

VEGETABLE SEEDS

It is our desire to offer our customers only the finest strains available. In maintaining these standards, we contract with only the most reliable and experienced breeders and growers to supply us with high quality seed.

By maintaining these high standards, we pledge to serve you to the best of our ability. The varieties we are listing are available for bedding plant production only, not for commercial production purposes.

“Heirlooms” . . . They are the antiques of the seed world. These treasures are always non-hybrids and are “open pollinated” with a long history of selection. Many are the base in which the F-1 Hybrid of today were established. They are prized for their flavor, hardiness, color, yield, and disease resistance. “Old Fashioned” varieties are very popular today after being passed from generation to generation and reflect back to an individuals heritage. They are what our relatives grew a hundred or more years ago.

ARTICHOKE

650 sds/oz 14 days

For the best germination, soak seeds in warm water for 4-6 days before sowing. Attractive, ornamental perennial with edible flower buds. Needs winter protection from severe freezing conditions. Herbalists believe artichokes are useful in treating indigestion, liver protective properties and cholesterol reducer.

GREEN GLOBE - 7511

650 S. Large edible flower heads. Ferny tistle-like foliage is also useful in the landscape. Under ideal conditions they can be harvested the second year. Steam them and they are great for dipping in butter or sauces.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

ASPARAGUS

1,500 sds/oz

For the best germination, soak seeds in warm water for 4-6 days before sowing. 1 oz. will produce 250 roots. About 1 oz. for 100 ft. row, when planting, space rows 18 x 24 in. About 2-3 lbs. per acre when direct seeding.

MARY WASHINGTON - 7513

1,500 S. Developed by Dr. J. B. Norton, U.S. Department of Agriculture, for resistance to asparagus rust and considered the most desirable of the Asparagus family.

- (30B5) 500 sds-\$5.85; 1,000 sds-\$7.70; 2,000 sds-\$11.50; 5,000 sds-\$21.95; 10,000 sds-\$37.25

BEANS

100 sds/oz

Plant beans in rows 2 ft. apart. 1 lb. will plant a 50 ft. row. Space 4 x 18 in. when direct seeding, about 75 lbs per acre.

KENTUCKY WONDER - 7518

75 S. (Old Homestead). Heirloom. 58 days. Green pole bean. 8 inch thick, oval beans.

- (15Z5) 2 oz.-\$5.85; 4 oz.-\$8.10; 8 oz.-\$12.20; 1 LB.-\$19.40

BEANS (continued)

TENDERGREEN - 7520

70 S. 53 days. Bush habit, stringless. 6 in. pods are rich green and outstanding in tenderness and rich flavor. Ideal for canning or freezing. Disease resistant.

WAX INDY GOLD - 7521

90 S. 58 days. Uniform yellow pods are 5-6 in. long by 3/8 in. diameter. Tolerant to Common Bean Mosaic races 1 and NY15.

- Each of the above: (15Z5) 2 oz.-\$5.85; 4 oz.-\$8.10; 8 oz.-\$12.20; 1 LB.-\$19.40; -\$

YARD LONG BEAN - 7530

200 S. 78 days. Graceful, 16-20 in. long, dark green pods. No bigger than the diameter of a pencil. Stringless, sweet, and richly flavored for steaming, curries and stir-fry. Use a tall trellis. Black seeds.

- (28C5) 100 sds-\$5.85; 200 sds-\$8.65; 500 sds-\$16.95; 1,000 sds-\$28.65; 2,000 sds-\$50.10

BEETS

1,200 sds/oz 75° 15 days

For the best germination, cover seeds lightly after sowing. Space rows 18-24 in. apart. 4 ozs. for a 175 ft. row. About 10 lbs. per acre, when direct seeding. Beets are delicious, tops are excellent when cooked for greens. Beets are known to promote a diuretic washing action via the liver and kidneys. High in iron content that serves as a strong agent for flushing away fatty deposits and impurities.

DETROIT DARK RED - 7523

2,000 S. Heirloom. 55 days. Short top, globe shape. The most popular garden variety.

- (11Z5) 1/2 oz.-\$5.85; 1 oz.-\$7.15; 2 oz.-\$10.75; 4 oz.-\$17.35; 8 oz.-\$29.80

BITTER MELON

150 sds/oz 70°-75° 15 days

For the best germination, we suggest that before sowing, soak seed in warm water for 4-5 days, changing the water daily. Cover seeds lightly and maintain 75° soil temperature.

BALSAM PEAR - 7522

140 S. Widely grown in tropical countries. Known as the Indian type. Harvest young fruits like cucumbers. Heavily warted 6-8 in. fruit. High tolerance to heat and adverse conditions.

LONG FRUITED - 7531

150 S. 70 days. This is a Japanese variety climbing up to 12 feet and has yellow flowers. Fruits grow to 12 in. long and have a green warty skin. Young fruit, leafy shoots and leaves are all edible. Pick the fruit early for less bitterness. The young fruit works well in soups, especially with pork and black beans. Mature fruit is parboiled then used in stir-fry.

- Each of the above: (09Z5) 1/8 oz.-\$6.45; 1/4 oz.-\$10.30; 1/2 oz.-\$16.95; 1 oz.-\$35.30; 4 oz.-\$124.70

BROCCOFLOWER

Green Cauliflower

7,000 sds/oz 70° 10 days

For the best germination, cover seeds lightly after sowing. Use the same culture as Cauliflower, they are heavy feeders.

BROCCOVERDE - 7535

9,000 S. 68 days. A cross between cauliflower and broccoli. Lime-green 1 lb. heads are semi-domed. Excellent flavor and quality with good heat tolerance.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

We inventory over 5,500 varieties of SEED,

our selection is unmatched !

All Seed orders are shipped the same day received....

BROCCOLI

6,000 sds/oz 70° 10 days

For the best germination, cover seeds lightly after sowing. Plants can be ready for sales about 4-5 weeks after seeding. Space plants 36 x 24 in. outdoors. About 1/4 oz. for a 100 ft. row or 2 lbs. per acre when direct seeding. Broccoli is very high in Vitamins A and C. Being a member of the Brassica (Broccoli and Cabbage) family, it is an excellent source of antioxidants that medical research suggests may prevent cancer.

GREEN SPROUTING - 7529

7,000 S. Heirloom. Early, valuable all-season.

- (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

PACKMAN - 7525

7,000 S. (F-1 Hybrid). 50 days. Very early and large headed variety with good side shoot development.

- (29D5) 250 sds-\$8.85; 500 sds-\$13.85; 1,000 sds-\$22.55; 2,000 sds-\$37.85; 5,000 sds-\$81.65

PREMIUM CROP - 7528

4,500 S. (F-1 Hybrid). (All America Winner - 1975). 58 days. Very early, large heads that are firm with small beads. Vigorous grower, very uniform.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

BRUSSEL SPROUTS

7,000 sds/oz 70° 10 days

Same culture as Broccoli. Sow in March and again in mid-June for fall crop. For the best germination, cover seeds lightly after sowing. Space 36 x 18 in. outdoors, about 1-1/2 lbs per acre when direct seeding.

JADE CROSS - 7533

5,500 S. (F-1 Hybrid). (All America Winner - 1959). 85 days. Is early, has excellent color and is very productive. An outstanding variety.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

LONG ISLAND - 7534

20 in. - 8,000 S. 90 days. The most popular, they yield amazing amounts of sweet, medium-sized heads. Sweeter after temperatures fall below freezing. Good keeper.

- (30A5) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

Cabbage.

Also see listing of Cabbage, Flowering under Annuals.

CABBAGE

7,000 sds/oz 70° 7-10 days

For the best germination, cover seeds lightly after sowing. Sow in March. Grow cool after transplanting. Space plants 18 in. apart in rows 3 ft. apart. Never plant cabbage in the same location 2 years in a row. About 1/4 oz. for a 100 ft. row or 2 lbs. per acre when direct seeding. Cabbage is high in Vitamin C and Potassium. Being a member of the Brassica (Broccoli and Cabbage) family, it is an excellent source of antioxidants that medical research suggests may prevent cancer. To keep the smell of Cabbage out of your kitchen when cooking or boiling Cabbage, add several stalks of Celery to the pot.

CHARMANT - 7604

* (F-1 Hybrid). 66 days. Suited for close plantings, forming solid, 3-4 lb., blue-green heads that are 6-8 in. across. They will stand for weeks in the garden without splitting. Great for slaw or kraut, especially good with a bit of lemon juice and roasted pine nuts tossed with melted butter.

- (29B4) 250 sds-\$5.85; 500 sds-\$8.90; 1,000 sds-\$14.65; 2,000 sds-\$24.55; 5,000 sds-\$52.85

COPENHAGEN MARKET - 7633

7,000 S. Heirloom. 67 days. Good for early market, home garden or kraut.

- (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

DANISH BALLHEAD - 7634

7,000 S. Heirloom. 105 days. Large, solid round heads. Best late variety.

- (31B5) 1,000 sds-\$5.85; 2,000 sds-\$6.85; 5,000 sds-\$11.65; 10,000 sds-\$18.40; 25,000 sds-\$37.70

DYNAMO

Discontinued. As a substitute, we suggest Charmant.

EARLY FLAT DUTCH - 7636

8,000 S. 75 days. Firm, nearly round heads, a very good keeper, 7-10 lb. heads.

EARLY JERSEY WAKEFIELD - 7635

5,000 S. Heirloom. 62 days. Solid, pointed or conical heads. Very early and uniform strain.

- Each of the above: (31A1) 1,000 sds-\$5.85; 2,000 sds-\$6.73; 5,000 sds-\$13.21; 10,000 sds-\$22.21; 25,000 sds-\$46.78

GOLDEN ACRE RESISTANT - 7623

7,000 S. Heirloom. 65 days. Round head, short stem, uniform and firm. 3 lb heads.

LATE FLAT DUTCH - 7641

7,500 S. Heirloom. 100 days. A dependable variety with very large 10-12 lb. flat heads. A good keeper.

- Each of the above: (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

MAMMOTH ROCK RED

Crop failure. As a substitute, we suggest Ruby Perfection.

CABBAGE (continued)

RUBY PERFECTION - 7621

5,000 S. (F-1 Hybrid). 80 days. Solid 6-8 in., 2-3 lb., deep red heads are slow to burst.

- (29C2) 250 sds-\$6.55; 500 sds-\$10.54; 1,000 sds-\$18.52; 2,000 sds-\$33.92; 5,000 sds-\$79.00

SAVOY KING - 7613

3,500 S. (F-1 Hybrid). (All America Winner - 1965). 85 days. Very vigorous high yielding heads weighing between 5-6 lbs. Deep green color. Heat and disease resistant.

- (29B5) 250 sds-\$6.75; 500 sds-\$9.95; 1,000 sds-\$15.65; 2,000 sds-\$25.55; 5,000 sds-\$53.85

STONEHEAD - 7617

8,000 S. (F-1 Hybrid). (All America Winner - 1969). 50 days. Yellow resistant. About 6 in. very solid heads with a short core makes storage and spacing ideal. Slow to bolt.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

SWELLHEAD

Crop failure. As a substitute, we suggest Savoy King.

CABBAGE (CHINESE CABBAGE) BLUES - 7624

(F-1 Hybrid). 57 days. Extra early and slow to bolt making it an exceptional variety for areas where bolting is a problem. In those areas, spring to early summer harvest is recommended.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

PAK CHOI (JOI-CHOI) - 7607

11,000 S. 47 days. Deliciously spicy, pure white celery-like stalks are topped by green leaves. Each plant will have 10-14 stalks 8-10 in. long. Excellent raw or cooked.

- (28D5) 100 sds-\$6.15; 200 sds-\$9.65; 500 sds-\$19.25; 1,000 sds-\$32.75; 2,000 sds-\$57.50

CARDOON

3,000 sds/oz

Plant seeds early in greenhouse; transplant into rows 36 x 12 in. 1 oz. for 100 ft. row. Soak seed 5-7 days before sowing.

TENDERHEART - 7539

750 S. (Large Smooth, Green Globe). Heirloom. Clump forming tender perennial with pinnatifid (Spiny) silver gray leaves that develop up to 20 in. long. Purple 2-3 in. flower heads will develop throughout the summer growing season.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

VEGETABLES

Yes, we have Color Pixie Tags for \$2 per hundred—available for all of your Seed and Plant purchases

CARROT

18,000 sds/oz

1 oz. will plant 100 ft. row. 3-1/2 to 4 lbs. per acre. Sow as early as the ground can be worked, sow direct in rows 12-18 in. apart. Make successive plantings until August 1st. About 2-3 lbs. per acre when direct seeding. Carrot fly can be a nuisance insect. If a problem every year; grow Herb, Sage nearby to repel the insects. The brighter the orange color, the higher the level of Beta Carotene and vitamins. Breeders began developing orange carrots about 400 years ago - before that time, they were purple and considered undesirable! A study at Harvard Medical School found that Beta Carotene found in carrots, pumpkin, squash and red peppers can reduce the risk of stroke by 68%. Also known to reduce the risk of smoking related cancers, lowering the blood pressure and preventing constipation.

CAROPAK - 7548

35,000 S. 74 days. (Baby). This strain is commonly grown as "Baby Carrots" by the commercial growers - over 875 billion have been grown the past 3 years! Very tasty and flavorful. Harvest when young; 3-4 in. or full maturity at 7-9 in. Very high in vitamins and as a cancer fighting antioxidant.

- (30A5) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

DANVER'S HALF LONG - 7542

19,000 S. Heirloom. 75 days. Tapering to a blunt point.

- (10A5) 1/4 oz.-\$5.85; 1/2 oz.-\$7.15; 1 oz.-\$10.75; 2 oz.-\$17.35; 4 oz.-\$29.80

NANTES SCARLET - 7550

65-74 days. Cylindrical, half long, 7 x 1.25 in. bright red-orange flesh, fine grained and nearly coreless. Fine flavor, sweet and brittle. Colors up early for baby carrots, for bunching, freezing or storage. Excellent juicer.

- (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

THUMBELINA - 7543

28,000 S. (All America Winner - 1992). 75 days. A round sweet-gourmet carrot that is ideal for container growing. Grown under normal conditions it will grow to the size of a golf ball. Spaced to 30 plants per foot, it will harvest to the size of a small radish.

- (30A5) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

TORRO - 7549

14,000 S. 70 days. (F-1 Hybrid). An early Nantes type with great flavor and texture. Slow to bolt, with nice uniform roots. Tops are medium sized and strong, making harvest easy.

- (31B5) 1,000 sds-\$5.85; 2,000 sds-\$6.85; 5,000 sds-\$11.65; 10,000 sds-\$18.40; 25,000 sds-\$37.70

Cauliflower.

Also see listing of Brocoveerde under Vegetables.

CAULIFLOWER

7,000 sds/oz 70° 10 days

For the best germination, cover seeds lightly after sowing. Sow February-March. Culture is the same as for cabbage. Handle in plant bands or peat pots. Space 18-24 in. Begin using cauliflower as the heads fill out, otherwise the quality will diminish. They love fertilizer and are heavy feeders. About 1/4 oz. for 100 ft. row or 1-1/2 lbs. per acre when direct seeded.

EARLY SNOWBALL - 7555

6,000 S. (Burpeeana Super Snowball A.). Heirloom. 55 days. Large, 2 lb. pure white solid heads.

SELF BLANCHING - 7558

8,000 S. 65 days. Pure white 3 1/2 - 4 lb. well shaped heads with a fine texture.

- Each of the above: (31D5) 1,000 sds-\$6.45; 2,000 sds-\$9.40; 5,000 sds-\$17.40; 10,000 sds-\$28.65; 25,000 sds-\$60.80

SNOW CROWN - 7551

5,000 S. (F-1 Hybrid). (All America Winner - 1975). 50 days. Early and vigorous growing snowball type. Head is well rounded, very smooth pure white, weighing about 2 lbs. and of excellent quality. Ideal for fresh or frozen market use.

- (29C5) 250 sds-\$7.80; 500 sds-\$11.90; 1,000 sds-\$19.10; 2,000 sds-\$31.70; 5,000 sds-\$67.75

CELERY

10,000 sds/oz 60°-65° 14-21 days

1 oz. will produce about 7,000 plants or a 150 ft. row. Sow February-March. Space rows 6 x 28 in. Days indicated are from date of planting. Soak seeds 3-5 days before sowing. After sowing, cover seeds lightly with media, needs darkness to germinate. Very high in Vitamin A which reduces arthritis pain and helps flush fat from the body.

CELERIAC - 7564

60,000 S. (German Root Celery). Heirloom. 100 days. A white fleshed knobby root that grows to the size of a softball. Excellent flavor, between Celery and Parsley. Used for flavoring in salads, soups, dressings, etc.

GIANT PASCAL - 7561

64,000 S. Heirloom. 105 days. Standard green pascal type celery. Very productive.

GOLDEN SELF-BLANCHING - 7563

80,000 S. Heirloom. 90 days. Stocky, solid, thick stalks blanch easily. Vigorous growing with upright medium green foliage. The roots are round smooth and have good inner quality with high yields.

- Each of the above: (34A4) 5,000 sds-\$7.15; 10,000 sds-\$10.65; 25,000 sds-\$20.25; 50,000 sds-\$33.75.

CHERVIL

25,000 sds/oz 60° 10 days

1/2 oz. for a 100 ft. row. Germinates slowly and grows slowly until plants are 2 in. tall. Thin to about 5 in. apart.

