EXCLUSIVE CUT FLOWER PLUG PROMOTION

A Special Cut Flower Program

For over 10 years, this program has helped growers succeed in the challenges facing the regional specialty cut flower grower. Our goal has been to offer grower-ready, field-ready cut flower material for you to speed into your already short growing seasons. Featuring, larger sized Lisianthus and premium Dahlias from tissue culture for maximum productivity and vigor.

We have added seed item pricing and an additional vendor with new sizes to choose from for your Lisianthus, Snapdragons and other specialty items. KubePak is conveniently located on the east coast for competitive freight.

This brochure is full of unique product choices that we feel will help contribute to your success and differentiate yourself from other growers, while earning the profit margins you deserve. Lastly, we want to thank you for your continued support and business. We are committed to you, the cut flower grower, and will continually strive to enhance our offerings and services to you.

BY THE NUMBERS . . . *The numbers associated with the varieties are seasonality numbers. They correlate to the natural timing of the particular variety. The first or lower number pertains to the speed guide (slower or faster to flower) and the second number is the versatility guide and indicates whether the variety can be grown over a longer or shorter flowering period.*

The first number indicates the START of the natural flowering period and the second number indicates the end of the natural flowering period. The numbers are defined as (1) Winter, (2) Early Spring, (3) Spring or Fall, and (4) Summer. As an example, Lisianthus ABC White (!-3) is best suited for planting in the winter thru early spring and harvest by late spring compared to Lisianthus ABC White (3-4) which is best suited for planting late spring for harvest in the summer.

Karma Sangria

Karma Dahlias from Bosgraaf

- **#1 cut flower dahlia on the market, developed specifically for cut flowers**
- **All liners grown from tissue cultured stock to ensure disease-free plants**

Karma Dahlias have been developed specifically for the cut flower market, incredibly strong stems with brilliant, iridescent colors—24 to be exact. The plants are highly productive with uniform stems and a long flowering period. Blooms are 4-5 inches in diameter and are upright facing. Versatile Karma Dahlias can be grown in the field, cold frames or greenhouses.

After planting, pinch and leave 3-4 sets of leaves, which will give 4-6 breaks. Dahlia beds should be approximately 3 feet wide with an 18-inch walkway between beds. Stems can be harvested 7-9 weeks after pinch. Always cut just above the node. Stem length varies from 12 to 20 inches. The stems can be cut when the flowers show color and are halfway (or less) open. Stems must be put in water with a post harvest additive, this treatment delays leaf yellowing in the vase and keeps better flower quality. Store cut flowers at a post-harvest temperature of 40-42°F. Expect 6-8 stems per square foot in the field, 10-13 stems per square foot in cold frames and 12-15 stems per square foot in a heated greenhouse.

SHIPPING SEASON
