium green and lightly crumpled.  
 • (VQ) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$12.80; 2,000 sds-\$19.85

**LUCULLUS - 8077**  
 20 in. - 1,250 S. Heirloom. 52 days. Most popular type; yellowish-green leaves, heavily crumpled. Wide with broad white ribs.  
 • (S091) 1/2 oz.-\$5.80; 1 oz.-\$8.85; 4 oz.-\$30.95; 1 LB.-\$111.40

**RHUBARB RED - 8220**  
 18-24 in. - 1,500 S. 70 days. Dark green leaves with brilliant red stalks and veins.  
 • (VQ) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$12.80; 2,000 sds-\$19.85

**TOMATO**  
 7,000-9,000 sds/oz 75°-80° 7-14 days  
 Sow seed 6-8 weeks before time to plant out. Transplant 14-21 days after seeding. For best germination, cover seeds lightly after sowing. About 1/4 oz for a 100 ft row or 2 lbs per acre if direct seeded. If White Fly is a problem, plant Marigolds and Herb, Basil nearby to help repel the insects. Tobacco users should not come in contact with seedlings to prevent tobacco virus. Planting Radishes, Rue, and Pennyroyal will repel many insects.

Days indicated after each variety are from when plants are set out in the garden to ripe fruit. Indeterminate habit will require staking. Determinate habit may sometimes require caging.

Lycopene is a carotenoid that is abundant in Tomatoes and makes them red. It is a strong antioxidant and is helpful in preventing cancer. Processed and cooked tomatoes in sauces are more easily absorbed than raw tomatoes.

Increase your yields and fruit size by 2-4 oz. by growing on stakes or cages.

For your selection of disease resistant varieties, we have indicated after the variety the strength of the disease resistance: V = Verticillium resistant; F = Fusarium resistant; N = Nematode resistant; T = Tobacco Mosaic resistant, A = Alternaria Resistant.

**APPLAUSE - 8399**  
 11,400 S. (F-1 Hybrid). 66 days. Earliest of the large fruited tomatoes on the market. Produces big, 8-12 oz. fruits. Each globe shaped fruit is picture perfect with smooth shoulders and a small blossom scar. Exceptional yield potential. Great for small gardens or close planting. Disease resistant. Determinate habit.  
 • (T3) 25 sds-\$8.30; 50 sds-\$13.65; 100 sds-\$23.95; 250 sds-\$43.90; 500 sds-\$84.35

**ARKANSAS TRAVELER - 8413**  
 10,000 S. Heirloom. 80 days. A heavy yielding variety that will produce 6-8 oz. pink fruits through stressful hot weather. Outstanding flavor. Indeterminate stake habit.  
 • (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**BEEFMASTER VFN - 8534**  
 13,000 S. (F-1 Hybrid). 80 days. Very large, deep red, oblate shaped fruit in the 2 lb. range. Multiple disease resistance; beefsteak type, but tolerant of cracking and splitting. Indeterminate stake habit.

**BETTER BOY VFN - 8533**  
 9,000 S. (F-1 Hybrid). 70 days. An indeterminate variety that will produce fruit in the 1 lb. range throughout the season. Deep red, globe shaped fruits, with a red meaty interior. Excellent for the market and home gardener. Indeterminate stake habit.  
 • Each of the above: (T042) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$20.25; 500 sds-\$35.60; 1,000 sds-\$67.65

**TOMATO (continued)**  
**BIG BEEF - 8532**  
 6,000 S. (F-1 Hybrid). (All America Winner - 1994). 73 days. Very large and early deep red oblate to globe shaped 12 oz. Beefsteak type fruits. High yielding with excellent meaty flavor. Disease resistant. Indeterminate stake habit.  
 • (T005) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$20.05; 500 sds-\$35.60; 1,000 sds-\$67.65

**BIG BITE - 8524**  
 10,000 S. (F-1 Hybrid). 75 days. Large, beefsteak-type smooth skinned variety. Bright red, 16 oz. fruits with great flavor. Disease resistant. Indeterminate stake habit.  
 • (T023) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$14.20; 500 sds-\$26.35; 1,000 sds-\$46.20

**BLACK KRIM - 8424**  
 \* 10,000 S. 69-90 days. A most unusual novelty. 8-12 oz. fruits are flattened, globe shaped, dark, deep red (almost a shiny black) with heavy green shoulders. Interior is a deep, reddish-green color. Sweet with a slight saltiness that enhances the taste, very juicy. Matures extremely early. Indeterminate stake habit.

**BOX CAR WILLIE - 8409**  
 11,500 S. Heirloom. 80 days. A heavy yielding variety producing 8-10 oz. smooth red fruits of excellent flavor. Indeterminate stake habit.