DOUBLE CURLED - 7568

14,000 S. Heirloom. Gourmet type parsley with anise flavor. Great in salads.

- (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

Chicory.

Also see listing of Radicchio under Vegetables.

CHICORY

25,000 sds/oz

1/2 oz. for a 100 ft. row. Plant as early as possible. Thin plants to 6 in. apart. About 1 lb. per acre if direct seeded.

WITLOOF OR FRENCH ENDIVE - 7571

20,000 S. (Frisee). Heirloom. 45 days. Easy to grow, makes an appetizing salad. Medium sized heads are extra frilly, deep hearted, self blanching with compact growth habit.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

COLLARDS

7,000 sds/oz 70° 10-14 days

1/2 oz. for a 100 ft. row. Rows should be spaced 18 x 24 in. when direct seeding, about 3-4 lbs. per acre.

GEORGIA - 7649

24-36 in. - 6,250 S. 70 days. Non-heading, juicy blue-green wavy leaves will stand light freezing which improves the cabbage-like flavor.

- (34A4) 5,000 sds-\$7.15; 10,000 sds-\$10.65; 25,000 sds-\$20.25; 50,000 sds-\$33.75

CORN, SWEET

125 sds/oz

Plant in hills 3-1/2 ft. apart with the rows 3 ft. apart. Thin to 2 plants per hill. About 1 lb. for 125 hills or 175 ft. row. About 2,000 S. per lb. or 10 lbs. per acre when direct seeding. Miniature Corn - for small, 3-4 in. ears used as an appetizer or in Chinese cooking - plant the seed close (4-6 in. apart) and harvest when the "silks" start to emerge. The earliest written record of corn (maize) is found in Popol Juh, the sacred book of the Quiche Indians of Guatemala and Mexico dating back to the 8th century! The first Europeans to see corn growing were the crew members of Columbus' ships exploring Cuba in 1492.

BODACIOUS - 7687

200 S. 75 days. Large, 8 in. ears have 18 rows of exceptionally tender yellow kernels. This is a sugar enhanced variety with exceptional sweet flavor. Outstanding variety with stress tolerance.

- Each of the above: (13Z5) 1 oz.-\$5.85; 2 oz.-\$7.15; 4 oz.-\$10.75; 8 oz.-\$17.35; 1 LB.-\$29.80

(continued on next page)

CORN, SWEET (continued)

IOCHIEF - 7686

150-200 S. (All America Winner - 1951). 82 days. Drought resistant 10 in. ears with 14-18 rows of kernels. An excellent variety.

PEACHES & CREAM - 7997

(F-1 Hybrid). 83 days. Ears are 8 1/2 in. long by 1 3/4 in. in diameter. 18-20 rows of kernels. Long flat leaf with good ear cover. Good for fresh market, roadside stand, home garden and home freezing.

SILVER QUEEN - 7689

170 S. 90 days. Uniform 8 in. ears with 14-16 rows of snow white kernels. Very sweet and tender. Disease resistant.

- Each of the above: (13Z5) 1 oz.-\$5.85; 2 oz.-\$7.15; 4 oz.-\$10.75; 8 oz.-\$17.35; 1 LB.-\$29.80

SENECA DAWN (BICOLOR)

Crop failure. As a substitute, we suggest Peaches & Cream.

CUCUMBER, BURPLESS

1,000 sds/oz 75° 5-7 days

1 oz. for 50 hills or a 150 ft. row. Sow seed in hills, thin out to 3-4 plants per hill. Space hills 1 ft. apart in rows 3 ft. apart. About 3-5 lbs. per acre when direct seeding. Plant radishes between the rows to deter the cucumber beetle. Fruits should be picked before they begin to turn yellow to avoid hollow centers. For straight fruit, grow on a trellis or fence.

BURPLESS BUSH - 7664

900 S. 55 days. Compact, bush habit. 10 in. dark green, firm fruit. Sweet, bitterfree fruits for those who want a compact plant without the after taste. Disease resistant.

- (28B5) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

BURPLESS NO. 26 - 7654

1,000 S. (F-1 Hybrid). 60 days. Tasty Green. A new variety for those who shun cucumbers as being bitter and indigestible. They should be picked and eaten like celery when they are young; no peeling since the skin is soft and tender. Stake for best results. 9 in. long and 1-1/2 in. in diameter. Suited for greenhouse culture.

- (28E5) 100 sds-\$6.70; 200 sds-\$10.65; 500 sds-\$21.55; 1,000 sds-\$36.85; 2,000 sds-\$64.90

EARLY SPRING BURPLESS BUSH - 7661

* 1,000 S. (F-1 Hybrid). 58 days. 10-12 in. pale green fruit. Fruits are smooth and white spined. Excellent home variety. Bush habit.

- (28B5) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

ORIENT EXPRESS - 7666

1,100 S. (F-1 Hybrid). 58 Days. Early Burpless hybrid with dark green skin. Flavor is best when harvested young; 12 in. and 1 1/2 in. in diameter. Disease resistant.

- (26A5) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

CUCUMBER (continued)

SUMMER TOP - 7680

(F-1 Hybrid). This is a Japanese burpless variety that produces an abundance of uniform glossy, deep green fruit, 8 1/2 to 9 in. in length, with a diameter between 1 and 1 1/4 in. Highly resistant to both powdery mildew and downy mildew.

- (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

SWEET SLICE - 7655

1,000 S. (F-1 Hybrid). 62 days. Amazingly sweet, bitterfree and burpless, this is the variety for people who cannot eat ordinary cucumbers. No need to peel the dark green skin of these beautiful 10-12 in. fruits. Ideal for the home gardener or commercial grower. Disease resistant.

- (26B5) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

SWEET SUCCESS - 7658

760 S. (F-1 Hybrid). (All America Winner - 1983). 60 days. Early maturing, bitterfree and burpless type. It is not necessary to peel the medium dark green skin from the 12-14 in. fruits. The interior is crisp and white - ideal for summer salads. Disease resistant.

- (24C5) 10 sds-\$5.85; 25 sds-\$9.65; 50 sds-\$15.80; 100 sds-\$26.60; 250 sds-\$57.50

CUCUMBER, PICKLING

HOMEMADE PICKLES - 7670

1,000 S. 55 days. Bush type. This variety was developed for the home gardener and home pickling use. A heavy producer of solid, crisp pickles. Can be harvested when 2 in. long or full maturity at 5 in. A very high yielding variety. Over an eight week period, ten plants yielded about 450 fruits or an average of 45+ fruits per plant.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

PICKLING - 7675

6 in. - 1,000 S. Heirloom. 58 days. Good medium dark green fruit 6 1/2 x 2 1/2 in. in diameter. Highly productive vigorous vine. Excellent black spined variety for home or commercial pickling. Disease resistant.

- (30A5) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

PIONEER - 7673

1,000 S. (F-1 Hybrid). 48 days. A gynocious, black spine, medium green pickling cucumber. Will produce an excellent quality of high yielding, uniform fruit. This variety is disease resistant and very popular in northern areas.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

CUCUMBER (continued)

WHITE MINIATURE - 7681

48 days. A vigorous producer of small, white pickling cucumbers. Delicious for fresh eating. Thin-skinned, tender fruits are accompanied by a mild, sweet flavor with absolutely none of the bitterness typical in most white cucumbers. Black spine.

- (28A5) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

CUCUMBER, SLICING

ARMENIAN - 7663

900-950 S. Heirloom. 60 days. Long, pale green ribbed fruits are 18 to 30 inches in length, with crisp, sweet flesh. Very thin skin does not require peeling.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

BURPEE HYBRID II (DASHER LL) - 7653

1000 S. (F-1 Hybrid). 55 days. An excellent improved variety for the home garden, market grower, shipper and greenhouse culture. Fruits are dark green with white spines, 8 in. or more long and 2-1/4 in. across. A high yielding, disease resistant variety.

- (28D5) 100 sds-\$6.15; 200 sds-\$9.65; 500 sds-\$19.25; 1,000 sds-\$32.75; 2,000 sds-\$57.50

DIVA - 7676

1,000 S. (F-1 Hybrid). (All America Winner - 2002). This variety can set fruit without pollination. Plants naturally produce only female flowers which increase their overall yield of large, sweet and genetically non-bitter 6-8 in. fruits. Disease resistant.

- (26A5) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

EMPARATOR - 7679

48 in. - 850 S. (F-1 Hybrid). 55 days. Thin, smooth skin and crunchy texture. The 6 in. fruits are medium to dark green and glossy, with a slight rib and nearly spineless. Sweet in flavor, makes it great for salads and sandwiches, no need to peel.

- (26C5) 50 sds-\$6.45; 100 sds-\$10.30; 250 sds-\$20.70; 500 sds-\$35.30; 1,000 sds-\$62.15

FANFARE - 7651

1,000 S. (F-1 Hybrid). (All America Winner - 1994). 60 days. Early maturing fruits are dark green 8-9 in. long by 2-1/4 in. across. Compact plants producing top quality yields.

- (26A5) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

LEMON APPLE - 7674

1,000 S. Heirloom. 60 days. Vigorous and productive variety that produces fruits about the size and color of a lemon. Flesh is crispy white, sweet, and burpless. Use the tops for salads or pickling. Fruits are ripe when first starting to turn yellow, but can be used green or ripe.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

VEGETABLES

CUCUMBER (continued)

LONG SLICER (GOURMET)

Crop failure. As a substitute, we suggest Armenian.

MARKETMORE 76 - 7677

1,000 S. 66 days. Dark green fruits are 8 in. long and 2 1/2 inch in diameter.

- (30D5) 500 sds-\$6.90; 1,000 sds-\$10.25; 2,000 sds-\$16.10; 5,000 sds-\$32.20; 10,000 sds-\$55.70

SALAD BUSH - 7650

800-850 S. (F-1 Hybrid). (All America Winner - 1988). 57 days. Very compact growing plants, great for pots, tubs and limited space gardens (including hanging baskets and patio containers). Very productive 6-7 in. straight, dark green slicing cucumbers. Multiple disease resistant. A very heavy producing variety. Five plants will produce about ninety beautiful fruits.

- (25D5) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

SLICEMASTER - 7662

1,000 S. (F-1 Hybrid). 55 days. Very early. Long, slim dark green slicer that is disease resistant. A high yielder of almost perfect 8 in. fruits.

- (28A5) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

SPACEMASTER 80 - 7660

* 57-64 days. Dark green, smooth slender cylindrical uniform 7-8 in. fruits. Compact, dwarf plant 36 in. vines with no runners. Adaptable to a wide range of climates. Scab and cucumber mosaic virus resistant. Bush habit.

- (30C4) 500 sds-\$5.95; 1,000 sds-\$8.60; 2,000 sds-\$13.10; 5,000 sds-\$25.55; 10,000 sds-\$43.70

STRAIGHT 8 - 7678

950 S. (All America Winner - 1935). Heirloom. 58 days. Early, dark green skinned, 8 in. fruits. Disease resistant.

- (30B5) 500 sds-\$5.85; 1,000 sds-\$7.70; 2,000 sds-\$11.50; 5,000 sds-\$21.95; 10,000 sds-\$37.25

DILL

Anethum graveolens

10,000 sds/oz 60°-65° 15 days

For the best germination, cover seeds lightly after sowing. Darkness will help germination. About 1/2 oz. for a 100 ft. row. A favorite seasoning with many uses. For over 3,000 years Dill has been used as a digestive aid. It helps relax the muscles of the digestive tract and act as an antifoaming agent in preventing the formation of intestinal gas bubbles and in controlling diarrhea.

FERNLEAF - 7698

⌘ 18 in. - 18,500 S. (All America Winner - 1992). Outstanding dill flavor. Dark green, finely cut foliage.

- (31C5) 1,000 sds-\$5.85; 2,000 sds-\$8.10; 5,000 sds-\$14.50; 10,000 sds-\$23.50; 25,000 sds-\$49.25

DILL (continued)

BOUQUET - 7885

⌘ 30 in. - 14,000 S. Early flowering selection with large seed umbels and mid to dark green foliage. Flowers are edible. Matures in 40-55 days.

DÜKÄT - 7668

26 in. - 21,000 S. A European strain known for its compact, dwarf habit. Large, attractive flower heads are very desirable for their odoriferous flavor in cooking and pickling. Use leaves for soups, the stalks and seeds are best suited for pickling.

- Each of the above: (34A5) 5,000 sds-\$7.15; 10,000 sds-\$10.65; 25,000 sds-\$20.25; 50,000 sds-\$33.75; -\$

HERCULES - 7886

⌘ 30 in. - 22,000 S. Tall, extremely uniform and productive plant with high leaf yield. Matures in 40-55 days.

LONG ISLAND MAMMOTH - 7699

30 in. - 14,000 S. A favorite seasoning with many uses. For over 3,000 years Dill has been used as a digestive aid. It helps relax the muscles of the digestive tract and act as an antifoaming agent in preventing the formation of intestinal gas bubbles and in controlling diarrhea. This herb variety is more compact growing than the standard garden variety. Annual.

VIERLING - 7671

⌘ 36-48 in. - 19,000 S. Mostly grown as a florsit product. Strong stems with feathery foliage and lacey, golden yellow blooms. Multi-branched plants produce an abundance of stems, easy to grow annual. For fresh or dried use.

- Each of the above: (34A5) 5,000 sds-\$7.15; 10,000 sds-\$10.65; 25,000 sds-\$20.25; 50,000 sds-\$33.75; -\$

EGGPLANT

6,000 sds/oz 80° 14 days

Sow February-March for plant sales. Space 18 x 24 in. Requires warm house and bottom heat for the best germination. About 1/4 oz. for a 100 ft. row or 2 lbs. per acre when direct seeding. For the best taste and flavor, pick before interior seeds are fully mature.

APPLE GREEN - 7887

6,000 S. 62-70 days. Plants produces an good yield of oval fruits that are 5 in. in diameter with pale green skin and white flesh. Extremely mild tasting and non-acid. No need to peel!

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

BLACK BEAUTY - 7716

7,000 S. Heirloom. 80 days. Excellent market type. Dark purple fruits, broad egg-shaped.

- (31B5) 1,000 sds-\$5.85; 2,000 sds-\$6.85; 5,000 sds-\$11.65; 10,000 sds-\$18.40; 25,000 sds-\$37.70

BLACK BELL II - 7711

4,500 S. (F-1 Hybrid). 68 days. Improved for 2009! Widely adapted variety with good production results. Superior round-oval shape and deep glossy purple color. Disease resistant.

- (25D4) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

EGGPLANT (continued)

CLOUD NINE (WHITE) - 7490

6,000 S. (F-1 Hybrid). 75 days. Pure white 7 in. fruits are 3 in. in diameter and sweet with bitter free flavor. Disease resistant.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

DUSKY

Crop failure. As a substitute, we suggest Epic.

EPIC - 7492

(F-1 Hybrid). 64 days. Plant produces good yield of 8 in. long by 4 in. wide deep purple-black teardrop shaped fruits and will climb to 36 in. Excellent to slicing, stuffing and baking. Disease resistant.

- (29D4) 250 sds-\$7.85; 500 sds-\$12.85; 1,000 sds-\$21.55; 2,000 sds-\$36.85; 5,000 sds-\$80.65

FAIRY TALE

Crop failure. As a substitute, we suggest Twinkle.

GREEN GODDESS - 7865

5,000 S. (F-1 Hybrid). 63 days. High yielding variety (70+ fruits per plant)! The elongated 9 in. x 1 3/4 in. green fruits are mildly flavored. Disease resistant.

- (28B4) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

GRETEL - 7683

36-42 in. - 8,000 S. (F-1 Hybrid). (All America Winner-2007). This petite plant with its beautiful, mini white fruit can be grown in beds or large containers. Produces many little elongated-teardrop shaped fruits. Harvest fruit when small for the most tender skin, the fewest seeds and sweetest flavor. The fruits are glossy white, have a green calyx and will set in clusters. Excellent sliced for grilling or sauteed.

HANSEL - 7684

25-36 in. - 7,800 S. (F-1 Hybrid). (All America Winner-2007). 55 days. The stunning, glossy, dark-purple fruits are borne in finger-like clusters and display a contrasting, bright-green calyx color. Great for smaller gardens. An abundance of fruit is produced so be prepared to bake, broil, stew, or grill these tender non-bitter fruits.

- Each of the above: (26G4) 50 sds-\$9.20; 100 sds-\$15.40; 250 sds-\$32.20; 500 sds-\$55.80; 1,000 sds-\$99.15

LAVENDER TOUCH - 7696

6,000 S. (F-1 Hybrid). 60 days. A mild, sweet variety that is beautiful and productive. 6-7 oz. fruits are cylindrical-shaped and white with a lavender blush. High yielding, excellent flavor with no bitterness.

LITTLE FINGERS - 7647

6,000 S. 65 days. Certified organic. Unique, small fruited variety producing 5-8 in. slim, deep purple fruit. Determinate habit holds fruit above ground.

- Each of the above: (28B4) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

(continued on next page)

EGGPLANT (continued)

LONG PURPLE ITALIAN - 7491

6,000 S. Heirloom. 70-80 days. Dark purple with a green calyx. Slender and cylindrical, fruits become about 8 in. long and are mildly flavored. This variety dates back to the 1850's in America. A classic Italian eggplant, best when harvested young. Wonderful for adding to stir-fries or any eggplant dish.

- (31C4) 1,000 sds-\$5.85; 2,000 sds-\$8.10; 5,000 sds-\$14.50; 10,000 sds-\$23.50; 25,000 sds-\$49.25

PINSTRIPED - 7714

* 6,000 S. (F-1 Hybrid). 60-65 days. Unusual light purple fruits with streaks of white. This is an Italian variety that will produce a 4-5 oz. fruits. Especially bred for container gardens. Basil branching habit.

- (25D4) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

TURKISH ORANGE - 7888

10,000 S. 65-85 days. A unique, brilliant 3 in. orange fruit, sweet and fragrant when freshly cut. Best eaten once fruits are tennis ball-sized or when slightly orange with green striping. Great when stuffed.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

TWINKLE - 7693

24 in. - 6,000 S. (F-1 Hybrid). 50-55 days. Fruit has fantastic flavor, firmness and texture. The variegated oval-round fruits are lovely combination of plum and white with a light green calyx.

- (26F4) 50 sds-\$8.55; 100 sds-\$14.10; 250 sds-\$29.30; 500 sds-\$50.70; 1,000 sds-\$89.85

TYCOON - MILLIONAIRE - 7715

5,000 S. (F-1 Hybrid). Ichiban Improved. 59 days. A definite improvement over Ichiban with a smaller seed cavity. Shiny, medium purple fruit is shaped long (8-10 in.) and very slim (1-1/4 in.), similar to a cucumber. Adaptable for slicing, frying and baking. Heavy producer.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

WHITE

Crop failure. As a substitute, we suggest Cloud Nine.

ENDIVE

Escarole

20,000 sds/oz 65° 14 days

1 oz. for a 100 ft. row. 2 lbs. will plant an acre with rows 18-24 in. apart. About 4 lbs. per acre when direct seeding. Tie outer leaves if you want to blanch the centers.

BATAVIAN BIANCA SALAD - 7800

⌘ 19,500 S. Heirloom. 40 days. The baby leaves are finely cut and fringed. Leaves are light green with a pink accent. Good growth habit under adverse weather conditions, easy blanching. Zones: 4-7

BATAVIAN FULL HEART - 7890

⌘ 14,000 S. 90 days. Large thick dark green leaves, compact head, easy blanching. Zones: 4-7

- Each of the above: (31B4) 1,000 sds-\$5.85; 2,000 sds-\$6.85; 5,000 sds-\$11.65; 10,000 sds-\$18.40; 25,000 sds-\$37.70

KALE

DWARF GREEN CURLLED - 7722

8,000 S. Finely curled bluish green leaves.

- (30A5) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

RED BOR - 8199

8,000 S. 55 days. Highly decorative with lots of crinkled purple-red leaves. Redness and curling are enhanced by cold weather.

- (26A5) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

RED RUSSIAN - 8200

24-30 in. - 8,500 S. 45-60 days. Attractive, green-red frilly leaves that are tender, sweet and highly nutritious. Tall growth habit.

- (30B5) 500 sds-\$5.85; 1,000 sds-\$7.70; 2,000 sds-\$11.50; 5,000 sds-\$21.95; 10,000 sds-\$37.25

KOHLRABI

6,000 sds/oz 70° 7 days

For the best germination, cover seeds lightly after sowing. Darkness will help germination. 1/2 oz. will plant a 100 ft. row; 3-5 lbs. an acre in 18 in. rows, when direct seeding. For the best flavor, harvest when plants are young.

EARLY PURPLE VIENNA - 7733

10,000 S. 55-69 days. Purple skinned bulbs with greenish white flesh. Small tops. Slightly larger and later than Early White Vienna.

- (31B4) 1,000 sds-\$5.85; 2,000 sds-\$6.85; 5,000 sds-\$11.65; 10,000 sds-\$18.40; 25,000 sds-\$37.70

EARLY WHITE VIENNA - 7732

8,000 S. Heirloom. 55 days. Mild creamy white flesh; when cooked has a more delicate flavor than turnips. Edible bulb grows above the ground and should be eaten when young (2-2 1/2 in. across).

- (31C5) 1,000 sds-\$5.85; 2,000 sds-\$8.10; 5,000 sds-\$14.50; 10,000 sds-\$23.50; 25,000 sds-\$49.25

KOHL RABI (continued)

GRAND DUKE - 7731

7,000 S. (F-1 Hybrid). (All America Winner - 1979). 50-55 days. Vigorous, semi-globe in shape.

- (K019) 100 sds-\$5.85; 200 sds-\$8.85; 500 sds-\$12.40; 1,000 sds-\$15.90

WINNER

Crop failure. As a substitute, we suggest Grand Duke.

LEEK

10,000 sds/oz

1 oz. will plant a 100 ft. row; 2-3 lbs. an acre in rows 18 in. apart. About 3-4 lbs. per acre when direct seeding.

BROAD SCOTCH - 7796

7,000 S. London Flag. Heirloom. Thick, straight necks. A close relative within the Allium family, popular since ancient cultivation. A welcome addition to sauces, gravy and soups.

- (31C5) 1,000 sds-\$5.85; 2,000 sds-\$8.10; 5,000 sds-\$14.50; 10,000 sds-\$23.50; 25,000 sds-\$49.25

LETTUCE

15,000 sds/oz 70° 7-12 days

1/2 oz. for a 100 ft. row; 3 lbs. will plant an acre with rows 6-12 in. apart. Plants are readily transplanted in plant bands. Lettuce is high in iron and magnesium. Will add tone to the liver and spleen.

ALANIS

Crop failure. As a substitute, we suggest Buttercrunch.

BABY STAR - 7884

4-5 in. - 24,500 S. 65 days. Romaine type. Miniature romaine type with crisp texture and dark, shiny green leaves. Holds against early bolting.

- (29C4) 250 sds-\$6.80; 500 sds-\$10.90; 1,000 sds-\$18.10; 2,000 sds-\$30.70; 5,000 sds-\$66.75

BIBB FORCING - 7822

29,500 S. Heirloom. 60 days. Bibb type. Fine flavor, dark green leaves, firm and tender. Good for forcing.

BLACK SEEDED SIMPSON - 7811

25,000 S. Heirloom. An excellent variety that stands heat well.

BUTTERCRUNCH - 7825

25,000 S. (All America Winner - 1963). 60 days. Bibb type. Quite compact, heavy butterhead; crisp, but juicy. Should replace regular Bibb. Very tender.

GREAT LAKES - 7816

26,000 S. (All America Winner - 1944). Heirloom. 82 days. Head/iceberg type. Large heads with crisp, well-folded and fine-flavored leaves. Very well adapted to hot and adverse conditions.

- Each of the above: (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

LETTUCE (continued)

MESCLUN MIXTURE - 7807

26,000 S. (Bon Vivant Blend). 25 days. Contains only Lettuce varieties: Oak Leaf, Paris Island, Prizehead, Red Sails, Salad Bowl, and Simpson Elite. Mesclun is a French term for a mixture of tender, young red and green lettuce leaf varieties. Shake each package before sowing, to provide a balanced blend, begin harvesting in 3 weeks by trimming off the tops of the young plants.

OAK LEAF - 7813

31,000 S. Heirloom. 45 days. Leaf type. Early variety, tender and long standing. Deep green leaves. Heat resistant.

PARIS ISLAND COS - 7826

42,000 S. Heirloom. 70 days. Romaine type. Tall, compact, dark-green plant. Slightly curly leaves with creamy-white hearts. Good bolt resistance, crisp, sweet flavor and high disease resistance.

PRIZEHEAD - 7814

25,000 S. Heirloom. 55 days. Leaf type. Despite the name, it is a non-heading, leaf lettuce. The leaves are upright, deeply curled, broad, and light green with a shading of red.

- Each of the above: (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

RED SAILS - 7810

21,000 S. (All America Winner - 1985). 45 days. Leaf type. Loose-leaf type with an open head forming a full center. Crinkled leaves are a bronze-red color containing nutritional vitamins A and D.

- (31C5) 1,000 sds-\$5.85; 2,000 sds-\$8.10; 5,000 sds-\$14.50; 10,000 sds-\$23.50; 25,000 sds-\$49.25

ROMAINE RED - 7902

34,000 S. Heirloom. 70 days. Romaine type. Often used in Caesar salads, this attractive lettuce has long, crunchy, spoon-shaped leaves with red fringes and a large vein. The tender inner leaves have a yellowish rib and surround a sweet, crispy, creamy heart.

- (34A4) 5,000 sds-\$7.15; 10,000 sds-\$10.65; 25,000 sds-\$20.25; 50,000 sds-\$33.75

ROUGE DE HIVER - 7903

35,700 S. Heirloom. 55-65 days. Romaine type. Extremely beautiful European heirloom, large flat broad leaves are sweet with a buttery texture. Commonly used as a baby leaf variety, but also makes a stunning full size head. Color varies from green to bronze to deep red. Quick growing, very heat resistant (if kept watered) and will also grow well into the cooler months. Disease resistant.

SALAD BOWL (GREEN) - 7815

34,000 S. (All America Winner - 1952). 50 days. Leaf type. Large, bright green leaves. Early variety, tolerant of summer heat without becoming bitter.

SALAD BOWL RED - 7901

50 days. Leaf type. Large upright, long deep lobed bronze leaves with bronze-red inner blanched leaves. Good keeper and decorative. Slow to bolt for long harvest.

- Each of the above: (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

LETTUCE (continued)

SILVIA - 7904

35,700 S. 25-45 days. Romaine type. Beautiful dark red burgundy cos with large flat broad leaves. Sweet taste and buttery texture. Quick growing for baby leaf, very heat resistant (if kept watered) and also grows well into the cooler months.

SIMPSON ELITE - 7809

33,000 S. 45 days. Leaf type. An improved Black Seeded Simpson type. Fast to grow, slow to bolt. Large, loose heads with light green leaves that have crumpled, frilled leaves. Holds its flavor without bitterness.

- Each of the above: (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

LETTUCE, SIMPLY SALAD

65°-73° 35 days

These unique multi-seeded pellets contains 3 or more seeds each of different mix greens. A very special benefit is the fact that the various seeds in each pellet will germinate right around the same time, ensuring that maturity is even at sales time. Can be sold in 4-6 in. pots and color bowls, then enjoyed as both a colorful, mixed-texture ornamental and a delicious, nutritious edible. Can be sown direct into the final container, cutting down an already short crop time. Harvest every 3 weeks by cutting back to 2 in. for more fresh salad. Cooler temperatures with high light will enhance foliage color. Fill vegetable sales void in early Spring and Fall.

ALFRESCO BLEND - 8187MP

Red and green leaf lettuces with arugula, endive and radicchio give a true Mediterranean flavor and look. MULTI-SEED PELLETT which will include multiple seeds of each variety in one easy to sow pellet.

CITY GARDEN BLEND - 8188MP

Traditional mix of red and green lettuces that are easy on the palate. MULTI-SEED PELLETT which will include multiple seeds of each variety in one easy to sow pellet.

GLOBAL GOURMET BLEND - 8189MP

Red, green and purple leaf lettuces and Asian greens make a mix of Asian flavors great in salads or stir-fry. MULTI-SEED PELLETT which will include multiple seeds of each variety in one easy to sow pellet.

- Each of the above: (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

MELON

800 sds/oz 80° 10 days

HONEY DEW - 7841

850-900 S. 90 days. Very sweet green flesh. Fruits are 8 in. long and 6 in. across with smooth ivory skin.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

MUSKMELON, CANTALOUPE

800 sds/oz 80° 10 days

1 oz. of seed will plant 50 hills; 3 lbs. per acre. Rows should be about 2 ft. apart with hills 4 ft. apart in the row. About 1/2 oz for 100 ft. row. Plant Radishes between the rows to repel Cucumber beetles. For the sweetest melons - about 2 weeks before the melons should ripen, start withholding water. This is called "water stress" and the frantic vines will pour sugar into the fruits to sustain them. A melon is ripe when the first leaf on the stem turns pale and begins to brown.

BURPEE HYBRID - 7831

1,000 S. (F-1 Hybrid). 82 days. The heavily netted fruits are distinctly ribbed, round to slightly oval, averaging 7 in. long, 6 in. across and weigh 4 to 4 1/2 lbs.. Flesh is deep orange, thick, firm, juicy and one of the most delicious flavor. Vines are vigorous growing and produce good early yields of large fruited melons.

ECLIPSE - 7893

1,000 S. (F-1 Hybrid). 85 days. Matures early and fruit weighs in at 5-7 lbs., oval shaped and approximately 6 by 8 in. The rind has a medium net and light sutures. The flesh is dark orange, firm, sweet and smooth in texture. Great for summer breakfasts, snacks and deserts. The plant is hardy-resistant to fusarium wilt and powdery mildew.

FASTBREAK - 7830

1000 S. (F-1 Hybrid). 65 days. Excellent flavor and sweetness with these 3-4 lbs. ribbed, well netted fruits. Disease resistant and high yielding. Orange flesh, coarse netting.

- Each of the above: (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

HALE'S BEST JUMBO - 7833

1,000 S. 85 days. Thick, salmon flesh. Oval shaped fruit, heavy netting. 3 1/2 to 5 lbs. each.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

MUSTARD

15,000 sds/oz 70° 10 days

1 oz. will plant a 200 ft. row. Space plants 6 in. apart in rows 12 in. apart. About 4 lbs. per acre.

EARLY MIZUNA - 8212

60 days. Very prolific branching habit and cold tolerance. It vigorously produces as many as two hundred stems with serrated leaves. Mild and tasty when young, it adds a nice flavor to salads and becomes only mildly mustardy when mature making it ideal for braising or steaming. Can be harvested over a fairly long period. Slow to bolt.

GIANT RED - 8210

14-18 in. - 17,000 S. 70-80 days. An attractive, flavorful and oversized mustard. Leaves are maroon in color with light green midribs and narrow stems. Slow to bolt and extremely winter hardy. Widely used as a fall ornamental variety.

GREEN WAVE (TENDERGREEN) - 7863

12,500 S. (All America Winner - 1957). Heirloom. 42 days. Longest standing, dark green curled mustard. When mature, will stand a long time before going to seed.

- Each of the above: (31B4) 1,000 sds-\$5.85; 2,000 sds-\$6.85; 5,000 sds-\$11.65; 10,000 sds-\$18.40; 25,000 sds-\$37.70

order by phone at 800.380.4721 or online at germaniaseed.com

Okra.

Also see listing under Annuals.

OKRA

400 sds/oz 65°-70° 7-10 days

For the best germination, soak seed 5 days before sowing. 1 oz. of seed per 50 ft. row. Pick the pods when they are young and not too large. About 8 lbs. per acre. The pods will offer excellent flavor in soups, stews and other relishes. It can also be used alone as a vegetable.

ANNIE OAKLEY II - 8046

(F-1 Hybrid). 42 days. A high yielding, spineless hybrid. Compact plant that allows high-density planting. Pods are long and slender with a high degree of uniformity and holds well at tender state. Early maturing variety when compared to open pollinated varieties.

- (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

ONION

8,000 sds/oz 65°-70° 10 days

For selling onion plants in flats, seed 7-10 seeds per in. of row and 1 1/2 to 2 in. apart in row about 6 weeks before offering the plants for sale. Short day length varieties like Bermuda and Sweet Spanish have been particularly good sellers. An oz. will plant a 100 ft. row; 3-4 lbs. an acre in rows 18 in. apart. If plants start to stretch, they can be cut back for dense growth. Darkness will help germination. Many customers have inquired about the health advantages on Quercetin. Quercetin is the onion chemical that fights the formation of blood clots and may protect you from elevated levels of cholesterol. It is found in the yellow and red onions, but almost none in white onions and only in some forms of garlic. To stop the itching and stinging of a bee or mosquito bite, rub the area with an onion. Eating raw onions will help flush fat from the body and lower cholesterol. Herbalists used raw onions to treat dysentery and other hot climate diseases. George Washington ate a hot, roasted onion before he went to bed whenever he had a cold. Be kind to your eyes - place raw onions in the freezer for 30 minutes before cutting and this will eliminate tearing.

CANDY - 7882

7,000 S. (F-1 Hybrid). 100 days. A day neutral variety producing early maturing jumbo onions, golden-straw colored, with a sweet, mild flavor.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

EVERGREEN LONG WHITE BUNCHING - 7873

9,500 S. Heirloom. 100 days. Long, silvery white stalks. Does not form bulbs under moist conditions.

- (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

ONION (continued)

RED BURGUNDY - 7878

8,000 S. 95 days. Red Hamburger. Smooth, glossy skin, purplish-red in color. Flesh is white with pink shading near the skin. Good keeper. Short day.

SWEET SPANISH, UTAH STRAIN - 7874

9,000 S. (Yellow Sweet Spanish). 115 days. Yellow skin, 5 in. across globe-shaped, quite mild, sweet flesh. Long day, good keeper.

TEXAS GRANO 1015 - 7881

9,000 S. 168 days. Large, sweet flavored globe shaped variety with light yellow flesh. High yielding and a good keeper. Good keeper. Short day.

VIDALIA - 7880

8,000 S. 80 days. Very sweet with light yellow flesh and oblate in shape. High yielding variety with consistently uniform production. Short day.

WALLA WALLA SWEET - 7883

6,500 S. Heirloom. 110 days. Very sweet and juicy variety. Popular with home gardeners everywhere.

WHITE SWEET SPANISH - 7875

7,000 S. 110 days. White skin, 5 in. across globe shaped. Quite mild, sweet white flesh. Good keeper. Bunching type.