**BRANDYWINE PINK - 8411**  
 9,000 S. Heirloom. 90 days. Potato-leaf foliage. Very large, reddish-pink fruits averaging 16-24 oz. each. Flavor is exceptional and of gourmet quality. Indeterminate stake habit.

**BRANDYWINE RED - 8425**  
 \* 8,330 S. 80-100 days. Large, deep scarlet-red fruits. Excellent flavor. Fruits can weigh up to 2 lbs. Indeterminate stake habit.

**BRANDYWINE YELLOW - 8401**  
 11,000 S. Heirloom. 90 days. Potato-leaf foliage. Very large, 16-24 oz. yellow fruits of exceptional quality and gourmet flavor. Indeterminate stake habit.  
 • Each of the above: (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

**BURPEE BIG BOY - 8513**  
 9,000 S. (F-1 Hybrid). 80 days. Large 14-16 oz. bright red fruits. Very productive. The most popular hybrid tomato. Indeterminate stake habit.  
 • (T042) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$20.25; 500 sds-\$35.60; 1,000 sds-\$67.65

**BURPEE DELICIOUS - 8414**  
 12,500 S. Heirloom. 77 days. Very large fruit, many 2 lbs. or more. An excellent variety of good quality and flavor. Indeterminate stake habit.  
 • (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**TOMATO (continued)**

**BURPEE SUPERSTEAK VFN - 8516**

8,500 S. (F-1 Hybrid). 80 days. Large, smooth beefsteak type fruits. Very high yielding variety producing attractive flat-round shaped, full-flavored 1-2 lbs. Disease resistant. Indeterminate stake habit.

- (T042) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$20.25; 500 sds-\$35.60; 1,000 sds-\$67.65

**BUSH CELEBRITY - 8405**

15 in. - 7,000 S. (F-1 Hybrid). 65 days. An outstanding large and glossy bright red variety with 8 oz. fruits. A perfect variety to grow with its bush. Disease resistant. Determinate bush habit.

- (T045) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$17.40; 500 sds-\$32.80; 1,000 sds-\$59.75

**BUSH EARLY GIRL - 8561**

16,000 S. (F-1 Hybrid). 63 days. High yielding sister of the traditional Early Girl; but with determinate bush habit. Bright red fruit, 6-8 oz. fruits. Disease resistant. Determinate bush habit.

- (T21) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$16.45; 500 sds-\$28.35; 1,000 sds-\$48.70

**CAPAYA - 8420**

\* 24-30 in. - 5,000 S. (F-1 Hybrid). 70 days. Fruits ar 6-8 oz. and firm enough to hold well whether quartered, chopped or sliced. Smooth texture and mild flavor that make it perfect for all kinds. Clusters of smooth red, slightly heart-shaped fruit that store well after harvest. Disease resistant. Determinate habit.

- (C154) 25 sds-\$8.30; 50 sds-\$13.65; 100 sds-\$23.95; 250 sds-\$43.90; 500 sds-\$84.35

**CASPIAN PINK - 8410**

11,000 S. Heirloom. 80 days. This variety was re-discovered after the cold war ended. Fruits are large, kind of flat, pink in color and have the best flavor! Fruits will average 10 ozs. with non-potato leaf foliage. Garden writers voted this the best tasting variety. Indeterminate stake habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**CELEBRITY VFNT - 8563**

6,500 S. (F-1 Hybrid). (All America Winner - 1984). 70 days. Large, 8 oz. deep red fruit that is firm and very flavorful. Multiple disease resistant. Determinate bush habit.

- (T045) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$17.40; 500 sds-\$32.80; 1,000 sds-\$59.75

**CHAMPION VFNT - 8568**

7,000 S. (F-1 Hybrid). 65 days. A high yielding variety producing excellent 10 oz. fruits. Disease resistance. Indeterminate stake habit. Improved for 2009!

- (T15) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$16.45; 500 sds-\$28.35; 1,000 sds-\$48.70

**TOMATO (continued)**

**CHEROKEE PURPLE - 8418**

11,000 S. Heirloom. 72 days. An unusual tomato with medium-large, flattened globe fruits that are dusky pink with darker pink/purple shoulders. The multicolor interior is purplish/pinkish/brownish. Relatively short, indeterminate vines. Indeterminate stake habit.

- (29B1) 250 sds-\$7.31; 500 sds-\$12.24; 1,000 sds-\$21.42; 2,000 sds-\$37.02; 5,000 sds-\$79.61

**CLUSTER GRANDE - 8548**

8,000 S. (F-1 Hybrid). 63 days. Fruits are larger than traditional cluster tomatoes, about 5 oz. each. Intense brilliant red color, fine taste, high yielding and uniform ripening. Disease resistant. Indeterminate stake habit.