- Each of the above: (31B5) 1,000 sds-\$5.85; 2,000 sds-\$6.85; 5,000 sds-\$11.65; 10,000 sds-\$18.40; 25,000 sds-\$37.70

PARSLEY

10,000 sds/oz 75°-80° 5-10 days

1/4 oz. for a 100 ft. row. Seed 9-10 weeks before offering plants for sale. Transplant pots 15-21 days after seeding. For the best germination if you are direct seeding, freeze seed 3-5 days and soak in warm water 3-5 days before sowing. Cover seed lightly; darkness will help germination. About 3 lbs. per acre when direct seeding. Ideal as a garnish or in soups or salads. Fresh Parsley is a breath aid and natural diuretic. Add to tea, it will relieve the pain from rheumatism. Early herbalists believed this herb to aid kidney problems, high blood pressure, fluid accumulation, and a substitute for quinine to treat malaria. It is very high in Vitamins A and C.

EXTRA CURLED DWARF OR

Moss Curled - 7899

14,000 S. Heirloom. 70 days. 12-15 in. Finely curled, compact, dark green; very productive.

HAMBURG ROOTED - 7895

19,000 S. (Arať). 90 days. Root 8-10 in. long, parsnip-like, used for flavoring. Leaves plain, deeply cut, hollow stem.

PLAIN (SINGLE OR ITALIAN) - 7896

12 in. - 13,000 S. Heirloom. 72 days. Plain, deep cut, dark green leaves with a rich strong flavor.

- Each of the above: (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

PEAS

About 1,000 S. per lb.; 2 lbs. for a 100 ft. row. Plant in rows 20 in. apart. About 100 lbs. per acre when direct seeding.

LITTLE MARVEL - 7922

100-150 S. 64 days. The most satisfactory pea in the average home garden. Very productive, hardy, luscious and sugary.

OREGON SUGAR POD II - 7852

24-30 in. - 110 S. Very productive Snow Pea with 3-4 in. long, 1/2 in. wide edible pods that are sweet and crispy. The shorter vines can be grown without support. Seed treated with Captan.

SUGAR SNAP - 7923

100-150 S. (All America Winner - 1979). 70 days. The entire pod can be eaten when fully mature. The pod flesh is thick and tender and filled with very sweet, delicious peas.

- Each of the above: (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

PEPPER, HOT

4,000 sds/oz 75° 10-15 days

For quick germination, soak 3-4 days in water before sowing. Sow 6-7 weeks before outdoor planting. Transplant 10-15 days after seeding; germinate seed warm. Space 16 x 24 in. About 1/4 oz. for a 100 ft. row or 3 lbs. per acre if direct seeding. Tobacco users should not come in contact with seedlings to prevent Tobacco Virus.

Hot peppers and the capsicum oil in hot peppers can not be neutralized by water. Wash hands or rinse mouth in vinegar to alleviate discomfort in an emergency. Bread, bananas, pasta, or potatoes will alleviate any burning sensation. Never touch your face or eyes after handling hot peppers. (Warm growing temperatures develop the hottest peppers). Hot peppers are rated by their Scoville level. (The higher the number, the hotter the Pepper). The rating we list is for normal, moderate conditions. Peppers grown under stress, high temperatures and high humidity will be 10-15 times hotter after drying. Hot or Chili Peppers will help relieve respiratory problems, prevent blood clots, help lower cholesterol, will speed up metabolism and lower the risk of heart related problems.

ANAHEIM - 7945

3,000 S. 77 days. Very pungent chili type. Long, tapered dark green fruits 7 in. long by 1 1/2 in. wide turning red when ripe. Popular in Chili rellenos. Also known as the New Mexican Chile, this medium hot fruit is deep green but turns red at full maturity. Excellent used fresh, dried or frozen. 3,000 Scovilles.

- (30C4) 500 sds-\$5.95; 1,000 sds-\$8.60; 2,000 sds-\$13.10; 5,000 sds-\$25.55; 10,000 sds-\$43.70

BIG BOMB - 7982

24-30 in. - 2,500 S. (F-1 Hybrid). 62-67 days. Truly the favorite among pickling cherry peppers. Produces enormous loads of thick-walled 2 x 2 in. green to brilliant-red, medium pungency fruits. The plant habit is more vigorous and making it better able to withstand a wide variety of growing conditions. 2,500-5,000 Scovilles.

- (25D4) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

**TODAY... with over 80 years of experience,
our greatest asset is still Quality and Service**

VEGETABLES

PEPPER HOT (continued)

BIG JIM (NUMEX) - 8161

3,000 S. 75-80 days. The largest of the Chile peppers, with medium-hot fruits measuring 10-12 in. long and weighing up to 4 oz. Excellent for Chile Rellenos. Sturdy 24-36 in plants yield 24-30 pods per plant which tend to ripen all at the same time. 1,500-2,500 Scovilles.

- (30C4) 500 sds-\$5.95; 1,000 sds-\$8.60; 2,000 sds-\$13.10; 5,000 sds-\$25.55; 10,000 sds-\$43.70

BULGARIAN CARROT - 7547

18 in. - 65-68 days. Compact, 18-inch plants. Fruits are 2 to 3 1/2 in. long and carrot shaped. Ripens from green to fluorescent orange with a fruity favor that finishes hot. Thin-walled fruits grow in clusters close to the stem. Perfect for roasting, pickles, and salsas. 2,000-5,000 Scovilles.

- (28F4) 100 sds-\$7.25; 200 sds-\$11.70; 500 sds-\$23.85; 1,000 sds-\$40.95; 2,000 sds-\$72.30

CARIBBEAN RED - 7947

7,500 S. (F-1 Hybrid). 100 days. VERY HOT, about twice the heat of Habanero! Fruits are 1 1/2 x 1 in. and mature to a bright red. Excellent in salsas, chutneys, marinades and sauces. 450,000 Scovilles.

- (29B4) 250 sds-\$5.85; 500 sds-\$8.90; 1,000 sds-\$14.65; 2,000 sds-\$24.55; 5,000 sds-\$52.85

CAYENNE (LONG SLIM RED) - 7952

4,500 S. Heirloom. 70 days. Long skin, 6 x 1/2 in. green fruits turning red when mature. Slender, twisted, elongated peppers are fiery hot. An essential ingredient in many spicy foods, they can be used fresh or dried. Green fruits mature to red. For pickles, canning or drying. 5,000 Scovilles.

- (30A4) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

CHILE DE ARBOL - 7905

7,250 S. 80 days. Narrow, curved chiles that start out green and mature to bright red. Very hot and resembles a little Cayenne pepper. Be careful during preparation, these are the ones that are dried after turning red and used in many holiday wreaths. 15,000-30,000 Scovilles.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

CONCHOS - 7939

4,000 S. 70 days. Jalapeno type. 1 oz. fruits are larger and earlier than Jalapeno. Good producer. 2,000 Scovilles.

- (26E4) 50 sds-\$7.85; 100 sds-\$12.85; 250 sds-\$26.45; 500 sds-\$45.55; 1,000 sds-\$80.65

FRESNO CHILE - 7908

4,500 S. 75-80 days. Produces good yields of 3 in. long by 1 1/4 in. wide hot peppers. Fruits turn from green to red when mature. Excellent for roasting, pickling, or for making salsa. Tobacco Mosaic resistant. 5,000-10,000 Scovilles.

- (30C4) 500 sds-\$5.95; 1,000 sds-\$8.60; 2,000 sds-\$13.10; 5,000 sds-\$25.55; 10,000 sds-\$43.70

PEPPER HOT (continued)

HABANERO - 7984

7,000 S. 90-100 days. Blazing hot fruit is excellent for sauce production and blending. The wrinkled fruit taper to a point and measure 2 in. by 1 in. The thin flesh is light green to orange-pink at full maturity. One of the hottest peppers, excellent for chili or homemade salsa. Fruit and seeds can be used fresh or dried as seasoning for foods. 200,000-350,000 Scovilles.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

HUNGARIAN YELLOW WAX HOT - 7956

4,500 S. (Hungarian Hot Banana). Heirloom. Tapering 6 in. x 1 1/2 in. long fruit is yellow, turning red when mature. Banana-shaped fruit starts out yellow and turns red when ripe. Perfect for pickling. Plants are strong and upright. 4,000 Scovilles.

- (30A4) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

INFERNO - 7944

4,500 S. (F-1 Hybrid). 60 days. A heavy yielding, moderately hot banana pepper. Large 1 1/2 in. x 8 in. fruits are ultra smooth with medium thick flesh and outstanding flavor. Fruit ripens from lime green, to orange and to red. 12,000 Scovilles.

IXTAPA - 7917

24 in. - 3,500 S. (F-1 Hybrid). 75-80 days. Jumbo size, disease resistance and productivity, a nearly perfect Jalapeno. Large fruit of 3-4 x 1 1/2 in. mature from green to red, taper to a point and are thick walled. Great in salsa, cut into rings for nachos and stuffed for a sizzling appetizer. Not for the faint at heart, be sure to serve with a cold drink. 5,000 Scovilles.

- Each of the above: (25C4) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

JALAPENO - 7961

3,000 S. 72 days. Dark green tapered fruit 3 x 1 in. , deep green fruit mature to an intense red. Add some spice to your salsa with these tapered chili peppers! Plants have a long harvest period. Also good for pickling, drying, roasting and stuffing. Good for picking or fresh market. 5,000-8,000 Scovilles.

JALAPENO EARLY - 8160

6,250 S. 60-68 days. Just like the traditional Jalapeno but earlier and better adapted to cool coastal conditions. Thick-walled, 3 in. cone-shaped fruits ripen to red. Hottest when fully ripe. 3,000-4,000 Scovilles.

- Each of the above: (30A4) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

KUNG PAO (BALADA) - 7913

4,000 S. 85 days. The 30 in. tall plants are covered with 4-5 inch green and red peppers that are only 3/8 inch wide. Very popular with stir-fry and Asian cooking. A hot pepper that can be eaten by some in seasoned dishes. Balada is the original name that it was first sold under in the U.S. 10,000 Scovilles.

- (26C4) 50 sds-\$6.45; 100 sds-\$10.30; 250 sds-\$20.70; 500 sds-\$35.30; 1,000 sds-\$62.15

PEPPER HOT (continued)

LARGE RED CHERRY HOT - 7964

5,000 S. Heirloom. 75 days. Fruits are nearly round, 1 to 1 1/4 in. in diameter. Very productive. 2,000 Scovilles.

- (30A4) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

MUCHO NACHO - 7958

3,000 S. (F-1 Hybrid). 68 days. A larger version of Jalapeno that develops to 4 in. long fruit that is fatter and thicker than the standard Jalapeno, but without all of the heat. Dark green, turning to red when ripe. Excellent for salsa and sauces. The red fruits are often smoked over mesquite wood. Disease resistant. 4,500 to 6,000 Scovilles.

- (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

PORTUGAL - 7906

1,000 S. 60-65 days. This vigorous, upright plant supports a large number of 6-7 in. long, thin, wrinkled fruits that are dark green and ripen to a brilliant, glossy red. Fiery hot, pointed shape, heavy yields, twice as large as old Giant Cayenne. 5,000 Scovilles.

SCOTCH BONNET ORANGE - 7907

75-100 days. Flaming-hot orange variety extremely hotter than habanero! Orange, rounded and tapered, thin-fleshed 2 in. fruit ripens from green to orange. Great for adding heat to salsas, sauces, chili and any Mexican or Caribbean dish. Pickle it if you dare, but not for the faint of heart. 200,000- 350,000 Scovilles.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

SERRANO CHILI HOT - 7977

6,000 S. (Red Chili Hot). Heirloom. 75 days. Very pungent fruit, 2 1/4 in. long and 1/2 in. in diameter. Slim, club shaped green peppers with medium thin walls maturing to a bright red color on 30 in. tall plants. This chili-type pepper bears slim fruit with thick flesh having a crisp, fresh, spicy taste. Use for pickling and sauces. 30,000 Scovilles.

- (30A4) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

SUPER CHILI - 7937

5,000 S. (F-1 Hybrid). (All America Winner - 1988). 75 days. A hybrid producing 2 1/2 in. x 1 1/2 in. cone shaped, elongated green fruit, turning red at full maturity. Semi-compact habit, well branched, heavy producer of very hot fruits. One of the most pungent chili peppers. Grows in upright clusters, turns orange, then ripens to red. Ideal for containers on the patio or windowsill. Often used in Thai and Asian dishes. 80,000 Scovilles.

- (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

(continued on next page)

PEPPER HOT (continued)

TABASCO G - 7915

6,500 S. 76 days. A high yielding, very hot and pungent flavored 2 in. long peppers that develop from yellow-green to red when fully mature. A tall plant; fruits grow almost erect from branches. 50,000 Scovilles.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

THAI HOT - 7988

6,500 S. 70 days. Very hot variety. Small, slim dark green peppers that are about 1 in. long. When mature, they will ripen to a bright red and are very hot. Both colors appear on the plant at the same time, making this variety ornamental as well as edible. Thin-fleshed peppers are ideal in Asian dishes. A heavy producer of fruits. 35,000 Scovilles.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

PEPPER, MILD

Please refer to cultural information at the beginning of the Pepper section.

BLACK HUNGARIAN - 7996

4,800 S. 82 days. Highly ornamental in the field and on the plate. Green foliage is highlighted by purple veins and beautiful purple flowers. Sturdy plants produces 2-3 inch fruits similar in shape of a Jalapeno. Flesh is more black than red when ripening. Great in salsa and other Southwest dishes for mild heat and delicious flavor. 1,200 Scovilles.

- (29B4) 250 sds-\$5.85; 500 sds-\$8.90; 1,000 sds-\$14.65; 2,000 sds-\$24.55; 5,000 sds-\$52.85

CAJUN BELLE - 7998

4,000 S. (All America Winner). 61 days. Small bell peppers about 2 in. x 3 in. with 3-4 lobes. Fruits are both sweet and mildly spicy. When left on the plant, fruits will change color from green to scarlet and finish red, filled with vitamin C. Compact plants are 2 feet tall and wide, a perfect stature for containers. Delicious when just picked and can also be enjoyed green or red for salsas. 100-1,000 Scovilles.

- (25C4) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

PEPPER, MILD

Please refer to cultural information at the beginning of the Pepper section.

GARDEN SALSA - 7934

3,500 S. (F-1 Hybrid). 73 days. Beautifully shaped fruits are 8 in. long by 1 inch in diameter. Skin is smooth with medium thick walls and tapers to a point. Green fruit will turn red at full maturity. Ideal for making homemade salsa, not quite as hot as Jalapeno with a pungency rating of medium. 2,500-4,000 Scovilles.

- (26F4) 50 sds-\$8.55; 100 sds-\$14.10; 250 sds-\$29.30; 500 sds-\$50.70; 1,000 sds-\$89.85

PEPPER MILD (continued)

HOLY MOLE - 7993

24-36 in. - 2,500 S. (F-1 Hybrid). (All America Winner-2007). 85 days. The fruits measure 7-9 in. in length and 1 1/2 in. in width, and mature from green to a dark chocolate brown color. This pepper has a distinct taste, but not an overly spicy one. Can be sliced and placed on top of pizza or included in an enchilada casserole or mixed with your favorite Chipotle chicken dish. Mature brown peppers can be dried and ground for later use. 700-1,500 Scovilles.

- (25C4) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

JALAPENO TAM MILD - 7909

4,700 S. 67-73 days. The gringo pepper, very tasty mild Jalapeno type, with the same delicious flavor, but a lot less heat. Freezes and cans well, good for pickling, prolific producer, excellent yields and can be eaten raw, roasted or pickled 1,000 Scovilles.

- (30A4) 500 sds-\$5.85; 1,000 sds-\$6.45; 2,000 sds-\$9.20; 5,000 sds-\$16.85; 10,000 sds-\$27.90

JOE E PARKER (NUMEX) - 7910

3,500 S. 65-80 days. Produces heavy yields of 7 in. long by 1 1/2 in. wide fruits which turns from green to red when mature. All-purpose chile variety with thick, crunchy flesh with mild heat and a rich, delicious flavor. A Southwest favorite for stuffing (chile rellenos), grilling and roasting. The flesh is thick and crisp with a delicious mild heat and richly satisfying chile flavor. 1,500-3,000 Scovilles.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

MARIACHI - 7978

3,000 S. (F-1 Hybrid). (All America Winner - 2006). 65 days. Improved cone-shaped, 3-4 in. fruit ideally suited for gardens and patio gardens. A palatable pepper that is not too hot to eat raw. 500-600 Scovilles.

- (25D4) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

POBLANO - 7974

3,500 S. 75 days. Slightly hot, with a sweet flavor. Dark green 6 in. x 3 in. fruits mature to a chocolate-green color. Long, dark green chile peppers ripen to reddish brown. Mildly hot with a mellow, aromatic flavor. Great roasted and peeled, or use dried for chili powder. Thick walled fruits are ideal for fresh use, stuffing, roasted and used in rellenos or dried as an ancho. 3,000 Scovilles.

- (30C4) 500 sds-\$5.95; 1,000 sds-\$8.60; 2,000 sds-\$13.10; 5,000 sds-\$25.55; 10,000 sds-\$43.70

SAHUARO - 7983

30 in. - 3,100 S. (F-1 Hybrid). 68 days. An impressive yield and big fruit size of up to 9 in. A thick wall makes it perfect for roasting and slicing. 500 Scovilles.