- (T4) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$20.25; 500 sds-\$35.60; 1,000 sds-\$67.65

**CRIMSON CUSHION (BEEFSTEAK) - 8422**

13,000 S. Heirloom. 90 days. A large wilt resistant variety. Fruits are large, 12-14 oz. round, bright scarlet; solid, very prolific. Indeterminate stake habit.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**EARLY GIRL II - 8565**

10,000 S. (F-1 Hybrid). 52 days. Very early, 4-6 oz. tasty fruit throughout the summer. Disease resistance. Indeterminate stake habit.

- (T20) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$14.20; 500 sds-\$26.35; 1,000 sds-\$46.20

**FIRST LADIES - 8435**

6,300 S. (F-1 Hybrid). 68 days. One of the best early maturing varieties with consistent high yield potential under difficult growing conditions. Fruits turn from deep green to an appealing bright red. Globe shaped fruits weighs 5 to 7 ounces. Resistant to tomato mosaic disease. Indeterminate stake habit.

- (T22) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$19.90; 500 sds-\$35.60; 1,000 sds-\$67.65

**GERMAN JOHNSON - 8423**

12,000 S. Heirloom. 85 days. Large, low acid reddish pink fruits. Tall plants with potato-leaf foliage. The Tomato - Johnson was named after Robert Gibbon Johnson. He was declared a hero in 1820 by eating a tomato in public in New Jersey. He attempted to greatly encourage the public acceptance of the Fruit as not being toxic or poisonous. Indeterminate stake habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**GLAMOUR - 8426**

8,500 S. 74 days. Red 6 oz. fruit, almost globe-shaped, solid and crack resistant. Indeterminate stake habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**TOMATO (continued)**

**GLORY - 8417**

8,000 S. (F-1 Hybrid). 75 days. 12 oz. fruits are oblate with soft, sweet, meaty flesh. The best of both worlds: more vigor and higher yields than heirloom types, with a flavor reminiscent of Red Brandywine. Indeterminate stake habit.

- (T4) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$20.25; 500 sds-\$35.60; 1,000 sds-\$67.65

**GOLDEN GIRL - 8398**

13,300 S. (F-1 Hybrid). 69 days. The mildest tomato ever! Golden-orange, smooth, deep oblate fruits average 7-8 oz. A wonderful balance of acids and sugars that can't be beat. Plants are vigorous and produce large quantities. Strong disease resistance. Determinate habit.

- (T042) 50 sds-\$5.35; 100 sds-\$8.90; 250 sds-\$20.25; 500 sds-\$35.60; 1,000 sds-\$67.65

**GRANNY SMITH - 8406**

10,500 S. (F-1 Hybrid). 72 days. Green fruits will ripen with plenty of flavor without ever turning red! Large, 8-10 oz., solid flesh fruits with long shelf life. They develop good sugars and acid and taste better than any green tomato you have ever tasted. Disease resistant. Indeterminate stake habit.

- (28E2) 100 sds-\$6.91; 200 sds-\$11.21; 500 sds-\$24.27; 1,000 sds-\$45.04; 2,000 sds-\$85.05

**GREEN ZEBRA - 8427**

\* 12,500 S. 78-90 days. This is the most unusual variety you will ever grow. Fully ripened fruits are bright green, with stripes of a still lighter green. Round, smallish, 2-4 oz. fruits have an excellent real tomato flavor. Determinate habit.

- (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

**HEALTH KICK - 8536**

7,000 S. (F-1 Hybrid). 72 days. Bright red, 4 oz. plum-shaped fruits are delicious. A high yielding determinate saladette variety containing an extra 50% of high concentration of Lycopene, the antioxidant that may help to prevent certain types of cancer in the respiratory, digestive and prostate. Disease resistant. Determinate bush habit.

- (T11) 50 sds-\$6.75; 100 sds-\$11.15; 250 sds-\$25.10; 500 sds-\$44.60

**HEARTLAND VFN - 8588**

10,000 S. (F-1 Hybrid). 80 days. An excellent performer, ideal for small, space conscious gardening. Dwarf, compact plants producing red 6-8 oz. excellent flavored fruits. Disease resistant. Indeterminate stake habit.

- (T048) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$14.90; 500 sds-\$27.65; 1,000 sds-\$48.40

**HEINZ VF - 8431**

12,500 S. 75 days. Early, bright red, crack resistant fruit. Heavy yielder with fusarium and verticillium disease resistance. Determinate bush habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

(continued on next page)

**TOMATO (continued)****HILLBILLY - 8428**

\* 10,000 S. Heirloom. 85 days. Huge, mild flavored, beefsteak type fruits weigh 1-2 lbs. each, and are colored most unusual orange-yellow, streaked and mottled in shades of red and pink. Indeterminate stake habit.

- (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

**HOMESTEAD - 8430**

12,500 S. 80 days. 8 oz. red fruits that are consistently uniform. Determinate bush habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**HUSKY SERIES RED - 8547**

8,000-9,000 S. (F-1 Hybrid). 68 days. Medium sized 5-7 oz. fruits with outstanding appearance and flavor. A different type of compact plant habit called dwarf indeterminate with attractive dark green foliage that requires no pruning. Well suited for container growing and will set fruit throughout the entire growing season. Heavy yielding and disease resistant.

- (T045) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$17.40; 500 sds-\$32.80; 1,000 sds-\$59.75

**JETSETTER VFN - 8512**

8,000 S. (F-1 Hybrid). 64 days. Very early 8-10 oz., deep red oblate shaped fruits with outstanding flavor. Compare to Jet Star and you will see the difference. A high yielding variety with great flavor. Disease resistant. Indeterminate stake habit.

- (V057) 50 sds-\$6.40; 100 sds-\$10.95; 250 sds-\$25.85; 500 sds-\$49.75; 1,000 sds-\$97.40

**JUBILEE - 8434**

9,000 S. (All America Winner - 1943). Heirloom. 80 days. Orange, 8 oz., non-acid, solid, smooth, sweet. Indeterminate stake habit.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**KEEPSAKE - 8529**

8,000 S. (F-1 Hybrid). 70 days. Heavy yielding variety producing 7-8 ounce fruits. A unique variety with long shelf life and great taste. When pickled ripe, the variety will keep at room temperature for up to 6 weeks. Multiple disease resistant. Determinate bush habit.

- (V057) 50 sds-\$6.40; 100 sds-\$10.95; 250 sds-\$25.85; 500 sds-\$49.75; 1,000 sds-\$97.40

**KELLOGG'S BREAKFAST - 8429**

\* 10,000 S. Heirloom. 80-85 days. Lovely, pale-orange fruits that are solid and meaty throughout, packed with mild, superb tasting flesh. A long season producer of large, beefsteak type fruits, up to 1 lb. with solid centers that have just a few seeds at the edges. Very desirable. Indeterminate stake habit.

- (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

**TOMATO (continued)****LA ROMA II VF - 8541**

13,500 S. (F-1 Hybrid). 69 days. This improved variety offers higher yields of larger, tastier fruit on stronger plants. Vigorous, uniform plants bear an abundance of 4-7 oz. fruits. Determinate bush habit.

- (C066) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$14.20; 500 sds-\$26.35; 1,000 sds-\$46.20

**LEMON BOY - 8540**

12,000 S. (F-1 Hybrid). 72 days. The first really true yellow variety, not golden. A heavy producer of 7-8 oz. fruits that are very tasty and mild. Indeterminate stake habit.

- (T034) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$16.45; 500 sds-\$28.35; 1,000 sds-\$48.70

**MARGHERITA - 8433**

\* 24-30 - 7,800 S. (F-1 Hybrid). 70-75 days. The fruit are an elongated saladette shape with deep red color and thin skin. Cylindrical fruits ripen uniformly and weigh 5-6 oz. They can be eaten fresh, but really should be saved for cooking. Roasting brings out their best flavor. Chop and broil or roast whole on the BBQ. Determinate habit.

- (T7) 25 sds-\$5.35; 50 sds-\$8.85; 100 sds-\$15.40; 250 sds-\$28.75; 500 sds-\$52.30

**MARGLOBE VF - 8436**

12,000 S. Heirloom. 75 days. An improved disease resistant strain. Red fruit; smooth and solid 6 oz. fruit that is crack resistant. Indeterminate stake habit.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**MARGO - 8397**

\* 30 in. - 9,000 S. (F-1 Hybrid). 70 days. Perfect for the garden and kitchen. Fruits are uniform, oblate in shape, shiny red with green shoulders and average 6 oz. in weight. Juicy and flavorful and can be tucked into smaller gardens. Disease resistant. Determinate habit.

- (P237) 50 sds-\$6.90; 100 sds-\$12.25; 250 sds-\$22.85; 500 sds-\$49.70; 1,000 sds-\$89.60

**MR. STRIPEY - 8437**

11,500 S. Heirloom. 80 days. Yellow beefsteak type fruit with red-streaked flesh. Large flavorful fruits range from 14 oz. to 3 lbs. Also called Old German or Pineapple. Indeterminate stake habit.