- (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

PEPPER, SWEET

Please refer to cultural information at the beginning of the Pepper section.

BELL BOY - 7933

3,500 S. (F-1 Hybrid). (All America Winner - 1967). 70 days. 4 1/2 x 3 1/2 inch. Fruits are uniformly thick walled, 4 lobed deep glossy green. An early, heavy yielding variety that is disease and virus resistant.

- (26E4) 50 sds-\$7.85; 100 sds-\$12.85; 250 sds-\$26.45; 500 sds-\$45.55; 1,000 sds-\$80.65

BETTER BELLE - 7927

4,000 S. (F-1 Hybrid). 65 days. Very blocky, thick walled 4 1/2 in. x 3 1/2 in. four-lobed green fruits turning red when ripe. Heavy producer, disease resistant.

BIG BERTHA - 7942

3,000 S. (F-1 Hybrid). 70 days. The largest pepper on the market. Fruits are deep green with thick flesh. It is not unusual for fruits to reach 8 to 10 in. long and 4 in. across. Great for salads and stuffing.

- Each of the above: (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

BIG RED - 7918

4,000 S. 75 days. Produces high yields of large, 3-4 lobed, very sweet fruits. Fruits turn from green to red when mature. Excellent for salads and stuffing.

- (29B4) 250 sds-\$5.85; 500 sds-\$8.90; 1,000 sds-\$14.65; 2,000 sds-\$24.55; 5,000 sds-\$52.85

BLUSHING BEAUTY

Crop failure. As a substitute, we suggest Lilac.

BOUNTY - 7936

4,000 S. (F-1 Hybrid). 65-70 days. A hybrid version of a Sweet Banana type. Very early, fruit are typically 9-10 in. long and 2 in. wide. Yellow to bright red.

- (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

CALIFORNIA WONDER 300 - 7916

4,000 S. 73-75 days. Similar to Early California Wonder, slightly larger and more uniform fruit, 4-3/4 in x 4 in. Fruit is are mostly 4-lobed, from green to red. Tomato Mosaic resistance.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

CARMEN - 7989

4,000 S. (F-1 Hybrid). (All America Winner - 2006). 75 days. Tapered 6 in. fruit is noticeably sweet in comparison to other in its class. Early, horn-style fruits turn red at maturity.

- (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

PEPPER SWEET (continued)

CHOCOLATE BEAUTY - 7949

4,000 S. (F-1 Hybrid). 70 days. Dark green skin ripens to a dark brown. Sweet, non-pungent fruits are 4 in. x 3 1/2 in. across. An interesting novelty to add color to your salads and cooking. Disease resistant.

- (25C4) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

CUBANELLE - 7953

4,500 S. Heirloom. 68 days. Larger, smoother frying type. Improvement over Italianelle. Fruit 6 in. x 2 in. and is tapered, pointed and somewhat roughened with a bright yellow-green color and a delicious pungent flavor.

- (30B5) 500 sds-\$5.85; 1,000 sds-\$7.70; 2,000 sds-\$11.50; 5,000 sds-\$21.95; 10,000 sds-\$37.25

CUTE STUFF RED - 7957

* 18-24 in. - 4,000 S. 62 days. This green to red, 3 x 2.5 in., apple-shaped mini bell variety has an excellent sweet taste and is perfect for fresh eating or stuffing. Gardeners will love the high yields, producing up to three times more than other peppers.

- (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

FAT 'N SASSY

Crop failure. As a substitute, we suggest North Star.

FLEXUM - 7994

24 in. - 3,000 S. (F-1 Hybrid). 65 days. Unique, as the fruit sit upright on a compact plant. Matures from ivory to red over the course of the growing season. The very sweet fruit measures 2-3 in. across the shoulder and 6-7 in. in length.

- (24A4) 10 sds-\$5.85; 25 sds-\$8.40; 50 sds-\$13.50; 100 sds-\$22.45; 250 sds-\$48.25

FRIARELLO (MELROSE) - 7981

5,000 S. Melrose-type pepper. Ideally suited as a frying pepper with long fruits and thin skin.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

GIANT MARCONI - 7912

30 in. - 5,000 S. (F-1 Hybrid). (All America Winner - 2001). 72 days. Bred in Italy, an early, heavy yielding variety that produces 6-8 in. green fruits that mature to a bright red. About 3 in. wide at the top, 3 lobed. A thin skinned variety that can be used in salads, roasted on the grill, or pan fried with tomatoes and egg plant. A heavy yielding hybrid of the Melrose type with all America honors. Disease resistant.

- (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

GOLDEN CALIFORNIA WONDER - 7954

4,000 S. Heirloom. 70 days. Same as California Wonder except peppers are bright gold, changing to orange-red when mature.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

PEPPER SWEET (continued)

GOLDEN SUMMER - 7928

4,000 S. (F-1 Hybrid). 67 days. Early, 4 lobed 4 in. x 3 in. blocky fruits ripen from lime-green to a bright golden yellow. Glorious yellow color adorns these crunchy, four-lobed fruits. Blocky shape with a delicious taste. Sweet and refreshing for vegetable trays, sandwich wraps and salads, or use on pizza or in casseroles. Disease resistant.

- (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

GYPSY - 7943

4,000 S. (F-1 Hybrid). (All America Winner - 1981). 60 days. Very early, heavy producer. Fruits 5 x 3 in. long and are mostly 3-lobed with a pendant wedge shape. In the early stages, fruits are a yellowish-green color turning to orange-red when ripe. Compact growing variety that is disease and virus resistant. This variety is the leader in early, high yields. On an average, each plant will produce 35-38 fruits.

- (26E4) 50 sds-\$7.85; 100 sds-\$12.85; 250 sds-\$26.45; 500 sds-\$45.55; 1,000 sds-\$80.65

HUNGARIAN SWEET BANANA - 7955

4,000 S. (All America Winner - 1941). (Sweet Banana). Heirloom. 68 days. Tapering 6 in. x 1 1/2 in. long fruit is yellow, turning red when mature.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

IVORY - 7963

4,000 S. 65 days. A rich, creamy white blocky variety that matures to a bright yellow. Nice 3-4 in. lobed fruits are 4 1/2 x 3 1/2 in.

- (25B5) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

KEYSTONE RESISTANT GIANT - 7962

4,000 S. 80 days. Produces large 4 1/2 in. x 4 in., heavy fruit of blocky shape. Thick flesh with deep green color that turns red when mature.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

LADY BELL - 7920

4,500 S. (F-1 Hybrid). 71 days. Rich green, 3-4 lobed 4 x 3 1/2 in. green peppers maturing to a bright red. Disease resistant.

- (26E5) 50 sds-\$7.85; 100 sds-\$12.85; 250 sds-\$26.45; 500 sds-\$45.55; 1,000 sds-\$80.65

LILAC - 7965

4,500 S. 65 days. Unique lavender colored fruits mature to a bright crimson. Nice 3-4 lobed fruits are 4 1/2 x 3 1/2 in.

- (25C4) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

PEPPER SWEET (continued)

MARCONI GOLDEN - 7999

4,500 S. Heirloom. 90 days. Golden-yellow Italian sweet peppers are 3-lobed and up to 1 foot long. Traditionally used for frying, but also sweet and delicious when eaten fresh. Tremendous yield of clear golden, high quality fruit.

- (30C4) 500 sds-\$5.95; 1,000 sds-\$8.60; 2,000 sds-\$13.10; 5,000 sds-\$25.55; 10,000 sds-\$43.70

MINI BELLE SERIES

24 in. - 3,000 S. 65 days. Plants will produce an abundance of 1 1/4 x 1 1/4 in. miniature fruits. They are sweet, gorgeous and delicious! Fits nicely into small garden space or patio planters, making it just right for the home gardener. Excellent for gourmet dishes, stuffing and salads. Disease resistant.

Chocolate - 7990

Green to chocolate-brown.

Red - 7991

Green to red.

Yellow - 7992

Green to yellow.

- Each of the above: (28C4) 100 sds-\$5.85; 200 sds-\$8.65; 500 sds-\$16.95; 1,000 sds-\$28.65; 2,000 sds-\$50.10

MUSCATO (ORANGE BELL) - 8023

* (F-1 Hybrid). 75 days. Blocky 5x4 in. diameter fruits. Very thick walls, mostly 4 lobed, dark green to orange fruits. Heavy yielder and widely adapted. Tobacco mosaic resistant.

- (26A5) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

NORTH STAR - 7932

4,000 S. (F-1 Hybrid). 70 days. Early, 3-4 lobed 4 in. x 4 in. uniform fruits. Plants will set fruit under the most adverse conditions. Glossy green fruits will ripen to a bright red. Disease resistant.

- (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

ORANGE BLAZE - 7921

* 4,000 S. (F-1 Hybrid). (All America Selections Winner - 2011). 65 days. An early maturing bell pepper variety that has a sweet flavor which will reach its sweetest at the full orange color. Produces 3-4 in. long fruits about 1 1/2 in. wide with 2-3 lobes. High resistance to Bacterial Leaf and Tobacco Mosaic Virus.

- (25D5) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

PEPPERONCINI - 7972

5,000 S. (Italian Pepperoncini). 65 days. Tapered green fruit is 4 in. long and 3/4 in. wide. This popular, light green pepper has just the right amount of zing to add flavor and zest to Mexican-American cuisine, appetizers, and fresh or pasta salads. Harvest when still green. Very useful in the early stages, but will turn bright red when mature. For picking, canning, or salads.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

(continued on next page)

PEPPER SWEET (continued)

PIMENTO ELITE - 7925

3,000 S. (F-1 Hybrid). 72 days. A heavy producer of sweet, oval to heart-shaped fruit 3 in. x 3 1/2 in. with thick fleshy walls. Green, turning red when ripe. Disease resistant.

- (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

PIMENTO PERFECTION - 7976

4,000 S. Heirloom. 73 days. Standard sweet variety for home and market. Heart-shaped, smooth fruit 3 1/2 x 2 1/2 in. High yielding plant produces heavy-walled, heart-shaped fruit that starts green and matures to red. A mild, sweet pepper ideal for salads, garnishes and canning.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

PRITAVIT - 7979

28 in. - 2,250 S. (F-1 Hybrid). 75-80 days. Fruits have a deep ribbing and flattened shape. Mature full red fruit can average 2.5 by 4 in. The crisp flesh becomes deliciously sweet as it matures from green to an intense red color. Known as a Topepo type, common in Italy and other parts of Europe.

- (24A4) 10 sds-\$5.85; 25 sds-\$8.40; 50 sds-\$13.50; 100 sds-\$22.45; 250 sds-\$48.25

PURPLE BEAUTY - 7975

4,000 S. 70 days. A truly PURPLE pepper. The 4 in. x 3 1/2 in. blocky fruits have thick flesh and is highly productive. Slice the fresh peppers up and add bright color to salads or vegetable trays and cooking. Also use for stuffing or to season cooked casseroles.

- (29B4) 250 sds-\$5.85; 500 sds-\$8.90; 1,000 sds-\$14.65; 2,000 sds-\$24.55; 5,000 sds-\$52.85

RED BARON - 7995

3,000 S. (F-1 Hybrid). 70-72 days. An early-main season bell with excellent red quality that works well for fresh market or processing. The smooth, blocky, thick-walled fruits are medium large and mature from green to red. Resistant to Tobamo Po.

- (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

RED KNIGHT - 8451

2,500 S. (F-1 Hybrid). 72 days. Large, thick walled fruit that measures 4-1/2 in. wide and long. The shiny, attractive fruits ripen from a dark green to an intense red color. The strong upright plants are tolerant to BLS (race 1, 2 & 3) and PVY.

- (25C4) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

PEPPER SWEET (continued)

ROUMANIAN SWEET - 7967

4,000 S. Heirloom. 50 days. Smooth, pale yellow fruits are 4 in. long, tapering to 2 in. at the tip, maturing to a bright red when ripe. Although called sweet, this variety does have a slight bite and is considered mild/hot by some. Attractive fruit has a wonderful sweet flavor and are great for eating fresh or ideal for frying.

SWEET CHERRY - 7986

4,000 S. 75 days. Smooth skin and thick-meat. Sweet flesh, shaped like cherries but of good size. Nice for salads, canning or pickling; can be used in the green stage or in the ripe stage which is red.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

SWEET HEAT - 7959

* 4,000 S. 56 days. The earliest to bear fruit, compact and bushy. A great choice for growers that want to ship larger containers with developing fruit on the plant. The 3-4 in. x 1.5 in. fruits are sweet and mildly spicy like the Pepperoncini, with a great smoky flavor. Can be harvested green or red and is perfect for grilling or salsa. Excellent for garden or patio containers.

- (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

SPANISH SPICE (ITALICO) - 7940

4,000 S. (F-1 Hybrid). 65-70 days. Non-pungent variety - not hot or sweet, but spicy. Dark green fruits are about 7 in. long by 1 3/4 in. across and thin walled for quick frying and grilling. Dark green fruits turn red when mature.

SUPER HEAVYWEIGHT - 7971

7,000 S. (F-1 Hybrid). 75 days. Unusually large size measuring 5 in. x 6 in. long. Beautiful, thick walled fruit is 4-lobed and ripens from jade green to a bright yellow gold. Thick walls hold up well for cooking or stuffing, remaining sweet, tender and juicy. A fresh, crunchy treat. Very flavorful. Disease resistant.

SWEET SPOT X3R - 7930

* 3,400 S. (F-1 Hybrid). 71 days. The best for humid and rainy climates. The flavor of these long yellow-to-red peppers is what gardeners are most excited about. The fruits are thicker walled and more fleshy than other Bananas and have a very mild and sweet flavor, without a hint of heat. Fruits are 8 in. long, tapering from 2 in. across at the shoulders to a blunt point. Great for stuffing and slicing as well as pickling and using as a garnish and condiment.

VALÈNCIA (ORANGE) - 7919

3,000 S. 70 days. 4 1/2 in. x 3 1/2 in. blazing orange fruits. An early, heavy yielding variety. Delicious, sweet-tasting, blocky fruit mature to a bright orange. Adds beautiful color to fresh salads, salsas and vegetable trays. Excellent for cooking and stuffing. Disease resistant.

- Each of the above: (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

YOLO WONDER - 7987

3,500 S. 70 days. 4 lobed, thick walled variety. Dark green 4 in x 4 in. fruit maturing to bright red. An excellent variety. Disease resistant.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

PUMPKIN

110 sds/oz 75° 7 days

1 oz. for about 15 hills; 3-5 lbs. per acre.

BIG MAX - 8000

100 S. 110-120 days. Largest pumpkin for faces or novelty its the choice of professional contestants Nearly round, 17-18 inches in diameter the fruits weigh an average of 100 lbs. Slightly rough, red-orange skin, bright yellowish 3-4 in. thick flesh. To achieve maximum size, grow one pumpkin per vine, water and fertilize regularly. Excellent for canning or pies.

- (28C5) 100 sds-\$5.85; 200 sds-\$8.65; 500 sds-\$16.95; 1,000 sds-\$28.65; 2,000 sds-\$50.10

BUMPKIN - 8003

300 S. (F-1 Hybrid). 85 days. A cutsie for small ornamental markets, but also has excellent edible qualities. Fruits are 2-3 in. and weigh about 1/4 lb. with dark orange color and strong dark green handles. Semi bush habit.

- (28E4) 100 sds-\$6.70; 200 sds-\$10.65; 500 sds-\$21.55; 1,000 sds-\$36.85; 2,000 sds-\$64.90

CONNECTICUT FIELD - 8013

210 S. Heirloom. 110 days. Large Yellow. Orange-yellow flesh. Flat on ends, smooth, hard rind. Each will weigh 18 lbs. and more.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

FIRST PRIZE - 8002

90 S. (F-1 Hybrid). 120 days. The size of this pumpkin will range from 50 lbs. to a whopping 150 lbs. with color superior to Atlantic types. This will be a great addition for those who want the biggest and best.

- (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

HOOLIGAN - 8001

500 S. (F-1 Hybrid). 95 days. Bicolored jack be little hybrid with orange and white mottled colors. Fruit weighs a 1/4 lb. Slice off the top, scoop out the seeds, replace the top and microwave for 4 minutes to enjoy its delicious flavor.

- (28C4) 100 sds-\$5.85; 200 sds-\$8.65; 500 sds-\$16.95; 1,000 sds-\$28.65; 2,000 sds-\$50.10

HOWDEN - 8010

190 S. 115 days. A beautiful, heavy yielding pumpkin with uniform deep-round shape and a rich orange color. Fruits weigh 20-30 lbs. each.

JACK O LANTERN - 8020

185 S. 75-115 days. All around great pumpkin for carving. Oblong fruits weigh 10-18 lbs. Smooth medium-orange skin with shallow ribs. Sweet fine grained pale orange flesh makes this also good for cooking.

- Each of the above: (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

VEGETABLES

PUMPKIN (continued)

JARRAHDALÉ - 8009

150 S. 100 days. Medium to large, avg. 6-10 lbs. Drum-shaped fruit with heavy, rounded ribs and slate-gray skin. Medium-sweet, thick orange flesh. Long storage and very decorative for fall displays and food use.

- (26A4) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

LUMINA - 8007

100 S. 95 days. Large and white. Excellent for both carving and painting. Fruits average 12-16 lbs. and shapes can vary from near globular to deeply oblate. Blue patches may appear on fruit under some growing conditions. Bright orange flesh. Stores well.