- (V) 100 sds-\$6.75; 200 sds-\$11.15; 500 sds-\$27.00; 1,000 sds-\$48.60

**MORTGAGE LIFTER - 8408**

11,000 S. (Radiator Charlie). Heirloom. 85 days. Large, slightly flattened, pink-red fruits that range from 1-3 lbs. Very meaty, great flavor and with few seeds. Legend says Radiator Charlie named the tomato after its excellent crop helped him to pay off a farm about to be foreclosed on. Indeterminate stake habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**TOMATO (continued)****NEW GIRL - 8572**

10,400 S. (F-1 Hybrid). 62 days. Better tasting and more disease resistant than Early Girl, well worth trying. Fruits are 4-7 oz., and hold their ripeness and flavor on the vine well. Indeterminate habit.

- (T073) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$14.20; 500 sds-\$26.35; 1,000 sds-\$46.20

**OXHEART - 8442**

13,000 S. Heirloom. 90 days. Extra large, heart-shaped reddish-pink fruit, few seeds, mild flavor. Fine variety. Non-acid. Indeterminate stake habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**PATIO F - 8544**

10,000 S. (F-1 Hybrid). 70 days. A sturdy, dwarf, upright plant with dark crinkled foliage. Medium size deep oblate shaped fruit with good color, smooth firm fruit of quality. Grows 24-30 in. tall and should be staked. Fine for growing in tubs and containers for the gardener with limited space. Disease resistant. Determinate bush habit.

- (T057) 50 sds-\$6.75; 100 sds-\$11.15; 250 sds-\$25.10; 500 sds-\$44.60

**PINK GIRL VF - 8527**

8,500 S. (F-1 Hybrid). 75 days. Beautiful 8 oz. pink fruits that are crack resistant. Disease resistant. Indeterminate stake habit.

- (T058) 100 sds-\$5.90; 200 sds-\$8.95; 500 sds-\$19.85; 1,000 sds-\$37.70; 5,000 sds-\$150.80

**POLISH LINGUISA - 8438**

19,000 S. Heirloom. 72 days. Fruits are large, sort of pie-shaped (flattened pear) and average 7-10 oz. each. Delicious flavor, high yielding. Indeterminate stake habit.

**PONDEROSA PINK - 8443**

9,000 S. Heirloom. 88 days. Large, purplish-pink fruit, mild flavor. Indeterminate stake habit.

**PONDEROSA RED - 8444**

13,000 S. Heirloom. 85 days. Large, red fruit, mild flavor. Indeterminate stake habit.

**PRUDEN'S PURPLE - 8403**

12,000 S. Heirloom. 75 days. Large potato leaf vine produces lots of 1 lb., slightly flattened, pretty, blemish-free, purple-pink fruits with few tomato seeds and excellent flavor. An early Brandywine-type variety that is heavy yielding. Indeterminate stake habit.

- Each of the above: (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**RED STUFFER - 8439**

\* 12,500 S. 90 days. The fruit is red-orange with three to four cells. The center seed cluster, similar to that of a bell pepper, is easily removed which makes this ideal for serving as an edible container for your favorite cold or hot salads. Indeterminate stake habit.

- (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

(continued on next page)

**TOMATO (continued)****ROMA VF - 8454**

12,000 S. Heirloom. 75 days. Pear shaped 2 oz. fruit, ideal for paste or puree. Fusarium and verticillium resistant. Determinate bush habit.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**ROYESTA - 8535**

\* 7,700 S. (F-1 Hybrid). 68 days. This variety has wonderful qualities, including early maturity, great flavor, wide adaptability and more traditional rough shoulder that is similar to the popular heirloom types. It can produce 6-9 ounce fruit over a long period of time. Disease resistant. Indeterminate stake habit.

- (CL) 25 sds-\$6.30; 50 sds-\$10.85; 100 sds-\$19.95; 250 sds-\$47.85; 500 sds-\$93.70

**RUTGERS VF - 8455**

12,500 S. Heirloom. 75 days. An improved disease resistant strain. Fruit is 6 oz. bright red; globular with smooth, thick walls that are crack resistant. Determinate bush habit.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**SUNMASTER - 8569**

9,000 S. (F-1 Hybrid). 70 days. Large and uniform 7-8 oz. bright red fruits. The ideal variety for growing under humid and high temperatures when productivity normally declines for many varieties due to extreme heat. This variety thrives on the heat! Outstanding flavor with multiple disease resistance. Determinate bush habit.

- (T6) 100 sds-\$5.90; 200 sds-\$8.95; 500 sds-\$19.85; 1,000 sds-\$37.70; 5,000 sds-\$150.80

**SUPER FANTASTIC VFN - 8589**

8,000 S. (F-1 Hybrid). 70 days. A heavy producer of 10 oz. smooth, solid, red, meaty fruits throughout the summer. Disease resistant. Indeterminate stake habit.

- (P234) 50 sds-\$5.90; 100 sds-\$9.75; 250 sds-\$21.95; 500 sds-\$38.70; 1,000 sds-\$69.45

**SWEET CLUSTER - 8571**

9,000 S. (F-1 Hybrid). 67 days. A heavy yielding variety producing 4 oz. round to deep-oblate bright red fruits. Each cluster will produce 6-8 fruits. Home gardeners can now enjoy the flavor of the ripened-on-the vine cluster tomatoes that are very popular and expensive! Suitable for outdoor or greenhouse production. Disease resistant. Indeterminate stake habit.

- (T19) 50 sds-\$5.45; 100 sds-\$8.85; 250 sds-\$16.80; 500 sds-\$31.85; 1,000 sds-\$58.70

**SUPERSONIC**

Crop failure. As a substitute, we suggest Champion VFNT.

**TOMATO (continued)****VIVA ITALIA - 8594**

8,000 S. (F-1 Hybrid). 72 days. Earlier and more productive with higher quality blocky-pear fruits than other Roma types. Excellent flavor for fresh or canning. Disease resistant to bacterial speck.

- (T061) 50 sds-\$5.45; 100 sds-\$8.85; 250 sds-\$12.40; 500 sds-\$18.70

**WHITE WONDER - 8485**

10,500 S. 80 days. Fruits medium-sized with white flesh on the interior and white exterior skin. Mild, sweet flavor. Non-acid. Indeterminate stake habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**WONDER LIGHT - 8480**

12,000 S. Heirloom. 75 days. Oval shaped yellow fruits with rippled skin that resembles a lemon. Very tasty in salads, salsa, and slicing. Indeterminate stake habit.

- (T25) 100 sds-\$6.75; 200 sds-\$11.15; 500 sds-\$27.00; 1,000 sds-\$48.60

**TOMATO, SMALL FRUITED****BLACK CHERRY - 8421**

\* 20,800 S. 64 days. The incredibly sweet, fruity flavor is as appealing as the fruit is genuinely beautiful. Dark, chocolatey colored fruits are perfectly round, 3/4- inch diameter. Irresistible right off the vine. A unique addition to the color spectrum of cherry tomatoes that are now available. Indeterminate stake habit

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**CURRENT YELLOW - 8492**

26,000 S. 65 days. Berry sized fruit, produced in clusters. Indeterminate stake habit.

**GARDENER'S DELIGHT - 8483**

41,000 S. A heavy yielder of small, very sweet 1 in. red cherry tomatoes.

- Each of the above: (28A1) 100 sds-\$5.35; 200 sds-\$6.91; 500 sds-\$13.65; 1,000 sds-\$23.00; 2,000 sds-\$39.25

**GRAPE - RED GRAPE - 8528**

14,000 S. (F-1 Hybrid). 58 days. This favorite that was only available in produce stores, is now available from seed. Bright red small fruits are about 1/3 oz. (10 grams) each. They are very sweet, bite-sized, oval shaped grape tomatoes. Strong tolerance to heat, humidity and cracking. Determinate bush habit.

**GRAPE - YELLOW - 8525**

14,000 S. (F-1 Hybrid). 60 days. A perfect complement to Red Grape. Firm, bite-size, deep yellow fruits grow in long clusters on tall, healthy plants. The best-eating yellow grape with mild, sweet flavor. Resists cracking. Indeterminate..

- Each of the above: (25C2) 25 sds-\$5.35; 50 sds-\$7.34; 100 sds-\$12.33; 200 sds-\$26.94; 500 sds-\$50.13

**TOMATO (continued)****GRAPE - CUPID - 8400**

13,000 S. (F-1 Hybrid). 66 days. This is the ultimate in small fruited, grape-shaped tomatoes. Far superior, 1 oz. fruits have more natural sugars, with higher productivity. Indeterminate stake habit..

- (2512) 25 sds-\$11.34; 50 sds-\$19.54; 100 sds-\$35.93; 250 sds-\$83.94; 500 sds-\$160.13

**GROUND CHERRY (TOMATILLO) - 8479**

59,000 S. 75 days. Small tomatillo type. Indeterminate stake habit.

**JOLLY - 8407**

9,000 S. (F-1 Hybrid). (All America Winner - 2001). 70 days. A large, 1-1/2 oz. pink cherry tomato that tapers to a point at the blossom. Fruits are produced in clusters of 10-15 and are high yielding with a very sweet flavor. Indeterminate stake habit.