MINI TREAT - 8004

280 S. 70 days. Compact plant is perfect for smaller gardens or close planting in larger spaces. Fruit is set around the crown of the plant instead of spreading out on the vines. The little fruits all weigh about 1 lb. A true jack-o-lantern shape and dark orange color, with a sturdy green handle. Seeds are hull-less, good for roasting. Great for carving, but is also beautiful piled into a basket or hollowed out and used as a fall soup or desert bowl.

MINI WHITE (BABY BOO) - 8016

400 S. 95 days. Miniature variety, grows like Tiny or Jack Be Little. Immature fruits retain the best pure white color and best results are obtained when planted 2-4 weeks later than normal planting dates. A real novelty.

- Each of the above: (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

MONTANA JACK - 8022

150 S. 90 days. A really nice medium pumpkin, bred to mature quickly in northern climates. 8-15 lbs., medium orange with numerous tiny bursts of yellow all over. Sturdy green stem makes it great for carving.

- (28C4) 100 sds-\$5.85; 200 sds-\$8.65; 500 sds-\$16.95; 1,000 sds-\$28.65; 2,000 sds-\$50.10

ORANGE SMOOTHIE - 8005

180 S. (F-1 Hybrid). (All America Winner - 2002). 90 days. Fruits weigh 5-8 lbs., great orange color with almost perfect shape and only slight ribbing. Semi determinate, compact habit. Disease resistant.

- (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

SMALL SUGAR PIE - 8014

240 S. Heirloom. 100 days. Rich orange flesh. Rounded, slightly ribbed, about 7 in. in diameter.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

PUMPKIN (continued)

SNACK JACK - 8018

200 S. (F-1 Hybrid). 95 days. A high yielding variety that is jam-packed full of edible, hull-less seeds. Fruits are 2-2 1/2 lbs. each, beautiful orange skin with light ribbing and compact, semi-bush habit. Outstanding novelty producing naked seeds for roasting and snacking.

SORCERER - 8008

850 S. 95 days. (All America Winner). A high-yielding medium sized beauty. Deep orange, very round weighing between 15-25 lbs. and anchored by a large, firmly rooted handle. Ribbing is heavy.

- Each of the above: (25B4) 25 sds-\$5.85; 50 sds-\$8.90; 100 sds-\$14.65; 250 sds-\$30.20; 500 sds-\$52.85

SPIRIT - 8012

200 S. (F-1 Hybrid). (All America Winner - 1977). 90 days. Early, well shaped 12 lb. pumpkins. Semi-bush habit with only a 5 ft. spread. An excellent carving pumpkin that keeps well.

- (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

SPOOKIE - 8017

222 S. 90-110 days. A cross between Sugar Pie and Jack O Lantern these fruits are 6-10 lbs. and have a smooth, hard, red-orange skin color. Excellent quality, fine textured, sweet, thick, yellow-orange flesh that is great for pies. Also good for painting or carving.

TINY - 8015

420 S. 90 days. This variety is truly an edible pumpkin and is about 2 in. high and 3 in across, which can easily fit into the palm of your hand. Each vine will produce about 6-8 fruits.

- Each of the above: (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

RADICCHIO

24,000 sds/oz 70° 7-10 days

RED (RED CHICORY) - 8019

17,000 S. 90 days. This is the Chioggia type; 8 oz., rounded heads, burgundy red color with white veins. A very healthy vegetable, aids digestion and is a tonic for the liver and blood. Use in salads, boil, grill or sauteed.

- (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

RADISH

2,000 sds/oz 70° 7-10 days

1 oz. for a 100 ft. row. Plant rows 12 in. apart and space 2 in. apart in the rows. About 10-15 lbs. per acre. Will help repel insects and bean beetles from the garden. Very high in Iron and Magnesium and will help flush fat and impurities from the body.

CHERRY BELLE - 8021

3,000 S. (All America Winner - 1949). 23 days. Excellent variety for bunching or packaging, widely grown for greenhouse and frame forcing or outdoor use.

- (31C5) 1,000 sds-\$5.85; 2,000 sds-\$8.10; 5,000 sds-\$14.50; 10,000 sds-\$23.50; 25,000 sds-\$49.25

RHUBARB

1150 sds/oz 65°-70° 21 days

CAUTION: LEAVES ARE TOXIC, DO NOT USE OR INGEST.

VICTORIA - 8026

18-24 in. - 2,000 S. Stalks are crimson-red with inner green shading.

- (30C5) 500 sds-\$6.25; 1,000 sds-\$8.90; 2,000 sds-\$13.80; 5,000 sds-\$27.10; 10,000 sds-\$46.50

SPINACH

70° 10 days

Sow early or late as it does not do well when day length is long. 1 oz. for a 75 ft. row. Ideal for canning or freezing.

BLOOMSDALE LONG STANDING - 8082

2,000 S. (Savoy). 48 days. A heavy yielder of glossy, dark green crinkled leaves.

- (31D5) 1,000 sds-\$6.45; 2,000 sds-\$9.40; 5,000 sds-\$17.40; 10,000 sds-\$28.65; 25,000 sds-\$60.80

BORDEAUX - 8036

2,700 S. (F-1 Hybrid). 21-32 days. Stunning red stems and leaf veins. Sweeter flavor and the color contrast provides a superb salad leaf ingredient, as baby spinach or as a steamed vegetable. Suitable for baby leaf or full size harvest. Plant bolts earlier than solid green varieties.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

NOBEL - 8035

2,500 S. (All America Winner-1933). 46 Days. Produces very large and flavorful dark green leaves. An enormous yielder. Delicious raw or cooked. Good fresh, canned and frozen. Slow to bolt variety.

- (31D5) 1,000 sds-\$6.45; 2,000 sds-\$9.40; 5,000 sds-\$17.40; 10,000 sds-\$28.65; 25,000 sds-\$60.80

TATSOI - 8211

Compact, with low growth and glossy, dark green leaves. Makes attractive borders, mass plantings provide rich color and texture. Harvest entire plant or a few leaves at a time. Mustard-flavored leaves are packed with nutrients. When quickly braised with garlic in oil, it softens into a tapestry of sweet leaves and tender stems that are hard to beat. Great baby item in salads, stir-fry or as a garnish. Once you've discovered its charms, your garden will never be without it.

- (31A5) 1,000 sds-\$5.85; 2,000 sds-\$6.45; 5,000 sds-\$8.75; 10,000 sds-\$13.25; 25,000 sds-\$26.15

All Seed orders are shipped the same day received most within 4 hours !

SQUASH

120-200 sds/oz 75° 7 days

Plant radishes and potatoes between the rows to deter insects and beetles. 1 oz. for 25 hills, 4 ft. apart in the row. 3-4 lbs. per acre. About 1 oz. for 100 ft. row.

BUTTERCUP - 8062

150-200 S. 90 days. Winter squash. Fruit 4 1/2 x 6 1/2 in. thin skin, dark green with narrow gray stripes or mottlings, orange flesh. The smoothest, best flavored squash yet produced, 3-4 lbs. each.

- (28B4) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

BUTTERNUT - 8063

300-350 S. (Waltham). 95 days. Winter squash. Spreads like butter without any sign of stringiness when baked. Skin is dull yellow. Good keeper.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

CANESI - 8043

270 S. (F-1 Hybrid). 80 days. An early-maturing large butternut type that produces fruits of excellent quality. Fruits are large with wide necks, weighing about 6 lbs. and measure about 10-12 in. in length. The seed cavity is small so you get more flesh per fruit. The interior is bright yellow and has a firm texture and sweet flavor. The exterior is smooth and tan.

- (26C5) 50 sds-\$6.45; 100 sds-\$10.30; 250 sds-\$20.70; 500 sds-\$35.30; 1,000 sds-\$62.15

CORNELL'S BUSH DELICATA - 8076

360 S. (All America Winner - 2002). (Sweet Potato Squash). 70 days. The fruits are a typical delicate shape; cylindrical, about 8 in. long by 4 in. diameter and have green striping over a white background. Very flavorful, sweet and smooth with a nutty flavor and compact bush spreading habit, only about 3 feet.

- (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

DELICATA - 8085

480 S. (Sweet Potato Squash). 100 days. An oblong shaped cream colored winter variety 7-9 in. long and 3 in. in diameter with dark green stripes and flecking. Very sweet orange flesh on short vines producing 5-7 fruits weighing 1 1/2 - 2 lbs. each. Outstanding flavor with good storage capabilities.

- (29B4) 250 sds-\$5.85; 500 sds-\$8.90; 1,000 sds-\$14.65; 2,000 sds-\$24.55; 5,000 sds-\$52.85

EARLY BUTTERNUT - 8051

300 S. (F-1 Hybrid). (All America Winner - 1979). 85 days. Winter Squash. A smooth fruited winter variety with semi-bush habit and moderate vine spreading. Very productive, heavy yielding, with excellent flavor.

- (26B5) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

SQUASH (continued)

EARLY SUMMER CROOKNECK - 8057

* 370 S. Heirloom. 58 days. One of the most delectable summer squash varieties, this crookneck is mild, sweet and full of flavor. Steam, pickle, stuff, bake or use raw in salads.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

HUBBARD - 8067

120 S. Heirloom. 110 days. (Blue Hubbard, New England Hubbard). An improved strain producing larger fruits. This high yielding strain produces hard, blue-green squash for good storage.

- (26J4) 50 sds-\$5.85; 100 sds-\$7.25; 250 sds-\$12.40; 500 sds-\$20.55; 1,000 sds-\$35.49

PAGODA GOLD

Crop failure. As a substitute, we suggest Scallop Yellow Bush.

PAPAYA PEAR - 8052

200 S. (F-1 Hybrid). (All America Winner - 2003). (Papaya Gold). 40 days. The first summer squash with the shape similar to a tropical papaya fruit. The semi-bush plant with bright yellow 6 oz. fruits are 3 in. x 2-3 in. wide. Summer squash.

- (25C4) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

PETER PAN - 8050

250-300 S. (F-1 Hybrid). (All America Winner - 1982). 50 days. A very early, heavy producing bush scallop squash with a pale green tint to the fruit. Flesh is very tender.

- (26C5) 50 sds-\$6.45; 100 sds-\$10.30; 250 sds-\$20.70; 500 sds-\$35.30; 1,000 sds-\$62.15

PROLIFIC STRAIGHTNECK - 8066

300 S. (All America Winner - 1938). Heirloom. 55 days. Summer squash. Bush habit. Fruit 14 x 3 in., straight, lemon-yellow, slightly rough.

- (28A4) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

SCALLOP YELLOW BUSH - 8058

* 370 S. 49 days. (Patty Pan). Heirloom. Summer yellow scallop squash. Bush habit. Produces good yields of flat, round fruits. Harvest at the 2-3 in. size when they are delicate and tender. Excellent when lightly steamed, seasoned and plated with the main course.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

SPAGHETTI - 8042

180 S. 95 days. Medium sized oblong fruits can be stored for many months in a cool dry place.

SWEET DUMPLING - 8092

450 S. 100 days. Small, 4-5 in. diameter, round shaped fruits. Skin is ivory with dark green stripes. Very sweet, orange flesh. Each plant will produce 8-10 fruits.

- Each of the above: (28B4) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

SQUASH (continued)

SWEET MAMA - 8096

240 S. (F-1 Hybrid). (All America Winner - 1979). 85 days. Big yield of Buttercup-type fruits with dark green skin, 2-3 lbs. each. Flavorful, thick yellow flesh. Semi-vining habit.

- (25A4) 25 sds-\$5.85; 50 sds-\$7.75; 100 sds-\$12.35; 250 sds-\$24.90; 500 sds-\$43.65

TABLE ACE - 8047

300 S. (F-1 Hybrid). 70 days. Winter squash. An improved acorn type with semi-bush habit. Fruits are 4-6 inch, dark green, flesh is bright orange, thick and textured.

- (26B5) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

TABLE QUEEN (OR ACORN) - 8064

300 S. (All America Winner - 1939). Heirloom. 80 days. Winter squash. Fruit 5 x 4 in., thick, deeply ribbed, dark green skin and thick orange flesh that cooks dry and sweet. Good keeper.

- (28B4) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

TAYBELLE - 8069

310 S. (F-1 Hybrid). 72 days. Winter squash. A high quality acorn type squash that matures from a dark green to jet black. It has a semi-bush plant habit that allows for higher density planting and a high yield potential. Resistant to powdery mildew.

- (26C4) 50 sds-\$6.45; 100 sds-\$10.30; 250 sds-\$20.70; 500 sds-\$35.30; 1,000 sds-\$62.15

TIVOLI - 8048

210 S. (F-1 Hybrid). (All America Winner - 1991). 100 days. A spaghetti squash variety with dwarf, bush habit. 24 in. tall plants will provide 3-4 lb. of light yellow, oblong fruits.

- (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

TOTAL ECLIPSE - 8056

300 S. (F-1 Hybrid). 53 days. Lime green Patty Pan or Scallop Squash. Smooth, firm texture with a nutty taste. Patty pan or scallop squash is a small, saucer-shaped warm-season squash that usually grows to be no more than 3 to 4 inches in diameter. Patty pan squashes look something like a toy top. Beautiful on their own or mixed with other colors.

- (28B5) 100 sds-\$5.85; 200 sds-\$7.60; 500 sds-\$14.65; 1,000 sds-\$24.55; 2,000 sds-\$42.70

YELLOW CROOKNECK - 8090

350 S. (F-1 Hybrid). 43 days. Glossy, butter-yellow 5-6 in. fully crookneck fruits with upright, open bush habit. Outstanding variety.

- (26B5) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

VEGETABLES

SQUASH, ZUCCHINI

ARISTOCRAT (COMMANDER) - 8041

150 S. (F-1 Hybrid). (All America Winner - 1973). 50 days. Baby Zucchini. Dark green, smooth skin, 7 in. High yielder. Beautiful, long, green summer squash with tasty white flesh. Delicious in stir-fry, grilled, or added to salads or pasta dishes. Bake into dessert bread for a wonderfully moist treat. Commander was the original name that it was first sold under in the U.S.

- (25A4) 25 sds-\$5.85; 50 sds-\$7.75; 100 sds-\$12.35; 250 sds-\$24.90; 500 sds-\$43.65

BLACK BEAUTY - 8068

200 S. (All America Winner - 1957). Heirloom. 60 days. Bush type plant with fruits that are long and straight. Fruits should be harvested when 7-9 in. long while young and tender. Not being an F-1 Hybrid, do not compare productivity with other hybrids listed.

- (29C4) 250 sds-\$6.80; 500 sds-\$10.90; 1,000 sds-\$18.10; 2,000 sds-\$30.70; 5,000 sds-\$66.75

COCOZELLE - 8089

230 S. (Italian Zucchini). Heirloom. 45 days. A bush type plant with long, cylindrical 12-15 in. dark green fruits with light green stripes, maturing to yellow. Very firm, greenish-white flesh.

- (28A5) 100 sds-\$5.85; 200 sds-\$6.60; 500 sds-\$12.35; 1,000 sds-\$20.45; 2,000 sds-\$35.30

CUCUZZI - 8095

150-200 S. (Italian Zucchini). Heirloom. 100 days. Trailing (or vine) habit producing fruits 5 inches in diameter and 40-48 inches long when fully mature. Fruits have a light grey-green skin with white flesh. Popular Italian squash, a favorite in soups, stews and Italian cooking.

- (28E5) 100 sds-\$6.70; 200 sds-\$10.65; 500 sds-\$21.55; 1,000 sds-\$36.85; 2,000 sds-\$64.90

EIGHT BALL - 8086

220 S. (F-1 Hybrid). (All America Winner - 1999). 35 days. Speckled, shiny dark green round baseball-sized zucchini fruit. Uniform in habit, vigorous growing, bush-type plants.

- (26C5) 50 sds-\$6.45; 100 sds-\$10.30; 250 sds-\$20.70; 500 sds-\$35.30; 1,000 sds-\$62.15

GOLD RUSH - 8054

250 S. (F-1 Hybrid). (All America Winner - 1980). 52 days. Deep golden color on zucchini type fruit contrasting with the rich green stem. Fruits are 8 in. long, smooth and very uniform. A heavy producer of superior quality fruit with excellent flavor.

- (26F5) 50 sds-\$8.55; 100 sds-\$14.10; 250 sds-\$29.30; 500 sds-\$50.70; 1,000 sds-\$89.85

SCALLOPINI

Crop failure. As a substitute, we suggest Peter Pan.

SQUASH, ZUCCHINI (continued)

SUNGREEN - 8053

160 S. (F-1 Hybrid). 54 days. Small, compact bush type with high yields of straight, dark green glossy fruits. This variety exhibits intermediate resistance to viral diseases.

- (25D4) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

Strawberry.

Also see listing under Annuals and Perennials.

STRAWBERRY

60,000 sds/oz 60°-62° 20 days

Strawberries are healthy for you, they will lower the risk of cancer; producing Lycopene, a cancer fighting anti-oxidant. Also will help flush fat from body cells. Sow seed about 6-10 weeks prior to sale. After sowing, cover seeds lightly with media. Maintain good moisture and 65° soil temperature. (Poor germination will result above 72°). Normal germination period is 14-25 days.

BERRI BASKET (PELLETED) - 8093PE

20,000 S. (F-1 Hybrid). Early, everbearing variety with compact, bushy plants creating bushy hanging baskets. Easy to grow, attractive creamy-white flowers above the deep green, shiny leaves. Will produce large, deep red full flavored berries until frost. (Use 3 plants per 10 in. basket).

BERRIES GALORE (PELLETED) - 8094PE

26,000 S. (F-1 Hybrid). A runner-producing, everbearing variety that will yield large, tasty fruits until frost. Large, early blooms with deep green shiny leaves. Ideal for sales in tubs, baskets, beds, planters and window boxes.

- Each of the above: (24I4) 10 sds-\$6.95; 25 sds-\$13.48; 50 sds-\$22.70; 100 sds-\$38.90; 250 sds-\$85.25

FRESCA - 8099

57,500 S. 60 days. A very early, everbearing variety that produces medium sized fruit of outstanding quality and flavor.

- (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

SWISS CHARD

8,000 sds/oz 75° 8 days

1 oz. for a 50 ft. row.

BRIGHT LIGHTS - 8075

20 in. - 1,000 S. (All America Winner - 1998). Maturity is 28 days for baby salad leaves or 55 days for mature bunching sized leaves. An attractive multicolored swiss chard with various colored stems including gold, pink, red, and white. Outstanding in a salad or for bunching.

- (29B5) 250 sds-\$6.75; 500 sds-\$9.95; 1,000 sds-\$15.65; 2,000 sds-\$25.55; 5,000 sds-\$53.85

LUCULLUS - 8077

20 in. - 1,250 S. Heirloom. 52 days. Most popular type; yellowish-green leaves, heavily crumpled. Wide with broad white ribs.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

SWISS CHARD (continued)

ORIOLE - 8222

2,300 S. Maturity is 30 days for baby salad leaves or 60 days for mature bunching sized leaves. Beautiful green leaves with orange stem contrast, Milder flavor than other chards. Can be used as an ornamental as well as a vegetable.

RHUBARB RED - 8220

18-24 in. - 1,500 S. 70 days. Dark green leaves with brilliant red stalks and veins.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

TOMATO

7,000-9,000 sds/oz 75°-80° 7-14 days

Sow seed 6-8 weeks before time to plant out. Transplant 14-21 days after seeding. For best germination, cover seeds lightly after sowing. About 1/4 oz for a 100 ft row or 2 lbs per acre if direct seeded. If White Fly is a problem, plant Marigolds and Herb, Basil nearby to help repel the insects. Tobacco users should not come in contact with seedlings to prevent tobacco virus. Planting Radishes, Rue, and Pennyroyal will repel many insects.

Days indicated after each variety are from when plants are set out in the garden to ripe fruit. Indeterminate habit will require staking.

Determinate habit may sometimes require caging.

Lycopene is a carotenoid that is abundant in Tomatoes and makes them red. It is a strong antioxidant and is helpful in preventing cancer. Processed and cooked tomatoes in sauces are more easily absorbed than raw tomatoes. Increase your yields and fruit size by 2-4 oz. by growing on stakes or cages.

For your selection of disease resistant varieties, we have indicated after the variety the strength of the disease resistance: V = Verticillium resistant; F = Fusarium resistant; N = Nematode resistant; T = Tabacco Mosaic resistant, A = Alternaria Resistant.

AMISH PASTE - 8450

12,500 S. Heirloom. 74 days. Produces up to 12 oz., deep-red Oxheart shaped, meaty fruits. Probably one of the largest paste tomatoes which dates back the the turn of the century and is the best for sauces and canning. Not overly acidic. Indeterminate stake habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

APPLAUSE - 8399

11,400 S. (F-1 Hybrid). 66 days. Earliest of the large fruited tomatoes on the market. Produces big, 8-12 oz. fruits. Each globe shaped fruit is picture perfect with smooth shoulders and a small blossom scar. Exceptional yield potential. Great for small gardens or close planting. Disease resistant. Determinate bush habit.

- (25D5) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

(continued on next page)

TOMATO (continued)

ARKANSAS TRAVELER - 8413

10,000 S. Heirloom. 80 days. A heavy yielding variety that will produce 6-8 oz. pink fruits through stressful hot weather. Outstanding flavor. Indeterminate stake habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

BEEFMASTER VFN - 8534

13,000 S. (F-1 Hybrid). 80 days. Very large, deep red, oblate shaped fruit in the 2 lb. range. Multiple disease resistance; beefsteak type, but tolerant of cracking and splitting. Indeterminate stake habit.

- (28C4) 100 sds-\$7.75; 200 sds-\$12.71; 500 sds-\$26.15; 1,000 sds-\$45.05; 2,000 sds-\$79.70

BETTER BOY VFN - 8533

9,000 S. (F-1 Hybrid). 70 days. Large, firm red fruit in the 1 lb. range. Will produce deep red, globe shaped fruits, with a red meaty interior throughout the season. Cut in quarters and add to a fresh salad, slice for sandwiches, or eat sprinkled in salt or sugar. Excellent for eating fresh from the vine. Indeterminate stake habit.

- (26A4) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

BETTER BUSH - 8560

* 9,500 S. (F-1 Hybrid). 68 days. This early home garden variety bears fruit all season long. Produces big 4" fruits that need very little staking. Fruits are sweet and meaty, with a much sought-after real tomato taste. If you love container gardening, definitely try this one. Determinate habit.

- (28C4) 100 sds-\$5.85; 200 sds-\$8.65; 500 sds-\$16.95; 1,000 sds-\$28.65; 2,000 sds-\$50.10

BIG BEEF - 8532

6,000 S. (F-1 Hybrid). (All America Winner - 1994). 73 days. Very large and early deep red oblate to globe shaped 12 oz. Beefsteak type fruits. High yielding with excellent meaty flavor. Disease resistant. Indeterminate stake habit.

- (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

BIG RAINBOW - 8441

10,000 S. Heirloom. 80-102 days. Beefsteak type. Huge 2 lb. rib-shouldered golden fruits with streaks of red through the flesh and skin. Fully ripened fruits are gold on stem end, red on blossom end. Fruity sweet flavor with a unique, mild and low acid flavor all its own. Subject to cracks and cat facing. Indeterminate stake habit.

BLACK KRIM - 8424

10,000 S. Heirloom. 69-80 days. One of our best tasting tomato! A most unusual novelty, 8-12 oz. fruits are flattened, globe shaped, dark, deep-red to dark mahogany with heavy green shoulders. Interior is a deep, reddish-green color. Sweet heirloom from the Crimean peninsula of Russia. It has a rich, earthy taste. Matures extremely early. Indeterminate stake habit.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

TOMATO (continued)

BLACK PRINCE - 8458

* 12,500 S. Heirloom. 70-90 days. Another genuine Russian treasure. Its small to medium, oval fruits are very juicy and ripen to a beautiful, deep garnet red color. Fruits are about 2 in. in diameter, are uniform and blemish free. Full of juice and a good, rich flavor this variety should be a favorite in most gardens. Indeterminate stake habit.

BOX CAR WILLIE - 8409

11,500 S. Heirloom. 80 days. A heavy yielding variety producing 8-10 oz. smooth red fruits of excellent, sweet-tasting flavor. An excellent variety for eating fresh. Disease tolerance. Indeterminate stake habit.

BRANDYWINE BLACK - 8448

9,000 S. Heirloom. 80-90 days. Potato-leaf foliage. Maroon- red in color with outstanding tasting flesh. Each oval shaped fruit can weigh up to 2 lbs. Derived from a cross of Brandywine and either Black Prince or Cherokee Purple. Indeterminate stake habit.

BRANDYWINE PINK - 8411

9,000 S. Heirloom. 90 days. Very large, reddish-pink fruits averaging 16-24 oz. each. The exquisite flavor of these very large fruits will delight! Beefsteak tomatoes are meaty and rich. Excellent fresh from the vine or cooked for sauces, pasta dishes or casseroles. Flavor is exceptional and of gourmet quality. Indeterminate stake habit.

BRANDYWINE RED - 8425

8,330 S. Heirloom. 90-100 days. Large, deep scarlet-red, beefsteak fruits. Excellent flavor. Fruits can weigh up to 2 lbs. Excellent fresh from the vine or cooked for sauces, pasta dishes or casseroles. Indeterminate stake habit.

BRANDYWINE YELLOW - 8401

11,000 S. Heirloom. 90 days. Very large, 16-24 oz. yellow fruits of exceptional quality and gourmet flavor. Golden beefsteak-type fruits have a distinctive sweet flavor. Soft, creamy texture is delicious in sandwiches; meaty flesh is excellent for sauces. This quality heirloom variety produces tasty treats until frost. Indeterminate stake habit.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

BURPEE BIG BOY - 8513

9,000 S. (F-1 Hybrid). 80 days. The most popular hybrid tomato! Large 14-16 oz. bright red fruits. Very productive. The fruits are smooth, firm, thick and meaty. Cut in quarters and add to a fresh salad, slice for sandwiches, or eat sprinkled with salt or sugar. Indeterminate stake habit.

- (28C4) 100 sds-\$7.75; 200 sds-\$12.71; 500 sds-\$26.15; 1,000 sds-\$45.05; 2,000 sds-\$79.70

BURPEE DELICIOUS - 8414

12,500 S. Heirloom. 77 days. Very large fruit, many 2 lbs. or more. Meaty, red fruits resist cracking. An excellent variety of good quality and flavor make these ideal for slicing and eating fresh on sandwiches. Indeterminate stake habit.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

TOMATO (continued)

BURPEE SUPERSTEAK VFN - 8516

8,500 S. (F-1 Hybrid). 80 days. Large, smooth beefsteak type fruits. Very high yielding variety producing attractive flat-round shaped, full-flavored 1-2 lbs. Disease resistant. Indeterminate stake habit.

- (28F4) 100 sds-\$7.25; 200 sds-\$11.70; 500 sds-\$23.85; 1,000 sds-\$40.95; 2,000 sds-\$72.30

BUSH EARLY GIRL - 8561

16,000 S. (F-1 Hybrid). 63 days. High yielding sister of the traditional Early Girl; but with determinate bush habit. Bright red fruit, 6-8 oz. fruits. Good for areas with a short growing season. Perfect size for fresh salads or snacking. Disease resistant. Determinate bush habit.

- (28C4) 100 sds-\$7.75; 200 sds-\$12.71; 500 sds-\$26.15; 1,000 sds-\$45.05; 2,000 sds-\$79.70

CASPIAN PINK

Crop failure. As a substitute, we suggest Ponderosa Pink.

CELEBRITY VFNT - 8563

6,500 S. (F-1 Hybrid). (All America Winner - 1984). 70 days. Large, 8 oz. deep red fruit that is firm and very flavorful. Multiple disease resistant. Determinate bush habit.

CHAMPION VFNT - 8568

7,000 S. (F-1 Hybrid). 65 days. An early-yielding, full-sized tomato with superior flavor and 10 oz. fruits. Solid, meaty and extra sweet and mild. Delicious sliced and eaten fresh on sandwiches, or sprinkle with salt or sugar and enjoy! Disease resistance. Indeterminate stake habit.

- Each of the above: (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

CHEROKEE PURPLE - 8418

11,000 S. Heirloom. 72 days. An unusual tomato with medium-large, flattened globe fruits that are dusky pink with darker pink/purple shoulders. The multicolor interior is purplish/pinkish. Abundant, fruits are very sweet and juicy with a smoky flavor. Thick, rosy brown skin resists cracking. Good foliage cover prevents sunburn. Relatively short, indeterminate vines. Indeterminate stake habit.

- (29D5) 250 sds-\$8.85; 500 sds-\$13.85; 1,000 sds-\$22.55; 2,000 sds-\$37.85; 5,000 sds-\$81.65

CLUSTER GRANDE - 8548

8,000 S. (F-1 Hybrid). 63 days. Fruits are larger than traditional cluster tomatoes, about 5 oz. each. Intense brilliant red color, fine taste, high yielding and uniform ripening. Disease resistant. Indeterminate stake habit.

- (28G4) 100 sds-\$7.75; 200 sds-\$12.71; 500 sds-\$26.15; 1,000 sds-\$45.05; 2,000 sds-\$79.70

CRIMSON CUSHION (BEEFSTEAK) - 8422

13,000 S. Heirloom. 90 days. Fruits are large, 12-14 oz. bright scarlet, solid and somewhat flattened and ribbed. Very prolific, meaty, and juicy with a hint of acid. Just the right size for slicing fresh for sandwiches. A large wilt resistant variety. Indeterminate stake habit.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

VEGETABLES

TOMATO (continued)

EARLY GIRL II - 8565

10,000 S. (F-1 Hybrid). 52 days. Very early, 4-6 oz. tasty fruit throughout the summer. Early, medium-sized red fruits are excellent for eating fresh from the vine. Cut in quarters and add to a fresh salad, slice for sandwiches, or eat sprinkled with salt or sugar. Disease resistance. Indeterminate stake habit.

- (28G4) 100 sds-\$7.75; 200 sds-\$12.71; 500 sds-\$26.15; 1,000 sds-\$45.05; 2,000 sds-\$79.70

GERMAN JOHNSON - 8423

12,000 S. Heirloom. 85 days. Large, pink skin with yellow shoulders, very mild, low acid, very meaty with few seeds. Size averaging 18-24 ozs. Tall plants with potato-leaf foliage. The Tomato - Johnson was named after Robert Gibbon Johnson. He was declared a hero in 1820 by eating a tomato in public in New Jersey. He attempted to greatly encourage the public acceptance of the Fruit as not being toxic or poisonous. Indeterminate stake habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

GLORY - 8417

8,000 S. (F-1 Hybrid). 75 days. 12 oz. fruits are oblate with soft, sweet, meaty flesh. The best of both worlds: more vigor and higher yields than heirloom types, with a flavor reminiscent of Red Brandywine. Indeterminate stake habit.

- (28E4) 100 sds-\$6.70; 200 sds-\$10.65; 500 sds-\$21.55; 1,000 sds-\$36.85; 2,000 sds-\$64.90

GRANNY SMITH - 8406

10,500 S. (F-1 Hybrid). 72 days. Green fruits will ripen with plenty of flavor without ever turning red! Large, 8-10 oz., solid flesh fruits with long shelf life. They develop good sugars and acid and taste better than any green tomato you have ever tasted. Disease resistant. Indeterminate stake habit.

- (28F4) 100 sds-\$7.25; 200 sds-\$11.70; 500 sds-\$23.85; 1,000 sds-\$40.95; 2,000 sds-\$72.30

GREEN ZEBRA - 8427

12,500 S. 78-90 days. This is the most unusual variety you will ever grow. Fully ripened fruits are bright green, with stripes of a still lighter green. Unique and attractive, round, smallish, 2-4 oz. fruits have an excellent real tomato flavor. Delectable flavor is sweet but tangy. Determinate bush habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

HEALTH KICK - 8536

7,000 S. (F-1 Hybrid). 72 days. Bright red, 4 oz. plum-shaped fruits are delicious. A high yielding determinate saladette variety containing an extra 50% of high concentration of Lycopene, the antioxidant that may help to prevent certain types of cancer in the respiratory, digestive and prostate. Disease resistant. Determinate bush habit.

- (26D5) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

TOMATO (continued)

HEINZ VF - 8431

12,500 S. 75 days. Early, bright red, crack resistant fruit. Heavy yielder with fusarium and verticillium disease resistance. Determinate bush habit.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

HILLBILLY - 8428

10,000 S. Heirloom. 85 days. Huge, mild flavored, beefsteak type fruits weigh 1-2 lbs. each, and are colored most unusual orange-yellow, streaked and mottled in shades of red and pink. Indeterminate stake habit.

HOMESTEAD - 8430

12,500 S. 80 days. 8 oz. red fruits that are consistently uniform. Determinate bush habit.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

HUSKY SERIES

8,000-9,000 S. (F-1 Hybrid). 68 days. Medium sized 5-7 oz. fruits with outstanding appearance and flavor. A different type of compact plant habit called dwarf indeterminate with attractive dark green foliage that requires no pruning. Well suited for container growing and will set fruit throughout the entire growing season. Heavy yielding and disease resistant.

Red - 8547

- (26C4) 50 sds-\$6.45; 100 sds-\$10.30; 250 sds-\$20.70; 500 sds-\$35.30; 1,000 sds-\$62.15

JET STAR - 8590

* 11,000 S. (F-1 Hybrid). 72 days. Tasty, mild-flavored fruit matures early with tremendous yields. Large, attractive globes have few scars or cracks. Indeterminate stake habit.

- (28F5) 100 sds-\$7.25; 200 sds-\$11.70; 500 sds-\$23.85; 1,000 sds-\$40.95; 2,000 sds-\$72.30

JETSETTER VFN - 8512

8,000 S. (F-1 Hybrid). 64 days. Very early 8-10 oz., deep red oblate shaped fruits with outstanding flavor. Compare to Jet Star and you will see the difference. A high yielding variety with great flavor. Disease resistant. Indeterminate stake habit.

- (28F4) 100 sds-\$7.25; 200 sds-\$11.70; 500 sds-\$23.85; 1,000 sds-\$40.95; 2,000 sds-\$72.30

JUBILEE - 8434

9,000 S. 80 days. (All America Winner - 1943). Orange, 8 oz., non-acid, solid, sweet, smooth-skinned, medium-sized, golden orange fruits are heavily produced on plants that can be staked. Solid flesh has mild flavor and few seeds. Indeterminate stake habit.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

KEEPSAKE

Discontinued. As a substitute, we suggest Sunmaster.