- Each of the above: (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**JULIET - 8549**

24 in. - 8,000 S. (F-1 Hybrid). (All America Winner - 1999). 60 days. Very sweet, red, one ounce cherry tomatoes are produced in clusters like grapes on the long, vigorous, indeterminate vines. Crack and disease resistant. Indeterminate stake habit.

- (V057) 50 sds-\$6.40; 100 sds-\$10.95; 250 sds-\$25.85; 500 sds-\$49.75; 1,000 sds-\$97.40

**MICRO TOM - 8491**

10-12 in. - 13,000 S. 85 days. Short, compact plant with 1 in. cherry tomatoes. Ideal for 4-in. pots, windowsills, or hanging baskets. Determinate bush habit.

- (T022) 50 sds-\$5.35; 100 sds-\$9.40; 250 sds-\$21.75; 1,000 sds-\$83.70

**RED CHERRY - 8474**

19,000 S. Heirloom. 75 days. Cherry shaped red fruits. Indeterminate stake habit.

**RED PEAR - 8476**

14,000 S. 75 days. Pear shaped red fruits. Indeterminate stake habit.

- Each of the above: (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**RED ROBIN - 8486**

17,000 S. 55 days. A dwarf variety of cherry tomato for container growing, hanging baskets, windowsill or patio growing. Plants remain 8-12 in. tall and bear masses of 1-1/4 in. fruit with a mild, sweet flavor. Very tender skin and good taste even when fruit is grown indoors. Determinate habit.

- (T034) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$16.45; 500 sds-\$28.35; 1,000 sds-\$48.70

**SUNGELLA - 8412**

70 days. A new larger fruited Sungold! Heavy producer of 2 oz. sweet, low-acid, orange fruit. Indeterminate stake habit.

- (T013) 100 sds-\$5.35; 200 sds-\$8.85; 500 sds-\$19.20; 1,000 sds-\$36.50; 5,000 sds-\$149.35

**TOMATO (continued)**

**SMALL FRY VFN**

Crop failure. As a substitute, we suggest Micro Tom.

**SUNSUGAR TMV - 8402**

11,000 S. 62 days. Each plant will produce many clusters of 1/2 inch or smaller gorgeous golden fruits. A blue ribbon winner at one Fair declared it one of the sweetest and best flavored cherry varieties. Disease resistant. Indeterminate stake habit.

- (T13) 50 sds-\$5.95; 100 sds-\$8.85; 250 sds-\$18.90; 500 sds-\$35.80; 1,000 sds-\$68.45

**SWEET BABY GIRL - 8577**

16,000 S. (F-1 Hybrid). 65 days. Large marble shaped fruits in small clusters. Bred for better crack resistance and a plant habit that is more controlled than other cherry varieties. Plants have shorter internodes and are indeterminate for continuous fruit production. Perfect choice for the home gardener. Indeterminate.

- (T086) 50 sds-\$6.80; 100 sds-\$12.25; 200 sds-\$21.90; 500 sds-\$48.70; 1,000 sds-\$92.75

**SWEET CHELSEA - 8562**

13,000 S. (F-1 Hybrid). 65 days. Heavy yielding, very sweet 1-1/2 in. cherry sized red fruits borne in clusters of 15-20 fruits each. High sugar content, low acid, great flavor. An improvement over Sweet 100. Disease resistant.

- (T18) 100 sds-\$6.90; 200 sds-\$11.40; 500 sds-\$27.60; 1,000 sds-\$49.68

**SWEET MILLION - 8567**

15,000 S. (F-1 Hybrid). 70 days. A very heavy yielding producer of 1 in. cherry red, flavorful, sweet fruits. Outstanding variety. Indeterminate stake habit.

- (T050) 100 sds-\$5.45; 200 sds-\$9.60; 500 sds-\$19.20; 1,000 sds-\$34.55

**TOMATO (continued)**

**TINY TIM - 8484**

17,500 S. Heirloom. 45 days. Grows only 10-12 in. tall and about 14 in. across. A heavy yielder with clusters of 1 in. red, fine-flavored fruit. Can be grown as a pot plant anytime of the year. Indeterminate stake habit.

- (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**TOMATILLO - 8456**

19,000 S. (Tomatillo verde). 60 days. Very popular in salsa and picante dishes. Harvest when fruits are green, before turning yellow. Remove the thin husk before using or consuming. Indeterminate stake habit.

- (29A1) 250 sds-\$5.35; 500 sds-\$7.25; 1,000 sds-\$11.96; 2,000 sds-\$19.96; 5,000 sds-\$41.80

**WINDOW BOX ROMA VFN - 8578**

12,000 S. (F-1 Hybrid). 70 days. Bright red, pear-shaped, 2-3 oz. fruit. Great flavor and shelf life. Upright, thick-stemmed, compact vines make it an excellent container variety. Disease resistant. Determinate bush habit.

- (25D2) 25 sds-\$5.66; 50 sds-\$8.86; 100 sds-\$15.28; 250 sds-\$34.06; 500 sds-\$63.88

**YELLOW PEAR - 8478**

15,500 S. Heirloom. 75 days. Pear shaped yellow fruits. Indeterminate stake habit.

**YELLOW PLUM - 8477**

8,500 S. Heirloom. 75 days. Plum shaped yellow fruits. Indeterminate stake habit.

- Each of the above: (30A1) 500 sds-\$5.35; 1,000 sds-\$7.51; 2,000 sds-\$12.46; 5,000 sds-\$25.57; 10,000 sds-\$43.79

**TURNIP**

10,000 sds/oz

1 oz. will plant a 100 ft. row. 2-3 lbs. per acre, in rows 18 in. apart.

**PURPLE TOP, WHITE GLOBE - 8091**

13,000 S. Heirloom. 55 days. Firm, crisp flesh can be eaten raw or cooked.

- (T018) 1/4 oz.-\$5.35; 1/2 oz.-\$8.85; 1 oz.-\$12.40; 4 oz.-\$37.60

**WATERMELON**

320 sds/oz 75°-80° 10 days

1 oz. will plant 25 hills; 3-4 lbs. for an acre. Space hills in rows 2 ft. apart and 4 ft. apart in the rows. About 1 oz. for a 50 ft. row. *Germania Seed Company does not warrant its watermelon seed against Watermelon Fruit Blotch or other related diseases or viruses. As a condition of sale, purchaser acknowledges and accepts all risks and liability associated with potential damages and problems. It is further understood and agreed that the purchase of this seed is NOT for commercial production and is intended only for the home garden market. We expressly disclaim any warranty or fitness for a particular purpose, our liability is limited only to the purchase price.*

**CRIMSON SENSATION - 7871**

900 S. 80 days. A round-shaped variety that is considered one of the best eating on the market. Fruits develop to the 30-35 lb. range with a beautiful rind, bright red flesh that is sweet and crispy.

- (W1) 50 sds-\$5.35; 100 sds-\$8.85; 250 sds-\$12.40; 500 sds-\$20.65

**CRIMSON SWEET - 7857**

760 S. 80 days. Fruits are light green with dark green stripes, flesh is deep red and fine textured. Melons are round and average about 25 lbs. Disease resistant.

- (W4) 1/2 oz.-\$5.85; 1 oz.-\$10.20; 4 oz.-\$38.25; 1 LB.-\$139.65

**SUGAR BABY (MIDGET) - 7856**

645 S. 80 days. A small, very early melon that is sweet and red fleshed, thin rind, fine for home gardens. Fruit averages 8-12 lbs.

- (G035) 250 sds-\$5.35; 500 sds-\$8.85; 1,000 sds-\$12.40; 2,000 sds-\$17.30

**SWEET FAVORITE - 7853**

670 S. (F-1 Hybrid). (All America Winner - 1978). Early, highly productive variety. Fruits are oblong, light green with dark green stripes and weigh about 20 lbs. each. The interior is a deep red with very small seeds and a sweet delicious flavor. Disease resistant to anthracnose and fusarium wilt.

- (W2) 25 sds-\$5.95; 50 sds-\$10.15; 100 sds-\$18.55; 250 sds-\$35.35; 500 sds-\$68.95

**YELLOW DOLL - 7854**

1000 S. (F-1 Hybrid). 70 days. Flesh is crisp, bright yellow and sweeter than other varieties. Fruit is round, with light green skin and dark green stripes. A novel and excellent icebox type variety. About 10 lbs. each.

- (W3) 25 sds-\$5.90; 50 sds-\$8.85; 100 sds-\$14.70; 200 sds-\$27.40

**TAGS • TAGS • TAGS**

As a grower, there are times when you may need to sell your plants before they come into flower. The most convenient way to do this is by supplying a picture of the flowering plant. This has always been too costly. Not any more! Now you can buy a Pixie picture tag for about 2 ¢ a piece. This is cheaper than most black and white tags! A color picture tag with full growing instructions and a description for less than a black and white label!

How can you get the 250,000 price rate for Pixie Plastic tags?

Place a seed order for \$250 or more and you are eligible for the 250,000 quantity for your Pixie tags. (This price is cheaper than the black & white tags for most quantities!) For a listing of available items, please refer to the enclosed tag order blank.