TOMATO (continued)

KELLOGG'S BREAKFAST - 8429

10,000 S. Heirloom. 80-85 days. Lovely, pale-orange fruits that are solid and meaty throughout, packed with mild, superb tasting flesh. A long season producer of large, beefsteak type fruits, up to 1 lb. with solid centers that have just a few seeds at the edges. Very desirable. Indeterminate stake habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

LA ROMA II VF - 8541

13,500 S. (F-1 Hybrid). 69 days. This improved variety offers higher yields of larger, tastier fruit on stronger plants. Bright red, pear- or plum-shaped fruit are thick and meaty with few seeds. Great tomato for cooking and canning. Vigorous, uniform plants bear an abundance of 4-7 oz. fruits. Determinate bush habit.

- (26A4) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

LEMON BOY - 8540

12,000 S. (F-1 Hybrid). 72 days. The first really true yellow variety, not golden. A heavy producer of 7-8 oz. fruits that are very tasty and mild. Beautiful bright fruit with mild flavor. Plants adapt well to variable conditions. Wonderful in fresh salads or vegetable trays. Indeterminate stake habit.

- (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

MARGHERITA - 8433

24-30 - 7,800 S. (F-1 Hybrid). 70-75 days. The fruit are an elongated saladette shape with deep red color and thin skin. Cylindrical fruits ripen uniformly and weigh 5-6 oz. They can be eaten fresh, but really should be saved for cooking. Roasting brings out their best flavor. Chop and broil or roast whole on the BBQ. Determinate stake habit.

- (25C5) 25 sds-\$6.45; 50 sds-\$10.30; 100 sds-\$16.95; 250 sds-\$35.30; 500 sds-\$62.15

MARGLOBE VF - 8436

12,000 S. Heirloom. 75 days. An improved disease resistant strain. Red fruit; smooth and solid 6 oz. fruit that is crack resistant. Highly adaptable old-time favorite producing high yields of almost perfectly globe-shaped tomatoes. The large, thick-walled sweet fruits are great for eating fresh or canning. Indeterminate stake habit.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

MARGO - 8397

30 in. - 9,000 S. (F-1 Hybrid). 70 days. Perfect for the garden and kitchen. Fruits are uniform, oblate in shape, shiny red with green shoulders and average 6 oz. in weight. Juicy and flavorful and can be tucked into smaller gardens. Disease resistant. Determinate habit.

- (26F4) 50 sds-\$8.55; 100 sds-\$14.10; 250 sds-\$29.30; 500 sds-\$50.70; 1,000 sds-\$89.85

(continued on next page)

TOMATO (continued)

MEGA BITE - 8545

* 9,000 S. 70 days. Expect large, tasty fruits from these compact plants. Naturally dwarf patio container variety, produces 20 to 30 and more tasty, large beefsteak-type juicy fruits that measure 3-4 inch diameter and 4 to 6 ounce in size. Determinate bush habit.

- (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

MORTGAGE LIFTER - 8408

11,000 S. (Radiator Charlie). Heirloom. 85 days. Large, slightly flattened, pink-red fruits that range from 1-2 lbs. Very meaty, great flavor and with few seeds. Legend says Radiator Charlie named the tomato after its excellent crop helped him to pay off a farm about to be foreclosed on. It offers big, delicious slices for sandwiches. Indeterminate stake habit.

- (29B5) 250 sds-\$6.75; 500 sds-\$9.95; 1,000 sds-\$15.65; 2,000 sds-\$25.55; 5,000 sds-\$53.85

MR. STRIPEY - 8437

11,500 S. Heirloom. 80 days. Yellow beefsteak type fruit with red-streaked flesh. Large flavorful fruits range from 14 oz. to 3 lbs. Also called Old German or Pineapple. Fruit has rich, tangy flavor and low acid content. A tasty and colorful addition to salads, salsas or tomato plates. Indeterminate stake habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

NEW GIRL - 8572

10,400 S. (F-1 Hybrid). 62 days. Better tasting and more disease resistant than Early Girl, well worth trying. Fruits are 4-7 oz., and hold their ripeness and flavor on the vine well. Indeterminate stake habit.

- (26A5) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

OREGON SPRING - 8404

8,500 S. 58 days. A cold tolerant variety for cool, short season growing. Will produce 6-8 oz. medium sized flavorful red fruits that are almost seedless, but outstanding in flavor. Compact plants. Determinate habit.

OXHEART RED - 8442

13,000 S. Heirloom. 90 days. Extra large, heart-shaped reddish-pink fruit, few seeds, mild flavor. Fine variety, meaty fruits have good old-fashioned tomato flavor. Tomatoes are delicious eaten fresh from the vine, sliced for salads, or added to sauces and casseroles. Non-acid. Indeterminate stake habit.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

TOMATO (continued)

PATIO F - 8544

10,000 S. (F-1 Hybrid). 70 days. A sturdy, dwarf, upright plant with dark crinkled foliage. Medium size deep oblate shaped fruit with good color, smooth firm fruit of quality. Grows 24-30 in. tall and should be staked. Fine for growing in tubs and containers for the gardener with limited space. Disease resistant. Determinate bush habit.

- (26B4) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

PINK GIRL VF - 8527

8,500 S. (F-1 Hybrid). 75 days. Beautiful 8 oz. pink fruits that are crack resistant. Medium-sized pink fruits are low acid. Their rich flavor makes them perfect for eating fresh or in cooking. Disease resistant. Indeterminate stake habit.

- (26B5) 50 sds-\$5.85; 100 sds-\$8.90; 250 sds-\$17.80; 500 sds-\$30.20; 1,000 sds-\$52.85

POLISH LINGUISA - 8438

19,000 S. Heirloom. 72 days. Fruits are large, sort of pie-shaped (flattened pear) and average 7-10 oz. each. Delicious flavor, high yielding. Indeterminate stake habit.

PONDEROSA PINK - 8443

9,000 S. Heirloom. 88 days. Large, light pink fruit that is very mild in flavor, yet has a good tomato taste. Fruits are large and weigh 12 oz.-2 lbs. and grow in clusters of three to five fruits. Seed cavities are very small and there are few seeds. Heavy yields. Can be used for canning or eating fresh. Indeterminate stake habit.

PONDEROSA RED - 8444

13,000 S. Heirloom. 85 days. An old time favorite, extra-large, beefsteak type with mild flavor. Almost seedless, with low-acid, solid, meaty, deep red flesh. Indeterminate stake habit.

PRUDEN'S PURPLE - 8403

12,000 S. Heirloom. 75 days. Large potato leaf vine produces lots of 1 lb., slightly flattened, pretty, blemish-free, purple-pink fruits with few tomato seeds and excellent flavor. An early Brandywine-type variety that is heavy yielding. Indeterminate stake habit.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

RED STUFFER - 8439

12,500 S. 90 days. The fruit is red-orange with three to four cells. The center seed cluster, similar to that of a bell pepper, is easily removed which makes this ideal for serving as an edible container for your favorite cold or hot salads. Indeterminate stake habit.

- (30B5) 500 sds-\$5.85; 1,000 sds-\$7.70; 2,000 sds-\$11.50; 5,000 sds-\$21.95; 10,000 sds-\$37.25

ROMA VF - 8454

12,000 S. Heirloom. 75 days. Pear shaped 2 oz. fruit, ideal for paste or puree. Fusarium and verticillium resistant. Determinate bush habit.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

TOMATO (continued)

ROYESTA - 8535

7,700 S. (F-1 Hybrid). 68 days. This variety has wonderful qualities, including early maturity, great flavor, wide adaptability and more traditional rough shoulder that is similar to the popular heirloom types. It can produce 6-9 ounce fruit over a long period of time. Disease resistant. Indeterminate stake habit.

- (25D5) 25 sds-\$7.15; 50 sds-\$11.55; 100 sds-\$19.25; 250 sds-\$40.45; 500 sds-\$71.35

RUTGERS VF - 8455

12,500 S. Heirloom. 75 days. An improved disease resistant strain. Fruit is 6 oz. bright red; globular with smooth, thick walls that are crack resistant. Excellent midseason growth and full-bodied flavor. This all-purpose variety is ideal for canning. Can be staked. Determinate bush habit.

- (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

STRIPED GERMAN - 8440

9,000 S. Heirloom. 78-90 days. A flat, medium to large, variably ribbed-shoulder fruits are yellow with red stripes. The marbled interior looks beautiful sliced. Complex, fruity flavor with a smooth texture. Indeterminate stake habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

SUNMASTER - 8569

9,000 S. (F-1 Hybrid). 70 days. Large and uniform 7-8 oz. bright red fruits. The ideal variety for growing under humid and high temperatures when productivity normally declines for many varieties due to extreme heat. This variety thrives on the heat! Outstanding flavor with multiple disease resistance. Determinate bush habit.

SUNNY BOY - 8546

* 11,000 S. (F-1 Hybrid). 70 days. Bright yellow, 6 oz. fruits with few seeds. Very sweet flavor, fruits are globe shaped and firm and will ship well. Determinate bush habit.

- Each of the above: (28C5) 100 sds-\$5.85; 200 sds-\$8.65; 500 sds-\$16.95; 1,000 sds-\$28.65; 2,000 sds-\$50.10

SUPER FANTASTIC VFN - 8589

8,000 S. (F-1 Hybrid). 70 days. A heavy producer of 10 oz. smooth, solid, red, meaty fruits throughout the summer. Plenty of juice and flavor. Great for fresh eating, cooking or canning. Disease resistant. Indeterminate stake habit.

- (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

VIVA ITALIA - 8594

8,000 S. (F-1 Hybrid). 72 days. Earlier and more productive with higher quality blocky-pear fruits than other Roma types. Excellent flavor for fresh or canning. Disease resistant to bacterial speck. Indeterminate stake habit.

- (28D4) 100 sds-\$6.15; 200 sds-\$9.65; 500 sds-\$19.25; 1,000 sds-\$32.75; 2,000 sds-\$57.50

VEGETABLES

Our PLANT/PLUG catalog lists over 15,000 items in over 50 sizes !

TOMATO (continued)

WHITE WONDER - 8485

10,500 S. 80 days. Fruits medium-sized with white flesh on the interior and white exterior skin. Mild, sweet flavor. Non-acid. Indeterminate stake habit.

WISCONSIN 55 - 8466

5,000 S. 78 days. Back by popular demand! Bred by the University of Wisconsin in the 1940s, this is an excellent and versatile tomato with great flavor and lots of sweetness. Smooth, large tomatoes are about 8 oz. and as pretty as can be. Extremely productive and thrive in a wide-range of growing conditions. This old-time favorite is sure to become a new favorite once you give it a try. Indeterminate stake habit.

YELLOW STUFFER - 8449

12,500 S. Heirloom. 76 days. Large yellow tomatoes, shaped like bell peppers which are perfect for stuffing. Vigorous vines produce loads of 3-4 lobed fruits. Indeterminate stake habit.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

TOMATO, SMALL FRUITED

BLACK CHERRY - 8421

20,800 S. Heirloom. 64 days. The incredibly sweet, fruity flavor is as appealing as the fruit is genuinely beautiful. Dark, chocolatey colored fruits are perfectly round, 3/4-inch diameter. Irresistible right off the vine. A unique addition to the color spectrum of cherry tomatoes that are now available. Delicious eaten fresh from the vine, on salads, or added to sauces and casseroles. Indeterminate stake habit.

- (29A5) 250 sds-\$5.85; 500 sds-\$8.10; 1,000 sds-\$12.20; 2,000 sds-\$19.40; 5,000 sds-\$40.00

CURRENT YELLOW - 8492

26,000 S. 65 days. Produces heavy yields of small yellow cranberry shaped fruits. Excellent for salads, garnishes or gourmet dishes. Indeterminate stake habit.

GARDENER'S DELIGHT - 8483

41,000 S. A heavy yielder of small, very sweet 1 in. red cherry tomatoes.

- Each of the above: (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

GRAPE - CUPID - 8400

13,000 S. (F-1 Hybrid). 66 days. This is the ultimate in small fruited, grape-shaped tomatoes. Far superior, 1 oz. fruits have more natural sugars, with higher productivity. Fruits are firm but juicy and supremely sweet, with just enough tomato tang. Great in salads or for snacking. Disease resistant. Indeterminate stake habit.

- (24E4) 10 sds-\$5.85; 25 sds-\$10.90; 50 sds-\$18.10; 100 sds-\$30.70; 250 sds-\$66.75

TOMATO SMALL FRUITED (continued)

GRAPE - RED GRAPE - 8528

14,000 S. (F-1 Hybrid). 58 days. This favorite that was only available in produce stores, is now available from seed. Bright red small fruits are about 1/3 oz. (10 grams) each. They are very sweet, bite-sized, oval shaped grape tomatoes. Strong tolerance to heat, humidity and cracking. Determinate bush habit.

GRAPE - YELLOW - 8525

14,000 S. (F-1 Hybrid). 60 days. A perfect complement to Red Grape. Firm, bite-size, deep yellow fruits grow in long clusters on tall, healthy plants. The best-eating yellow grape with mild, sweet flavor. Resists cracking. Indeterminate stake habit.

- Each of the above: (26D4) 50 sds-\$7.15; 100 sds-\$11.55; 250 sds-\$23.55; 500 sds-\$40.45; 1,000 sds-\$71.35

JULIET - 8549

24 in. - 8,000 S. (F-1 Hybrid). (All America Winner - 1999). 60 days. Very sweet, red, one ounce cherry tomatoes are produced in clusters like grapes on the long, vigorous, indeterminate vines. Crack and disease resistant. Indeterminate stake habit.

- (26A4) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

LADY FINGER (PELLETED) - 8453PE

* 1,500 S. (F-1 Hybrid). 75 days. Very unique elongated fruit with incredible taste. Fruits are 2-2 1/2 in. long. Semi-indeterminate stake habit.

- (24A4) 10 sds-\$5.85; 25 sds-\$8.40; 50 sds-\$13.50; 100 sds-\$22.45; 250 sds-\$48.25

LADYBUG - 8581

* 65 days. The sweetest red cherry yet. These 1 oz. fruits are very resistant to cracking. They are ultra-sweet, with a good solids to gel ratio. This variety will produce hundreds of sweet cherry sized fruits. Indeterminate stake habit.

- (29B4) 250 sds-\$5.85; 500 sds-\$8.90; 1,000 sds-\$14.65; 2,000 sds-\$24.55; 5,000 sds-\$52.85

MICRO TOM - 8491

10-12 in. - 13,000 S. 85 days. Short, compact plant with 1 in. cherry tomatoes. Ideal for 4-in. pots, windowsills, or hanging baskets. Determinate bush habit.

- (26A4) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

TOMATO SMALL FRUITED (continued)

RED CHERRY LARGE - 8473

* 22,000 S. Heirloom. 70-80 days. 1 1/2 to 2-inch cherry shaped red fruits. Strong and vigorous plants produce good yields with fruit growing in clusters. Good for snacking, salads and vegetable trays. Disease resistance. Indeterminate stake habit.

- (29A4) 250 sds-\$5.85; 500 sds-\$7.10; 1,000 sds-\$11.20; 2,000 sds-\$18.40; 5,000 sds-\$39.00

RED CHERRY SMALL - 8474

22,000 S. Heirloom. 75 days. Cherry shaped red fruits. Vigorous plants yield a bountiful crop of delicious, uniformly sized, cherry tomatoes ranging in size from 1/2-inch to 3/4-inch. The bright red, sweet-tasting fruit is delicious for snacking, salads and vegetable trays. Good disease resistance. Indeterminate stake habit.

RED PEAR - 8476

14,000 S. 75 days. Heirloom. Miniature pear-shaped fruits are 1-3/4-2 in. long and bright red. Flavorful and sweet. Mix these in with the yellow version and have a great salad that rivals a gourmet restaurant. Indeterminate stake habit.

- Each of the above: (30B4) 500 sds-\$5.85; 1,000 sds-\$7.45; 2,000 sds-\$10.95; 5,000 sds-\$20.90; 10,000 sds-\$35.40

RED ROBIN - 8486

17,000 S. 55 days. A dwarf variety of cherry tomato for container growing, hanging baskets, windowsill or patio growing. Plants remain 8-12 in. tall and bear masses of 1-1/4 in. fruit with a mild, sweet flavor. Very tender skin and good taste even when fruit is grown indoors. Determinate bush habit.

SUNGELLA - 8412

70 days. A new larger fruited Sungold! Heavy producer of 2 oz. sweet, low-acid, orange fruit. Indeterminate stake habit.

- Each of the above: (26A4) 50 sds-\$5.85; 100 sds-\$7.75; 250 sds-\$14.95; 500 sds-\$24.90; 1,000 sds-\$43.65

SUNSUGAR TMV - 8402

11,000 S. 62 days. Germania voted this the best tasting small fruited variety. Each plant will produce many clusters of 1/2 inch or smaller, sweet golden cherry-sized, gorgeous fruit. A blue ribbon winner at one Fair declared it one of the sweetest and best flavored cherry varieties. Disease resistant. Indeterminate stake habit.

- (26E4) 50 sds-\$7.85; 100 sds-\$12.85; 250 sds-\$26.45; 500 sds-\$45.55; 1,000 sds-\$80.65

SWEET 100 - 8559

* 22,000 S. (F-1 Hybrid). 65 days. Huge, multiple-branched clusters of 1/2 in. very sweet fruit with high vitamin C content. Mouth-watering flavor. Vigorous vines bear abundantly until frost and need staking for best results. Indeterminate stake habit.
